Teichman, 2010-11-23 Since 1983 Mexico has undergone a rapid and thorough economic restructuring program with privatization at the core The government has divested itself of hundreds of public companies increasing the role of private capital both domestic and foreign Supporters have argued that divestiture would have positive implications for Mexican democracy but Judith A Teichman concludes that political and economic power in Mexico is more concentrated and exclusionary than ever She uses extensive field research including interviews with top political and business leaders to describe and analyze the process by which the Mexican state has reformed its mammoth public enterprise sector

Managing Political Change Irene L. Gendzier, 2019-03-04 For nearly three decades policymakers and students have been concerned with Third World societies in transition Conventional interpretations of political change formalized in studies of political development have dominated approaches to analyzing such changes Yet argues the author these interpretations have been justly criticized as bankrupt and irrelevant to Third World realities Why are they reproduced How can one explain the belief that these approaches remain viable These are some of the questions addressed in this wideranging review of the literature of political development and the paradigms that have guided analysis of political change over the past thirty years Examining how political development theories are rooted in U S foreign policy domestic political trends and changes in postwar political science Dr Gendzier grounds the traditional approach to political development in recent history and politics Her analysis raises questions about how development doctrine is related to foreign policy as well as noting development theory s debt to cold war ideology and revisionist theories of liberal democracy Dr Gendzier s interpretation sheds light on the reasons for the current theoretical bias that favors approaching politics in terms of psychology and culture an approach that she states has had devastating effects on our understanding of politics

Political Conflict and Development in East Asia and Latin America Richard Boyd, Galjart Benno, Tak-Wing Ngo, 2007-01-24 Long run processes of socio economic change generate prodigious problems of social conflict and social

control and governments responsible for these processes must therefore manage the resultant conflict. Consequently the success or failure of a government's management of such conflicts is a crucial factor in development outcomes. This volume investigates the political struggle for development specifically in two vital regions: East Asia and Latin America. This analysis calls into question the dominant emphasis on institutional and cultural bases for stable growth. A careful historical account of the two regions is presented which permits the rigorous testing of conventional wisdoms regarding development. Of importance to a broad range of academics in the spheres of development studies, politics, political economy and sociology, this book will also make an interesting read for those with a general interest in these areas.

A Comparative Political Economy of Industrial Capitalism R. Mascarenhas, 2002-10-04. This comparative study of industrial capitalism is an examination of state economy relations in mixed economies ranging from the interventionist German and Japanese to the less interventionist Anglo American. Following the postwar consensus that resulted in the golden age 1950-1973 and ended with the energy crisis, the Anglo American economies adopted neoliberalism while Germany and Japan remained interventionist. This resulted in the emergence of national types of capitalism. While analyzing the increased competition between them, R. C. Mascarenhas also notes the influence of globalization as well as alternative capitalism with the survival and re-emergence of industrial districts.

Industrial Policy, Technology, and International Bargaining Etel Solingen, 1996. This book suggests an innovative approach to understanding the sources of industrial policy and technological development. The conceptual sections address long-standing debates over the nature of the state and ruling coalitions, the political power of private actors, the process of international bargaining and the determinants of technological change in the industrializing world. The empirical study constitutes the first book-length comparison of the Argentine and Brazilian nuclear programs using a multidisciplinary approach that ranges from the broad macropolitical to the most specific microeconomic. Finally, the book provides a perspective on the nuclear sector in industrializing states that the more typical concentration on strategic aspects has obscured.
