Global Geopolitical Power and African Political and

Economic Institutions John James Quinn, 2015-12-30 Global Geopolitical Power and African Political and Economic Institutions When Elephants Fight describes the emergence and nature of the prevailing African political and economic institutions in two periods In the first most countries adopted political and economic institutions that funneled significant levels of political and economic power to the political elites usually through one or no party military political systems inward oriented development policies and or state led and often state owned industrialization In the second period most countries adopted institutions that diluted the overarching political and economic power of ruling elites through the adoption of de jure multiparty electoral systems more outward oriented trade policies and the privatization of many state owned or controlled sectors though significant political and economic power remains in their hands The choices made in each period were consistent with prevailing ideas on governance and development the self interests of political elites and the perceived availability of support or autonomy vis vis domestic regional and international sources of power at the time This book illustrates how these two region wide shifts in prevailing political and economic institutions and practices of Africa can be linked to two prior global geopolitical realignments the end of WWII with the ensuing American and Soviet led bipolar system and the end of the Cold War with American primacy Each period featured changed or newly empowered international and regional leaders with competing national priorities within new intellectual and geopolitical climates altering the opportunities and constraints for African leaders in instituting or maintaining particular political and economic institutions or practices The economic and political institutions of Africa that emerged did so as a result of a complex mix of contending domestic regional and international forces material and intellectual all which were themselves greatly transformed in the wake of these two global geopolitical realignments *Democracy and Political Change in the Third World* Jeff

Haynes, 2003-09-02 This book examines the experience of democracy in developing countries such as Mexico Zambia India and Indonesia The book will be of interest to scholars of Comparative Politics Third World Politics and Development studies

Democracy and Development Axel Hadenius, 1992-09-17 This book is a thorough investigation into the requisites of democracy Based on data from all 132 sovereign states of the Third World it first establishes a scale to measure the level of democracy existing in these countries The author discusses various interpretations of the meaning of political democracy and emerges with a specification of its essential principles which includes such elements as the holding of elections to central decision making organs and the maintenance of certain fundamental political liberties Theories concerning the requisites of democratic government are then examined in order to explain the manifest differences in the level of democracy among the states of the Third World The author employs statistical techniques including regression analysis to test theories related to socio economic conditions demographic and cultural factors and institutional arrangements This book thus provides a uniquely wide ranging examination both of the elements which constitute democracy and of the factors which explain its varying prevalence Fragile but Resilient? Ali Carkoglu, Ersin Kalaycioglu, 2021-04-06 Ersin Kalaycioglu and Ali Arko lu who

conducted surveys comparable to the American National Election Survey for the 2002 and 2015 national elections in Turkey chart the dynamics that brought the pro Islamist conservative Justice and Development Party Adalet ve Kalkınma Partisi AKP to power in 2002 and that continue to influence electoral politics The authors trace the uneven course of democratization in Turkey as revealed through elections since the first competitive multi party elections in 1950 Since the market liberalization reforms of 1980 Turkey has been rapidly evolving from a closed agricultural comparatively underdeveloped polity into an open and industrial state primarily integrated with the global economy Kalaycıoğlu and Arkoğlu analyze different dimensions of five elections surveys in 2002 2015 period to show how the consequent socio economic changes and traditional socio cultural divisions have affected elections political parties and individual voters The authors conclude that the historical cultural divide between rural peripheral conservative groups and more urban centrist and modernized groups not only persists but shapes elections more than ever This book not only provides an original comprehensive and critical evaluation of the Turkish electoral and party politics it also offers a case study of voting behavior in a state undergoing both democratization and market liberalization in a rapidly changing and volatile international environment

Democracy and Development R.C. Bhardwaj, K. Vijayakrishnan, 2018-10-26 Published in 1998 The question of whether democracy and development are allies or adversaries has long been debated and with the triumph of the democratic spirit worldwide the relationship between democracy and development has once again come to attract much attention globally The collapse of the Soviet Union and the developments in Eastern Europe led to considerable rethinking in political circles on the efficacy of the economic policies pursued in those countries and the long term viability of political systems prevalent there Elsewhere several newly industrialized countries are striving to consolidate their gains though there are differing perceptions of whether their politics conform to the classical framework of democracy or not In a remarkable turn around some other countries have initiated measures for economic reforms and structural adjustment setting aside their earlier approaches towards economic management In short the last decades of this millennium have witnessed meaningful efforts worldwide on forging a new partnership between democracy and development In February 1996 the Commonwealth Parliamentary Association jointly organized a conference entitled Parliamentary Democracy and Development Allies or Adversaries with the Wilton Park an international agency of the British Commonwealth and Foreign Office in Wilton House West Sussex United Kingdom The week long conference brought together parliamentarians diplomats administrators political scientists economists and specialists from all over the world The participants shared their views and experiences on diverse aspects of the main theme This publication presents an essentially parliamentary perspective on the correlation between democracy and development based on the discussions at the Wilton Park conference and in the light of current thinking on the subject matter

The Politics of Economic Liberalization in Indonesia Andrew Rosser, 2013-07-04 This book examines the dynamics shaping the economic process of economic liberalisation in Indonesia since the mid 1980s Much writing on the

process of economic liberalisation in developing countries views economic liberalisation as the victory of economic rationality over political and social interests In contrast this book argues that economic liberalisation should not be understood in these terms but rather in the way that political social interests shape processes of economic reform in both a positive and negative sense Specifically Rosser argues that economic liberalisation needs to be understood in terms of the extent to which economic crises shift the balance of power and influence within society away from coalitions opposed to reform and towards those in favour of reform In the Indonesian context the main coalitions that need to be examined in this respect are the politico bureaucrats and the conglomerates who have generally opposed reform and mobile capitalists who have generally supported reform Based on extensive original research and providing much new material the book considers the politics of economic policy making in Indonesia in a range of sectors including the capital market intellectual property law the banking industry and the trade and investment sectors Analysing why the nature of economic policy in Indonesia has varied over time this study argues that there is nothing inevitable about a transition to a fully fledged liberal market order in Indonesia and outlines possible future scenarios for the country s political economy

the scope and pace of democratic reforms socially more patriotic toward the motherland and more prone to media self censorship and judicially more vulnerable to the interpretation of the Basic Law by the National People's Congress This book aims to achieve a breakthrough in relating the development of Hong Kong politics to the future of mainland China and Taiwan By broadening the focus of the one country two systems from governance to the process of Sino British negotiations and their thrust building efforts this book argues that the diplomats from mainland China and Taiwan can learn from the ways in which Hong Kong's political future was settled in 1982 1984 This is a book for students researchers scholars diplomats and lay people
