

TARGETED POLICIES FOR FORCIBLY DISPLACED PERSONS

As we mentioned in our trends assessment in January, the almost 80 million forcibly displaced persons (FDPs) around the world require targeted policies and interventions as part of a holistic financial inclusion strategy. The COVID-19 crisis has undoubtedly made their lives even more precarious. As the recent catastrophe in Lesbos, Greece has shown starkly, many FDPs are confined to camps, the conditions in which make social distancing and regular hand washing impossible, leaving them highly vulnerable to infection from the virus.

To make matters worse, there are signs that host communities' attitudes and hospitality to FDPs may harden in response to the pandemic. Indeed, in some cases, FDPs in transit have been turned away from their intended destinations, with COVID-19 movement restrictions cited as a justification. In a context in which "an outbreak anywhere is an outbreak everywhere," it's essential to include FDPs in economic and financial – as well as public health – responses to the pandemic. As David Miliband, president and CEO of the International Rescue Committee put it, "this is a disease of the connected world and we must address it as a connected world."

INCLUSIVE DIGITAL ONBOARDING

Turning to technological trends, the shift towards digital identification and verification that we highlighted in January has been further catalyzed by the closure of physical premises. Countries such as India, Peru and Thailand, which have invested in national digital identity programs and other digital infrastructure such as interoperable payment systems, have been able to utilize this infrastructure to deliver targeted large-scale fiscal support packages – including to informal sector workers and vulnerable populations.

The president of the Financial Action Task Force, Xianming Liu, gave further impetus in this direction by calling for countries to explore digital identity to manage money laundering and terrorist financing risks posed by the crisis. He also urged them to make use of financial technology, regulatory technology and supervisory technology "to the fullest extent possible."

This trend towards digital onboarding, if sustained beyond the pandemic, could be particularly important for the financial inclusion of women who, research shows, are disproportionately impacted by traditional Know Your Customer norms.

REGULATION AND VIRTUAL ASSETS

We also projected that 2020 would be a year of increased regulation and growing use cases for virtual assets. This still seems likely to be the case, judging from examples such as the Reserve Bank of Zimbabwe's announcement in March of a regulatory sandbox for cryptocurrency companies.

The Financial Action Task Force has warned that countries need to remain vigilant with regard to the "increased misuse of ... virtual assets to move and conceal illicit funds" in light of the pandemic. Meanwhile, the impact of the crisis in nudging consumers and businesses to digital payment channels, coupled with unprecedented monetary policy responses by central banks globally, could also serve to increase the attractiveness of virtual assets as investments. The pandemic also presents an opportunity for various "stablecoin" projects to demonstrate their potential role in financial inclusion, by helping to disburse emergency funds to the most vulnerable populations quickly and efficiently.

Meanwhile, with the exception of China, many countries had pressed the pause button on using central bank digital currencies in the emergency phase of their crisis response. But the pandemic highlights the importance of reliable, secure and interoperable digital payments systems as an essential service. So coupled with the declining popularity of cash, we are now already seeing such projects picking up speed again as we enter the recovery phase.

Harming Future Persons Melinda A. Roberts, David T. Wasserman, 2009-07-31 Melinda A Roberts and David T Wasserman 1 Purpose of this Collection What are our obligations with respect to persons who have not yet and may not ever come into existence Few of us believe that we can wrong those whom we leave out of existence altogether that is merely possible persons We may think as well that the directive to be fruitful and multiply and replenish the earth 1 does not hold up to close scrutiny How can it be wrong to decline to bring ever more people into existence At the same time we think we are clearly obligated to treat future persons persons who don't yet but will exist in accordance with certain stringent standards Bringing a person into an existence that is truly awful not worth having can be wrong and so can bringing a person into an existence that is worth having when we had the alternative of bringing that same person into an existence that is substantially better We may think as well that our obligations with respect to future persons are triggered well before the point at which those persons commence their existence We think it would be wrong for example to choose today to turn the Earth of the future into a miserable place even if the victims of that choice do not yet exist

Statutes of the Province of Canada Canada,1865 *Statuts de la province du Canada* Canada,1865 Identified versus Statistical Lives I. Glenn Cohen,Norman Daniels,Nir Eyal,2015-03-09 The identified lives effect describes the fact that people demonstrate a stronger inclination to assist persons and groups identified as at high risk of great harm than those who will or already suffer similar harm but endure unidentified As a result of this effect we allocate resources reactively rather than proactively prioritizing treatment over prevention For example during the August 2010 gold mine cave in in Chile where ten to twenty million dollars was spent by the Chilean government to rescue the 33 miners trapped underground Rather than address the many more cost effective mine safety measures that should have been implemented the Chilean government and international donors concentrated efforts in large scale missions that concerned only the specific group Such bias as illustrated through this incident raises practical and ethical questions that extend to almost every aspect of human life and politics What can social and cognitive sciences teach us about the origin and triggers of the effect Philosophically and ethically is the effect a bias to be eliminated or is it morally justified What implications does the effect have for health care law the environment and other practice domains This volume is the first to take an interdisciplinary approach toward answering this issue of identified versus statistical lives by considering a variety of perspectives from psychology public health law ethics and public policy **Federal Register** ,2006-02
