Policy Options For A New South Africa:

Policy Options for a New South Africa University of the Witwatersrand. Centre for Policy Studies, Human Sciences Research Council. Division Constitutional and Political Studies, 1991 The book follows a fresh approach to policy studies In contrast to other studies in this field which normally promote single substitute proposals to address a specific policy issue this volume stresses the open ended nature of policy making by identifying and assessing alternate policies which may be considered given different value assumptions by policy makers It is the most comprehensive attempt yet to present a comparative analysis and assessment of what experts regard as the most realistic and feasible alternative policy routes to social political and economic transformation The inter related nature of policy making the fact that changes in one sector affect other sectors of society is stressed throughout the analyses Some theoretical perspectives on policy making are also given to summarise the existing state of the art for the reader It is intended for decision makers in all spheres of society involved with the issues in question for scholars and students who study these issues for opinion makers who want to keep abreast with the various policy options available and their implications and also for the layman who is interested in what promises or threats the future may hold

Africa and Globalization Toyin Falola, Kenneth Kalu, 2018-05-30 This book considers the promises and challenges of globalization for Africa Why have African states been perennially unable to diversify their economies and move beyond export of primary produce even as Southeast Asia has made a tremendous leap into manufacturing What institutional impediments are in play in African states What reforms would mitigate the negative effects of globalization and distribute its benefits more equitably Covering critical themes such as political leadership security challenges the creative sector and community life essays in this volume argue that the starting point for Africa's meaningful engagement with the rest of the world must be to look inward examine Africa's institutions and work towards reforms that promote inclusiveness and stability

Strategies Of Democratization Tatu Vanhanen, 2013-04-03 First Published in 1992 The purpose of this book is to examine the strategies used in the struggle for democracy and the problems of democratization in different parts of the world This examination is based on the idea that the conscious choices of people and their leaders matter and that better knowledge of successful and unsuccessful strategies might help people to adopt more rational strategies in the struggle for democracy This book originated in the international cooperation of political scientists interested in the problems of democratization

New South African Review 1 Doreen Atkinson, Prishani Naidoo, Devan Pillay, Roger Southall, 2010-11-01 Is South Africa on a long term decline The New South African Review revives the tradition of critical analytical scholarship developed by the South African Review in the 1970s and 1980s Accessible to a wide readership and drawing upon authors from well beyond academia its objective is to be informative discursive and at times downright provocative It seeks to provide contemporary comment and engage with current controversies The first volume in the series 2010 Development or Decline ranges widely across the implications of the international crisis for the economy the threats to

our fragile ecology of present economic strategies through to the state of the ANC and the public service issues around service delivery migration HIV Aids land reform crime the sexual behaviour of our youth and much more Posing the provocative question of whether South Africa is embarking upon a long term decline the volume simultaneously argues the potential for a society premised upon social equality social coherence and sustainability This collection will appeal to both national and international audiences interested in engaging with the multiple dilemmas and challenges facing contemporary South Africa

State Formation After Civil War Derek M Powell, 2016-08-05 State formation after civil war offers a new model for studying the formation of the state in a national peace transition as an integrated national phenomenon Current models of peacebuilding and state building limit that possibility reproducing a fragmented selective view of this complex reality Placing too much emphasis on state building as design they place too little on understanding state formation as unplanned historical process The dominant focus on national institutions also ignores the role that cities and civic polities have played in constituting the modern state Mining ideas from many disciplines and evidence from 19 peace processes including South Africa the book argues that the starting point for building a systematic theory is to explain a distinct pattern to state formation that can be observed in practice Despite their conflicts people in fragile societies bargain terms for peaceful coexistence they make attempts to constitute the right to rule as valid state authority in circumstances prone to conflict over which they have imperfect influence not control Though the kind of institutions created will differ with context how rules for state authority are institutionalized follows a consistent basic pattern That pattern defines state formation in peace transitions as both a unified if contingent field of normative practice and an object of comparative study Where the national centric models see local government as a matter belonging to policy on decentralization for later in the reconstruction phase the book uncovers a distinct local government dimension to peace transitions A civic dimension to national conflicts that must be explained incipient or proto local authorities that emerge even during civil war in peace making after state collapse the fact that it is common for peace agreements and constitutions to include rules for local authority for local elections to be held as part of broader democratization and for laws to be enacted to establish local government as part of peace compacts The book develops the concept of local peace transition to explain the distinctive constitutive role of this local dimension in peace making and state formation This path breaking book will be of compelling interest to practitioners scholars and students of comparative constitutional studies international law peace building and state building

Migration and Refugee Policies Ann Bernstein, Myron Weiner, 2002-02-14 Migration and refugee movements are becoming increasingly prominent features of the

millennial world Persistent disparities in wealth and job opportunities and continued political conflict and repression impel growing numbers of people to seek work and safety outside their own countries However many governments and their citizens remain reluctant to open their borders to foreigners For this reason in one country after another migration and refugee questions have become politically controversial creating the need for a sound understanding of policy options and their implications This book brings together five international scholars who survey key aspects of the international experience of migration and refugee policies In Part II drawing on the lessons presented by international experience a team of South African experts address the thorny migration and refugee issues confronting that country s new democratic government
