Policies On Leave From Work:

Work and Family Policy Stephen Sweet, 2013-09-13 Numerous challenges exist in respect to integrating work and family institutions and there is remarkable cross national variation in the ways that societies respond to these concerns with policy This volume examines these concerns by focusing on cross national variation in structural cultural arrangements Consistent support is found in respect to the prospects of expanding resources for working families both in the opportunity to provide care as well as to remain integrated in the workforce However the studies in this volume offer qualifiers explaining why some effects are not as strong as might be hoped and why effects are sometimes restricted to particular classifications of workers or families It is apparent that when different societies implement similar policies they do not necessarily do so with the same intended outcomes and usage is mediated by how policies are received by employers and workers The chapters in this book speak to the merits of international comparative analysis in identifying the strategies challenges and benefits of providing resources to workers and their families This book was originally published as a special issue of *Community Work Family*

countries to review their early childhood education systems in an international context Women and Employment in Public Policy Susan Milner, 2024-07-20 In the UK women's economic empowerment through employment is a success story of the last three decades. And yet women are overrepresented in low paid insecure jobs, are underrepresented in top jobs and earn less than men on average with a marked income gap over the lifecycle. When Labour took office in 1997 a new wave of women MPs entered parliament in record numbers and women gained access to ministerial roles including a newly created minister for women. However policy on women and employment remained an area of conflict. New rights were secured particularly for mothers but when Labour left office a sizeable policy agenda remained unfinished. Using documentary evidence and interviews from leading policy actors from the period Women and Employment in Public Policy takes as its starting point the Women and Work Commission which was convened in 2004 to examine causes of the gender pay gap. The commission was unable to defuse conflicts over equal pay but it set out an agenda for change at the level of government, private sector work organizations and public sector organizations. Milner examines why the commission could not resolve key conflicts and why its broad based recommendations were only partially taken up. She traces the subsequent development of policy, observing well established preferences for light touch regulation which can raise awareness but leave entrenched practices unchallenged and weaken individual women's access to redress. Detailed study of the working of the commission provides lessons on the policy process particularly for those seeking to influence policy. It also shows that within the wider policy space opportunities for action to effect change are possible based on appeals to instrumental logic or political exchange but are constrained by party leadership Family Policy in Transformation D. Woods, 2012-01-06 In the US and UK there has been a transformation in child care, family leave, social assistance and tax credits over the last twenty years. This book explores the factors behind these changes. With detailed case studies it shows that ideas and the power to wield them are crucial factors in the transformation of family policy **Women's Empowerment and Public Policy in the Arab Gulf States** Rabia Naguib, 2023-12-22 This open access book explores the various dimensions of women's empowerment in public policy in the Gulf Cooperation Council (GCC) region with a particular focus on Qatar, comparing the country to the other Gulf states. Through its rich compilation of empirical qualitative research the text unpacks the various ways in which women's empowerment materializes in the GCC context, providing insights into public policy perspectives in high income rentier states more broadly. The Arab world has long been part of the global dialogue on women's economic and political empowerment and the GCC has over the past decade situated women's empowerment amongst their respective national priorities and long term strategies. In turn the Gulf has seen gradual implementation of policies aimed at women specifically in looking to attract and retain them in the labour market and in the public sector more broadly. The collection surveys and evaluates the progress made in recent decades, paying close attention to the cultural and policy constraints still limiting women's empowerment in the Gulf. With a key linkage to SDG5 this book is a timely text addressing the context and drivers behind policies centering on

women in the Arab region in its analysis of the interplay of international women s empowerment discourse and regional public policy decisions It is relevant to researchers and policy makers focused on women and gender issues in relation to social cultural economic and political empowerment in the Gulf specifically but also in the Arab world and beyond Aging Policy and Politics in the Trump Era Edward Alan Miller,Pamela Nadash,Michael Gusmano,2020-05-21 The surprise election of Donald J Trump to the presidency of the United States marks a singular turning point in the American republic not only because of his idiosyncratic approach to the office but also because the Republican Party now holds the presidency and both houses of Congress presenting a historic opportunity for change The role of older Americans has been critical in both shaping and reacting to this political moment Their political orientations and behaviors have shaped it through their electoral support for Republican candidates But older Americans stand as highly invested stakeholders in the policy decisions made by the very officials they elected and as beneficiaries of the programs that Republicans have targeted for cuts or elimination This comprehensive volume explores the ways in which Trump administration policies are likely to significantly undermine the social safety net for near elderly and older Americans including long term care housing health care and retirement The authors also explore how the Trump administration might shape politics and political behavior through the policy changes made The response of older voters in upcoming elections to efforts by the Trump administration and its Republican allies in Congress to draw back on the federal government s commitment to programs and policies affecting them will shape the direction of aging policy and politics for years to come This book was originally published as a special issue of the Journal of Aging Social Policy **Indebted Societies** Andreas Wiedemann,2021-07-08 Wiedemann reveals how the rise of financial markets as private alternatives to welfare states transforms social rights and responsibilities Infancy Dana Gross,2023-07-10 The fourth edition of Infancy is a comprehensive and accessible core text for courses in infant development and early childhood development Dana Gross s sensitive and engaging teaching voice seamlessly weaves together research and theory with current issues of diversity and culture This resource provides students with enough detail to understand methodological issues explore both practically and theoretically important topics and engage in thinking critically about development from birth to age three Each chapter of this newest edition has updated coverage and instructor friendly materials including diversity equity and inclusion topics and perspectives research practices new technologies mental health in child development and the role and impact of family connections *Making Motherhood Work* Caitlyn Collins,2020-05-05 The work family conflict that mothers experience today is a national crisis Women struggle to balance breadwinning with the bulk of parenting and social policies aren t helping Of all Western industrialized countries the United States ranks dead last for supportive work family policies Can American women look to Europe for solutions Making Motherhood Work draws on interviews that Caitlyn Collins conducted over five years with 135 middle class working mothers in Sweden Germany Italy and the United States She explores how women navigate work and family given the different policy supports available in

each country Taking readers into women s homes neighborhoods and workplaces Collins shows that mothers expectations depend on context and that policies alone cannot solve women s struggles With women held to unrealistic standards the best solutions demand that we redefine motherhood work and family

Father Involvement and Gender Equality in the United States Richard Petts,2022-08-31 This book focuses on issues of family work and gender with a focus on gender inequality Women are disadvantaged in both paid and domestic work due in large part to being primarily responsible for duties within the domestic sphere The COVID 19 pandemic has exacerbated these inequalities making the issue of reducing gender inequality even more pressing Fathers play an important role in contributing to and perhaps reducing gender inequality but barriers to their involvement in family life have received less attention than detailing challenges that mothers face If men were equally involved in all aspects of domestic life i e were fully engaged dads women s burdens would be reduced and perceptions of who is responsible for parenting may change resulting in greater gender equality Father Involvement and Gender Equality in the United States focuses on the key issue of father involvement seeking to understand why fathers are less involved at home than mothers despite an increased desire for fathers to be more engaged parents This book utilizes recent national survey data interviews with fathers and insights from the author s personal experience as a father to identify current norms of fatherhood within the United States barriers to father involvement and strategies to overcome these barriers Overall this book argues that by establishing the expectation that fathers will be fully engaged dads as a cultural norm and by providing structural opportunities for fathers to meet this cultural standard greater gender equality can be achieved within the United States The arguments presented in this book are valuable for scholars in the

areas of family work and gender policymakers and business leaders who seek to promote gender equality and work family balance and parents who are interested in achieving a more egalitarian division of labor within their own families
