Policing And Democracy In The Netherlands:

Policing and Democracy in the Netherlands Trevor Jones,1995 Three specific areas of policing policy are considered the major restructuring of the Dutch police system which began in the early 1990s the growth in attention given to crime prevention in the Netherlands and new policing responses to crimes against women and children *Handbook of Policing* Tim Newburn,2012-08-21 This new edition of the Handbook of Policing updates and expands the highly successful first edition and now includes a completely new chapter on policing and forensics It provides a comprehensive but highly readable overview of policing in the UK and is an essential reference point combining the expertise of leading academic experts on policing and policing practitioners themselves **Challenges of Policing Democracies** Dilip Das,Marenin

Otwin,2012-10-12 In this text the editors analyze the diverse situations that police forces operate under and the challenges that they face in different kinds of democracies This cross cultural comparison of various systems highlights the universal observation that police are a anomaly in a democracy and explores how various influences for example large scale social violence a zeal for crime fighting and vulnerability to temptation often find police incapable of behaving in a democratic manner Challenges of Policing Democracies goes beyond just showing the similarities and differences of the policing challenges democratic societies face it also examines the responses and remedies adopted by police in various countries at different levels of democratic achievement and how every society struggles with the challenges of preserving democratic values without sacrificing the effectiveness of policing Municipal Policing in the European Union D. Donnelly,2013-01-21 The book applies a model of municipal policing to compare a number of police systems in the European Union suggesting that in the future local communities will have some form of police enforcement mechanism that will not always include the sworn police officer Policing European Metropolises Elke Devroe,Adam Edwards,Paul Ponsaers,2017-02-03

Understanding the politics of security in city regions is increasingly important for the study of contemporary policing This book argues that national and international governing arrangements are being outflanked by various transnational threats including the cross border terrorism of the attacks on Paris in 2015 and Brussels in 2016 trafficking in people narcotics and armaments cybercrime the deregulation of global financial services and environmental crime Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges and considers problems of and for policing in city regions in the European Union and its single market Bringing together experts from across the continent Policing European Metropolises develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country This book will be of value to police researchers in Europe and

abroad as well as postgraduate students with an interest in policing and urban policy **Encyclopedia of Law Enforcement** Larry E Sullivan, 2005 Vols 1 and 2 cover U S law enforcement Vol 3 contains articles on individual foreign nations together with topical articles on international law enforcement **Comparative Policing from a Legal Perspective** Monica den Boer, Public police forces are a regular phenomenon in most jurisdictions around the world yet their highly divergent legal context draws surprisingly little attention Bringing together a wide range of police experts from all around the world this book provides an overview of traditional and emerging fields of public policing New material and findings are presented with an international comparative perspective it is a must read for students of policing security and law and professionals in related fields **Governance and the Democratic Deficit** Victor Bekkers, Geske Dijkstra, Menno Fenger, 2016-04-22 It is widely acknowledged that we are witnessing a major transformation of public policy making a transformation which has been labelled as a change from government to governance Governance is used to describe policy making and implementation without a central authority in a non hierarchical network like structure through negotiation and cooperation between public and private actors at one or across different political levels This comprehensive volume combines empirical analysis and normative assessment of governance practices providing a systematic approach based on a framework for assessing democratic legitimacy It addresses different modes of governance at the local regional national European and international levels The volume assesses the alleged democratic deficit of these new governance practices and as such is ideally suited to courses on public administration **Policing Democracy** Mark Ungar, 2020-03-03 2011 Winner of the Charles H Levine Memorial Book Prize of the International Political Science Association Latin America s crime rates are astonishing by any standard the region s homicide rate is the world s highest This crisis continually traps governments between the need for comprehensive reform and the public demand for immediate action usually meaning iron fisted police tactics harking back to the repressive pre 1980s dictatorships In Policing Democracy Mark Ungar situates Latin America at a crossroads between its longstanding form of reactive policing and a problem oriented approach based on prevention and citizen participation Drawing on extensive case studies from Argentina Bolivia and Honduras he reviews the full spectrum of areas needing reform criminal law policing investigation trial practices and incarceration Finally Policing Democracy probes democratic politics power relations and regional disparities of security and reform to establish a framework for understanding the crisis and moving beyond it *Policing in Europe* Antoinette Verhage, 2010 The Journal of Police Studies is a quarterly which is oriented towards high standard quality contributions on policing issues and phenomena that are of interest to the police Topics are approached from a specialist and if required multidisciplinary point of view The volume looks to answer questions regarding the developments of police and police cooperation in Europe at the supranational level as well as explore the reactions of police organizations in individual European countries to the process of transnationalisation in terms of the design of and philosophy within police organizations **Regional Integration and Democracy** Jeffrey J.

Anderson, 1999 This work explores the interrelationship between democracy and regional integration Although centred in Europe the volume shifts terms of discussion on integration and democracy by including case studies outside of Europe It also analyzes the European Union's democratic deficit the impact of regional integration on national democracy and the dynamic interactions between democracy and integration elsewhere in the world Militarization and Democracy in West Germany's Border Police, 1951-2005 David M. Livingstone, 2024 A social history of West Germany's Bundesgrenzschutz BGS Federal Border Police that complicates the telling of the country's history as a straightforward success story The 2020 murder of George Floyd by Minneapolis police officers shows that police violence is still a problem in Western democracies Floyd's murder prompted some critics to hail the German police as a model of democratic policing that should be emulated After 1945 Germany's police forces had supposedly shed the militarization and authoritarian impulses still prevalent in other nations' forces These uncritical appraisals however deserve closer analysis This book is a social history of West Germany's Bundesgrenzschutz BGS a federal border guard established in 1951 that became reunified Germany's first national police force It argues that the BGS revived authoritarian traditions of militarized policing and kept them alive long into the postwar era even though the country was supposedly consigning these problematic legacies to its past The BGS was staffed and led by Wehrmacht and SS veterans until the late 1970s and while West Germany was democratizing BGS commanders were still planning to fight wars and were teaching its officers street fighting tactics While the end outcome was positive the study contributes to the growing body of recent research that complicates the writing of the Federal Republic's history as a success story Dealing explicitly with post-fascist West Germany's struggle to establish a democratic police force the book enters a conversation with studies concerned with democratization security and Germany's effort to overcome its Nazi past DAVID M LIVINGSTONE holds a PhD in History from the University of California San Diego He is retired as Chief of Police of Simi Valley California and is an adjunct professor at California Lutheran University *Policing Developing Democracies* Mercedes S. Hinton, Tim Newburn, 2008-09-25 There are enormous challenges in establishing policing systems in young democracies Such societies typically have a host of unresolved pressing social economic and political questions that impinge on policing and the prospects for reform There are a series of hugely important questions arising in this context to do with the emergence of the new security agenda the problems of transnational crime and international terrorism the rule of law and the role of the police security services and the military This is a field that is not only of growing academic interest but is now the focus of a very significant police reform industry Development agencies and entrepreneurs are involved around the globe in attempts to establish democratic police reforms in countries with little or no history of such activity Consequently there is a growing literature in this field but as yet no single volume that brings together the central developments This book gathers together scholars from political science international relations and criminology to focus on the issues raised by policing within developing democracies examining countries in Eastern Europe Asia South America and Africa *What*

Matters in Policing? van Dijk, Auke, Hoogewoning, Frank, Maurice Punch, 2015-08-19 Studies of policing tend to focus on effectiveness on what works rather than on the more important question of what matters of why policing should be done in particular ways or reformed or restructured This book explores that angle looking at the implications of recent restructurings in the United States the United Kingdom and the Netherlands with a special emphasis on the dilemmas faced by police leadership as they confront change

Collective Violence, Democracy and Protest Policing David R Mansley, 2013-10-08 In this book David Mansley argues that the frequency with which violence intrudes on to the streets is related to both how society is governed and how it is policed With the help of an innovative methodology he quantifies and tests three variables collective violence democracy and protest policing using protests in Great Britain in 1999 2011 for his sampling frame The result is the design of new tools of measurement and a harvest of new data including previously unpublished details of banning orders and riot damages that enable us to reflect with the benefit of broad sociological perspective on the causes of contemporary violent events Mansley's explanation of the trends he identifies draws from the work of the best thinkers on violence especially Charles Tilly Thomas Hobbes and Norbert Elias He shows how the style of protest policing and the depth of democracy both of which function under the direction of the political economy are crucial to the state's credentials as the monopoly supplier of legitimate violence His discussion touches on such current topics as the institution of police commissioners the privatisation of policing duties and the decline in homicide This cultured study which includes an engaging review of the existing scholarship on violence is essential material for undergraduate and postgraduate students reading criminology sociology or political theory

Alemika, 2021-08-04 The volume intended to function as an academic debate book began as a workshop on Human Rights and the Police in Transitional Countries held in March 2001 in Hillerød Denmark The workshop which was funded by the Danish Ministry of Foreign Affairs brought together practitioners and academics from Europe Asia Africa and Latin America to discuss common experience from the context of transition which characterises all of them These discussions take place along four themes i.e the transitional context governance and rule of law police and civil society education and training and the police organisation and reform international intervention and aid In addition to a number of key papers on general and theoretical aspects each section contains a number of illustrative examples of how these issues express themselves in a large number of countries Finally the book sums up a catalogue of findings and recommendations in relation to the promotion of human rights in transitional countries and the role of the police in this work
