Tourism and Borders Helmut Wachowiak, 2016-02-24 Although globalization has led to increased cross border traffic, there has been little examination of how crossing political boundaries affects tourism and vice versa. Bringing together case studies from Europe, the USA, and Southern Africa, this volume discusses current issues and policies, destination management, and communication and planning in cross border areas. Topics studied include borders as tourist attractions and destinations in their own right, as barriers to travel, and the growth of tourism boundaries as links of transit, and the growth of supranationalism. The book concludes that the role of borders has changed dramatically in recent years. Many more borders that have traditionally hosted large scale tourism are becoming more difficult to cross, primarily because of safety and immigration concerns. On the other hand, places that were once forbidden to foreigners are now opening up, and new destinations are becoming more commonplace.

The Geopolitics of Australia's Regional Relations D. Rumley, 2001-06-30 The origins of this book go back 30 years to the stimulation and interest generated by the political geography seminars led by John House at the University of Newcastle Upon Tyne. I was very fortunate to graduate among its extremely capable, sporty, and enthusiastic class of 68, from where several academic geographers emerged. Equally fortunately, some of them and their predecessors had already blazed a trail to undertake graduate studies in Canada. At the University of British Columbia, I was supervised at different times by Julian Minghi and Victor Prescott, both of whom are not only extremely capable academics but are also very fine people. I owe an enormous debt to John, Julian, and Victor, and to the British and Canadian taxpayers who provided financial support for my University studies. In 1974, I began an academic career at the University of Western Australia, where I have been ever since, save for a two year period from 1991-3 as Professor of Australian Studies in the Department of International Relations at the University of Tokyo. Viewing Australia and the Asia Pacific region from this different perspective within an extremely supportive Japanese environment had a profound impact. I am especially grateful for the support provided by so many Japanese academic colleagues and friends, beginning as early as 1976. Three individuals deserve special mention for their help, guidance, and enduring friendship: George Ohshima, Hiroshi Tanabe, and Akihiro Kinda.

Politics Virginie Mamadouh, 2017-05-15 Depending on the breadth or narrowness of the understanding of politics and the political, politics in human geography is defined as either the operation of power in all social relations or the workings of

power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale social movements and electoral participation and identities and citizenship **Ethnic Frontiers and Peripheries** Oren

Yiftachel,2019-03-12 The idea for editing this book originated during an international conference titled Regional Development The Challenge of the Frontier held in December 1993 at the Dead Sea and which was organized by the Negev Center for Regional Development at Ben Gurion University of the Negev In this conference we noticed that little has been said about the impact of Israel s complex mosaic of ethnic groups on the shaping of the country s social and spatial frontiers We have therefore endeavored to bring together a number of perspectives on the evolution of ethnic frontiers in Israel and the role they play in shaping the cultural landscape of this country Yet we later realized that frontier is too limited a term and that it may through various processes have turned into a mosaic of spatial social economic and political peripheries More specifically we attempted to present the process of frontier development as perceived by Israel s ethnic and national minorities We therefore invited contributions from various other Israeli experts on these issues geographers sociologists anthropologists and political scientists which have now become the main body of chapters in this book We trust that they are representative of the main dimensions of the subject **Tourism Collaboration and Partnerships** Bill Bramwell,Bernard

Lane,2000-05-02 This book explores the concept techniques and implications of establishing stakeholder collaboration in sustainable tourism The importance of involving a wide range of stakeholders in tourism planning and management is increasingly recognised This reflects a move to less top down more decentralised and more inclusive forms of governance in tourism and in other policy fields Twenty two leading researchers and practitioners from around the world contribute their views and expertise to this pioneering volume Case studies examining key issues are drawn from Europe North and South America Australia and the Arctic Section 1 examines the processes patterns and typologies involved Specific concerns addressed include stakeholder interaction and negotiation boundary issues in regional and international partnerships and stages of collaborative development Section 2 evaluates the effects of politics and power on the practice of collaboration Specific topics here include the changing roles of the state in tourism governance regime theory and tourism the public sector and partnership development and partnerships in a post socialist context Section 3 looks at emerging thinking and approaches sums up key issues affecting collaborative tourism planning and suggests future research directions The book will be invaluable for final year undergraduate tourism students for postgraduate students in tourism environmental studies or planning and of interest to tourism planners managers and consultants **Geopolitics of European Union**

Planning for Coexistence? Libby Porter, Janice Barry, 2016-06-10

Planning is becoming one of the key battlegrounds for Indigenous people to negotiate meaningful articulation of their sovereign territorial and political rights reigniting the essential tension that lies at the heart of Indigenous settler relations But what actually happens in the planning contact zone when Indigenous demands for recognition of coexisting political authority over territory intersect with environmental and urban land use planning systems in settler colonial states This book answers that question through a critical examination of planning contact zones in two settler colonial states Victoria Australia and British Columbia Canada Comparing the experiences of four Indigenous communities who are challenging and renegotiating land use planning in these places the book breaks new ground in our understanding of contemporary Indigenous land justice politics It is the first study to grapple with what it means for planning to engage with Indigenous peoples in major cities and the first of its kind to compare the underlying conditions that produce very different outcomes in urban and non urban planning contexts In doing so the book exposes the costs and limits of the liberal mode of recognition as it comes to be articulated through planning challenging the received wisdom that participation and consultation can solve conflicts of sovereignty This book lays the theoretical methodological and practical groundwork for imagining what planning for coexistence might look like a relational decolonizing planning praxis where self determining Indigenous peoples invite settler colonial states to their planning table on their terms

Saussure's Third Course of Lectures on General Linguistics (1910-1911) R. Harris, E. Komatsu, 2014-05-23

The notes taken by Saussure's student Emile Constantin were not available to the editors of the published *Cours de linguistique générale* 1916 and came to light only after the second world war They have never been published in their entirety The third and last course of lectures of which Constantin kept this very full record is generally considered to represent a more advanced version of Saussure's teaching than the earlier two It is clear that Constantin's notebooks offer a text which differs in a number of significant respects from the *Cours* published by Saussure's original editors and bring forward ideas which do not emerge in the 1916 publication They constitute unique evidence concerning the final stages of Saussure's thinking about language This edition of the notes is accompanied by an introduction and a full English translation of the text There has been no attempt made by Komatsu and Harris to turn the English into readable prose Constantin's notes even as revised by their author retain the infelicities repetitions abruptness occasionally incoherences that betray the circumstances of their origin The volume constitutes an important landmark in the history of

modern linguistics and provides essential documentation for all scholars and libraries specializing in the subject

Ecocriticism and Geocriticism Robert T. Tally Jr., Christine M. Battista, Saville, 2016-04-29 Although treated as two distinct schools of thought ecocriticism and geocriticism have both placed emphasis on the lived environment whether through social or natural spaces For the first time this interdisciplinary collection of essays addresses the complementary and contested aspects of these approaches to literature culture and society
