Composing the Party Line David G. Tompkins, 2013-10-15 This book examines the exercise of power in the Stalinist music world as well as the ways in which composers and ordinary people responded to it It presents a comparative inquiry

into the relationship between music and politics in the German Democratic Republic and Poland from the aftermath of World War II through Stalin's death in 1953 concluding with the slow process of de-Stalinization in the mid to late 1950s. The author explores how the Communist parties in both countries expressed their attitudes to music of all kinds and how composers, performers and audiences cooperated with, resisted and negotiated these suggestions and demands. Based on a deep analysis of the archival and contemporary published sources on state party and professional organizations concerned with musical life, Tompkins argues that music as a significant part of cultural production in these countries played a key role in instituting and maintaining the regimes of East Central Europe. As part of the Stalinist project to create and control a new socialist identity at the personal as well as collective level, the ruling parties in East Germany and Poland sought to saturate public space through the production of music. Politically effective ideas and symbols were introduced that furthered their attempts to in the parlance of the day engineer the human soul. Music also helped the Communist parties establish legitimacy. Extensive state support for musical life encouraged musical elites and audiences to accept the dominant position and political missions of these regimes. Party leaders invested considerable resources in the attempt to create an authorized musical language that would secure and maintain hegemony over the cultural and wider social worlds. The responses of composers and audiences ran the gamut from enthusiasm to suspicion but indifference was not an option.

Schoenberg's Twelve-Tone Music Jack Boss, 2014-10-02 Jack Boss presents detailed analyses of Arnold Schoenberg's twelve-tone pieces bringing the composer's musical idea, problem, elaboration, solution to life.

Gérard Grisey and Spectral Music Liam Cagney, 2023-12-14 The first in-depth historical overview of spectral music which is widely regarded alongside minimalism as one of the two most influential compositional movements of the last fifty years. Charting spectral music's development in France from 1972 to 1982, this ground-breaking study establishes how spectral music's innovations combined existing techniques from post-war music with the use of information technology. The first section focuses on Gérard Grisey showing how he creatively developed techniques from Messiaen, Xenakis, Ligeti, Stockhausen and Boulez towards a distinctive style of music based on groups of sounds mutating in time. The second section shows how a wider generation of young composers centred on the Parisian collective *L'itinéraire* developed a common vision of music embracing seismic developments in psychoacoustics and computer sound synthesis. Framed against institutional and political developments in France, spectral music is shown as at once an inventive artistic response to the information age and a continuation of the French colouristic tradition.
