Polikarpov I15bis:

Polikarpov I-15, I-16 and I-153 Aces Mikhail Maslov, 2013-02-20 From the heat of Spain to the frozen wastelands of Finland this book reveals the combat stories of the pilots who flew the Polikarpov fighters from 1936 until the end of World War II The I 15 I 16 and I 153 fighters were the world s first mass produced fighters Some 17 000 Polikarpovs had been manufactured by the time production ceased in 1941 They served with the Republicans in the Spain the Chinese against Japan in 1937 38 and the Soviets against both Japan in the Nomonhan Incident and Finland during the Winter War By 1941 more than 20 Soviet pilots had made ace in Polikarpovs and many more attained that status during the first months of the German invasion Though thoroughly outclassed this book shows how the Polikarpov was the backbone of the Soviet air force during the early months of the war in the east and continued to serve as training aircraft and as frontline fighters some right through to 1945 **Allied Fighters of World War II** Bill Gunston, 1992 **Monino Museum Moscow** Ken

Duffey, 2013-06-19 One of the premier collections of Soviet and Russian aircraft the Monino museum opened in 1960 and covers an area of about 20 hectares It has on display more than 173 aircraft and 127 aero engines with 44 of its exhibits having been declared as monuments of science and technology The Monino museum charts the history of Soviet and Russian aviation from the earliest pre revolutionary days until the present time with exhibits in the form of models artefacts posters aero engines weapons etc as well as airframes ejection seats rockets covering the later period This book describes and illustrates all the exhibits on display in this amazing museum It serves as a guide for those visiting Monino and a mouth watering taste for those unable to get there in person **Combat Biplanes of World War II** Peter C. Smith, 2015-09-30

Aviation and maritime historian Peter C Smith reveals how both Allied and Axis powers used World War I era aircraft in Combat Biplanes of World War II The era of the combat biplane is usually thought to have been between 1914 and 1938 By the outbreak of World War II most of the advanced air forces of the world had moved on to monoplane aircraft for their front line battle forces both in bomber and fighter capacities Yet despite this many biplanes did still survive both in front line service and in numerous subsidiary roles and not just as training machines but as fully operational warplanes Thus in 1939 the majority of major European powers still retained some albeit few biplane aircraft Great Britain had the bulk of such obsolescent machines including the Gladiator Swordfish Walrus Vildebeeste and Audax while the inferior Albacore meant to replace the Swordfish had yet to enter service Germany still managed to conduct missions in which biplanes like the He 50 He 51 and Hs 120 excelled Both France and Italy had active biplanes Mussolini s Regia Aeronautica attaching great importance to the type as a fighter aircraft as late as 1941 while the Soviet Union also retained some machines like the Po 2 in front line service right through the war and beyond By the time Japan and the United States entered the war two years later they had mainly rid themselves of biplanes but even here a few specialized types lingered on Combat Biplanes of World War II describes many of these gallant old warriors representing the author s own personal selection from a surprisingly

large range of aircraft that despite all predictions fought hard and well Aces of the Republic of China Air Force Raymond Cheung,2015-05-20 The ace pilots of the Republic of China Air Force have long been shrouded in mystery and obscurity as their retreat to Taiwan in 1949 and blanket martial law made records of the RoCAF all but impossible to access Now for the first time the colourful story of these aces can finally be told Using the latest research based on released archival information and full colour illustrations this book charts the history of the top scoring pilots of the RoCAF from the beginning of the gruelling eight year Sino Japanese War to the conclusion of the Civil War against the Chinese Communists Beginning as a ragged and very disparate group of planes and pilots drawn from various provincial air forces the RoCAF gradually became standardised and was brought under American tutelage Altogether it produced 17 aces who scored kills whilst flying a startling variety of aircraft from biplanes to F 86 Sabres *Sino-Japanese Air War 1937-1945* Hakan Gustavsson,2017-01-20

Military Aircraft, 1919-1945 Justin D. Murphy,Matthew A. McNiece,2008-12-08 An in depth history of the time when airpower became the great equalizer changing military strategy forever and bringing once safe targets in reach Military Aircraft 1919 1945 An Illustrated History of Their Impact covers a crucial era in modern warfare technology Ranging from the development of airpower doctrines in the aftermath of World War I to the aircraft and missions that put those doctrines into action during World War II it provides an expert summing up of the decades when the use of aircraft in battle came of age In chapters covering both the history of air power and specific types of aircraft fighters bombers reconnaissance and auxiliary planes Military Aircraft 1919 1945 introduces key theorists and designers describes important changes in technology and production and recreates spectacular episodes from Pearl Harbor to the London Blitz to the Enola Gay Readers will see the dramatic impact of the first generation of modern military aircraft on land and sea They will also see how the expansion of war to the skies brought economic opportunity to some home fronts and looming terror and devastation to others Spanish Republican Aces Rafael A López Permuy,2013-03-20 The first book published in English to focus exclusively on the exploits of the fighter aces of the Aviación Militar in their fight against the elite pilots of the better armed Nationalist force At the start of the Spanish Civil War most young fighter pilot officers joined the rebels while the high ranking officers grupo or escuadrilla commanders and the NCOs sergeants and corporals remained loyal to the government Mostly flying the obsolete Nieuport Ni 52s these loyalists were soon outpaced by the more modern Fiat CR 32s and Heinkel He 51s However at this early stage of the war there were several Republican airmen who became aces and famous in the process despite the small numbers of enemy aircraft shot down Widely speaking the Republican military aviation did not keep an exhaustive record of individual shooting claims However sufficient documentation exists to make a reasonable assumption as to which pilots fall into the ace category This volume details the exploits of those pilots ideal for fans of previous works in the Osprey Aircraft of the Aces series on Nationalist CR 32 Aces and Polikarpov I 15 I 16 and I 152 Aces *Soviet Fighters of the Second World War* Jason Nicholas Moore,2021-07-30 The Red Air Force had just started to re equip with modern

monoplane fighters when the Germans opened Operation Barbarossa the invasion of the Soviet Union Hundreds of fighters were destroyed in the first few days but many of these were obsolete biplanes Soviet Fighters of the Second World War details fighter development from the dark days of Barbarossa to eventual triumph over Berlin Starting with outdated aircraft such as the Polikarpov Po 2 biplane and monoplane fighters the Soviets then settled on two main lines of development the inline engine LaGG 3 and its radial engine derivatives the La 5 and La 7 and the inline engine Yakovlev fighters which were produced in greater numbers than any other series of fighters Not only are these aircraft accurately described but experimental fighters are also dealt with In addition colour profiles illustrate these aircraft in terms of design camouflage and markings From the I 15bis biplane of the late 1930s to the superb La 7 and Yak 3 fighters of the last year of the war all Red Air Force fighters are covered in this comprehensive volume **Soviet Air Force Fighter Colours 1941-1945** Erik Pilawskii,2003 This book represents probably the most detailed study published in the English language of the camouflage and markings of the fighter aircraft of the Soviet Air Force during World War II Erik Pilawskii is a scholar of the Soviet Air Force in World War II and has undertaken several years of research to produce this ground breaking book With information drawn from previously inaccessible Soviet archives the author first presents a detailed analysis of the developments trends patterns and irregularities of the color systems seen on Russian fighters and offers a fascinating insight into the workings of the Soviet manufacturing system responsible for this task He then brings readers a technical study of each of the main fighter aircraft and variants and each description is followed by coverage of camouflage and markings factory applied field variations and seasonal The text is supported by hundreds of rare and previously unpublished photographs and more than 40 commissioned full color artworks Furthermore hundreds of color illustrations portray the immense variety of patterns related to this fascinating subject This book will be a must have for all students of Soviet air power and Russian aircraft modelers

F4F Wildcat vs A6M Zero-sen Edward M. Young,2013-08-20 The Grumman F4F Wildcat and the Mitsubishi A6M Zero sen were contemporaries although designed to very different requirements The Wildcat ruggedly built to survive the rigors of carrier operations was the best carrier fighter the US Navy had available when the USA entered World War II and it remained the principal fighter for the US Navy and the US Marine Corps until 1942 43 With a speed greater than 300mph exceptional manoeuvrability long range and an impressive armament the slick Zero sen could out perform any Allied fighter in 1941 42 The battles between the Wildcat and the Zero sen during 1942 represent a classic duel in which pilots flying a nominally inferior fighter successfully developed air combat tactics that negated the strengths of their opponent Air Combat ,2019-01-24 This book brings together the best and most iconic fighters of World War II pitted against one another in desperate aerial combat The battle for the skies in World War II fuelled a race between rival air forces to develop ever faster and more capable fighter aircraft and the struggle for air superiority was never over until the war itself ended This volume explores four clashes of some of the finest planes and pilots in key theatres of the war Spitfires duelling the formidable Bf

109 over the Channel the Fw 190 battling the Soviet La 5 and 7 on the Eastern Front the F4F Wildcat in a desperate clash with the legendary A6M Zero and the F4U Corsair in combat with the second generation Japanese Ki 84 in the closing days of the war Fully illustrated with contemporary photographs maps and colour artwork Air Combat conveys the full story behind these dramatic aviation duels Messerschmitt Bf 109 Jan Forsgren ,2017-06-29 The Influence of Air Power Upon History Walter J. Boyne,2003-05-31 A comprehensive balanced overview of war in the air from a world renowned authority on aviation history and New York Times bestselling author Booklist The Influence of Air Power Upon History makes a startlingly new analysis of the far reaching implications flight has had on warfare politics diplomacy technology and mass culture Author Walter Boyne examines the application of air power from the very earliest days of the balloon down to the current era of space warfare and postulates some new and controversial theories that are certain to arouse comment Where Alfred Thayer Mahan s classic work The Influence of Sea Power Upon History catalogues the elements that made naval prowess a determinant of a nation s strength The Influence of Air Power Upon History traces the development of air power philosophy by examining the theory and practice of air power as it is exercised in both war and peace The author unerringly depicts the contributions made by the people and planes of each era some of them famous some virtually unknown but all vitally important He highlights the critical competence of individuals at every step of the way comparing the works of Giulio Douhet William Mitchell John Warden and others philosophically even as he compares the combat capabilities of leaders such as Hugh Trenchard Bomber Harris Herman Goering Curtis LeMay and Henry Hap Arnold Boyne s views on World War II bombings and air power in the Vietnam War will please many readers and perhaps shock many others The Influence of Air Power Upon History is an important book for the public and for the military and is destined to be hotly debated for years to come

Stanley, 2016-11-30 Despite the Luftwaffe being ordered to destroy millions of aerial photos in 1945 the Allies found no less than twenty tons of photos in eleven locations including a hoard in a Bavarian barn These together with vast numbers of photographs taken by German soldiers used for Intelligence analysis were put into classified Allied Intelligence files at a time when USAAF and RAF imagery was being destroyed Covering Iron Curtain countries they were valuable for cartography and target intelligence during the Cold War The captured German imagery called GX in this book show what the German Army knew about the Soviet Union before and during Operation Barbarossa Examples show Eastern Front landforms key cities such as Stalingrad Moscow Sevastopol Leningrad and factories They are accompanied by helpful comments from a skilled photo interpreter This unique and diverse collection some taken from 28 000 feet overhead others taken by soldiers on the ground reveal the war on the Eastern Front as it has never been seen before **P-36 Hawk Aces of World War 2** Lionel

Persyn, Kari Stenman, Andrew Thomas, 2012-12-20 A fascinating account of a plane that served on both sides during World War 2 and in a variety of environments from Pearl Harbor to the deserts of North Africa to the barren forests of Karelia and the jungles of Burma The Curtiss P 36 was considered a revolution in performance design in comparison to other US fighters Yet by the time of the Japanese attack on Pearl Harbor the P 40 was increasingly supplanting the P 36 which the US then exported to France under the guise of the Hawk 75 Flown by the French captured by the Germans sold to the Finns transferred to India and Africa and even incorporated into the RAF the Hawk 75 saw service in every theatre of operations and in a variety of combat environments This book depicts the interesting life of this plane with colour artwork photographs and first hand accounts *Stalin's Falcons* Dmitry Zubov, 2024-05-31 In this stunning expos Dmitry Zubov reveals the dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft on World War II's Eastern Front and the almost slave like conditions in which those aircraft were made The Soviet history of the Second World War written under the conditions of a totalitarian regime reflected all its features with the result that it includes solid sets of patriotic fables that have no connection with reality Many of the events of the war were distorted beyond recognition or even made up from beginning to end Archives containing original documents were available only to selected specially verified KGB historians who presented only the version of the war that was acceptable to the Soviet regime After the collapse of the Soviet Union the process of declassifying archives and gaining wide access to information gradually began to reveal the terrible truth of the crimes of the Soviet regime One of which of course was the incompetent leadership of the Red Army which led to massive

loss of life across the military and civilians alike However the consequences of decades of Soviet propaganda had a strong impact on both Russian and world historical science Because of this not only Russian but unfortunately many European and American historians found themselves repeating the Soviet myths they had been fed The history of Soviet fighter aircraft did not escape this fate The tale of Stalin s so called Falcons who allegedly shot down dozens and even hundreds of Luftwaffe aircraft was persistently drummed into the heads of many generations of Russian people These heroes supposedly flew Soviet fighters whose technical characteristics were many times superior to their German counterparts with the result that Luftwaffe aces were reportedly afraid of meeting them in the air These primitive propaganda clich s became a model for describing the actions of Stalin s fighter aircraft In this stunning expos Stalin s Falcons reveals the stark and dark truth of the terrible losses suffered by Soviet flyers the inferiority of the Russian aircraft and the almost slave like conditions in which those aircraft were made **Air Force Magazine** ,2012-07
