Policing and Social Media Christopher J. Schneider, 2024-10-31 Policing and Social Media Social Control in an Era of Digital Media investigates various public aspects of the management use and control of social media by police agencies in Canada. This book aims to illustrate the process by which information technology, namely social media and related changes in communication formats, have affected the public face of policing and police work. Christopher J. Schneider argues that police use of social media has altered institutional public police practices in a manner that is consistent with the logic of social media platforms: policing is changing to include new ways of conditioning the public, cultivating self-promotion, and expanding social control. Every chapter in this second edition has been updated with contemporary examples and analysis. Each case study presented here focuses on a different social media platform or format while, at the same time, developing suitable analytical and methodological approaches for understanding contemporary policing practices on social media sites.

Policing Indigenous Movements Andrew Crosby, Jeffrey Monaghan, 2018-05-14T00:00:00Z In recent years, Indigenous peoples have led a number of high-profile movements fighting for social and environmental justice in Canada. From land struggles to struggles against resource extraction, pipeline development, and fracking, land and water defenders have created a national discussion about these issues and successfully slowed the rate of resource extraction. But their success has also meant an increase in the surveillance and policing of Indigenous peoples and their movements. In *Policing Indigenous Movements*, Crosby and Monaghan use the Access to Information Act to interrogate how policing and other security agencies have been monitoring, cataloguing, and working to silence Indigenous land defenders and other opponents of extractive capitalism. Through an examination of four prominent movements—the long-standing conflict involving the Algonquins of Barriere Lake, the struggle against the Northern Gateway Pipeline, the Idle No More movement, and the anti-fracking protests surrounding the Elsipogtog First Nation—this important book raises critical questions regarding the expansion of the security apparatus, the normalization of police surveillance targeting social movements, the relationship between police and energy corporations, the criminalization of dissent, and threats to civil liberties and collective action in an era of extractive capitalism and hyper-surveillance. In one of the most comprehensive accounts of contemporary government surveillance, the authors vividly demonstrate that it is the norms of settler colonialism that allow these movements to be classified as national security threats and the growing network of policing governmental and private agencies that comprise what they call the security state.
