be the design of a credible framework for measuring the results of the Bank's country assistance and helping to build local capacity for monitoring the impact of poverty reduction programmes The report is in English with the foreword and the executive summary given in English Spanish and French **How Ottawa Spends, 1990-1991** Katherine A.H.

Coalitions and Compliance Kenneth C. Shadlen, 2017-08-04 Coalitions and Compliance examines how international changes can reconfigure domestic politics Since the late 1980s developing countries have been subject to intense pressures regarding intellectual property rights These pressures have been exceptionally controversial in the area of pharmaceuticals Historically fearing the economic and social costs of providing private property rights over knowledge developing countries did not allow drugs to be patented Now they must do so an obligation with significant implications for industrial development and public health This book analyses different forms of compliance with this new imperative in Latin America comparing the politics of pharmaceutical patenting in Argentina Brazil and Mexico Coalitions and Compliance focuses on two periods of patent politics initial conflicts over how to introduce drug patents and then subsequent conflicts over how these new patent systems function In contrast to explanations of national policy choice based on external pressures domestic institutions or Presidents ideological orientations this book attributes cross national and longitudinal variation to the ways that changing social structures constrain or enable political leaders strategies to construct and sustain supportive coalitions The analysis begins with assessment of the relative resources and capabilities of the transnational and national pharmaceutical sectors and these rival actors efforts to attract allies Emphasis is placed on two ways that social structures are transformed so as to affect coalition building possibilities how exporters fearing the loss of preferential market access may be converted into allies of transnational drug firms and differential patterns of adjustment among state and societal actors that are inspired by the

introduction of new policies It is within the changing structural conditions produced by these two processes that political leaders build coalitions in support of different forms of compliance      **Combat Poverty Agency Pre-Budget Submission**
