Political Communication in Africa Bruce Mutsaers, Beschara Karam, 2018-02-27 This edited collection is a cutting edge volume that reframes political communication from an African perspective. Focusing on sub-Saharan Africa and occasionally drawing comparisons with other regions of the world, this book critically addresses the development of the field, focusing on the current opportunities and challenges within the African context. By using a wide variety of case studies that include Mozambique, Zambia, Rwanda, Zimbabwe, Ghana, Kenya, Uganda, South Africa, Ivory Coast and Nigeria, the collection gives space to previously understudied regions of sub-Saharan Africa and challenges the over-reliance of western scholarship on political communication on the continent. Global Political Marketing Jennifer Lees-Marshment, Chris Rudd, Jesper

Stromback, 2009-10-16 There is increasing awareness of growing similarities in political marketing practices around the world. *Global Political Marketing* is a comprehensive analysis of why, how and with what affect parties use political marketing in a range of political systems: presidential, parliamentary, two and multi party and established and emerging democracies. Written by a team of 25 international expert authors, the volume explores the impact of systemic features such as the party and electoral system, analysing how parties use marketing through 14 detailed country studies. The book explores the notion that political marketing is used by parties to both sell and design political products; it is by no means confined to the opposition and that many opinions besides those of the voters are considered in product design, including ideological anchors, expert opinion and party members' input. The authors also explore how other factors impact on political marketing effectiveness, such as the ability of governments to communicate, delivery, staying in touch, the role of the media and party unity and culture. Finally, the work discusses the democratic implications of market-oriented parties, highlighting the need for debate about the relationship between citizens and governments and the prospects for democracy in the 21st century. Including a practitioner perspective as well as rigorous academic analysis, this collection provides the first global comprehensive overview of how political parties market themselves; it will be of great interest to all scholars of political marketing, parties and elections and comparative politics. Media, Politics and Democracy John Street, 2021-05-14 The third edition of *Media Politics and Democracy* examines the fraught debate over media influence: who wields it and what effect social and traditional media has on what we think, how we behave and how we vote. Eric Louw, 2005-05-20 The Media and Political Process examines the increasingly topical subject of the political process and assesses The nature of the relationship between mass media and the political process The impact of media ization on existing political frameworks The implications of media ized politics Eric Louw uses a number of case studies including political celebrity war and terrorism to provide a media studies perspective on how media workers journalists public affairs officers spin doctors impact upon the political process The book also considers the media s role in promoting a range of twentieth century ideologies and emerging dominant discourses *British Elections & Parties Review* Lyn Bennie, David Denver, Lisa Harrison, Jon Tonge, 2023-05-09 This volume contains contributions from some of the leading names in British politics covering several aspects of electoral politics **British Elections and Parties Review** David Denver, Lyn Bennie, Lisa Harrison, Jon Tonge, 2001-09-14 Containing contributions from leading names in British politics this review continues to publish front rank research on parties elections and voting behaviour in Britain **Size and Local Democracy** Bas Denter, Michael Goldsmith, Andreas Ladner, Poul Erik Mouritzen, Lawrence E. Rose, 2014-09-26 How large should local governments be and what are the implications of changing the scale of local governments for the quality of local democracy These questions have stood at the centre of debates among scholars and public sector reformers alike from **Party System in India** Ajay K Mehra, India s party system has been under flux transformation and reconfiguration since the end of the 1980s By the time the sun set on the twentieth century the party system in India had developed a plurality of national and regional levels and following several experiences in fits and starts coalition making among the parties too stabilized at the national level The dawn of twenty first century thus witnessed a federalized party system in place where coalition making and cohabitation amongst the parties stabilized at both national and regional levels As a result since 1999 India has had two completing governments completing their full term at the national level the third UPA II has completed four years and despite hiccups is likely to complete its full term till mid 2013 However the party system in the country has turned competitive and several trajectories of alternation are being attempted by parties and leaders making the emerging political situation fluid The volume attempts to capture the emerging trajectories of the party system in India in the second decade of the twenty first century with seventeen essays

written specially for this volume by scholars who met several times to discuss and formulate questions and critique each other's drafts. Overall, the volume provides an incisive and comprehensive analysis of the far-reaching changes that India's political parties and party system are undergoing. It looks into the institutional dimensions, processes, and agenda, federal manifestations, transitions, including generational change and extraneous influences brought in by globalization, Indian Diaspora, and the impact of new media technology. Constituting an important contribution to the on-going debate on the Indian party system, this volume will attract the attention of students of Indian politics, political science, democracy, party systems, and comparative politics.

Global Electioneering Gerald Sussman, 2005. *Global Electioneering* explores American style political consulting and its spread to countries throughout the world, emphasizing the roles of communication and technology. Gerald Sussman challenges the common belief that American influence abroad is due strictly to the professionalization of politics and asserts that it is instead affected by economics, industry, and the organizational power of new communication technology.

Voters or Consumers Darren Lilleker, Richard Scullion, 2009-05-05. This edited collection seeks to map current thinking and practice in order to assess the extent to which the consumer, as opposed to the voter, should now be elevated to a central position within our understanding of the relationship between the public and political spheres. The volume will firstly offer an overview of how consumerism has been applied to our understanding of political and voter behaviour, so outlining the book's key concepts. The volume then follows a processual approach to developing its analysis, offering essays that explore contrasting critical perspectives on the topic. The group of essays focus on conceptualising political consumerism; the next look at how political organisations use the tools of positioning and branding; so developing an overview of consumer-driven political behaviour. The focus then moves to the nature of political communication, both by parties and the media, and how this reflects the neo-liberal ontological perspective that encourages voting to be treated as part of consumer behaviour. Finally, the book turns to the voter-consumer, looking firstly at the processing of messages and how this can be analysed from a consumerist perspective, and finally on voting behaviour itself, exploring the extent to which rational choice and economic models of voting have been increasingly a reflection of a consumerist perspective. Each chapter will approach the subject from a discrete perspective, which will be outlined within its introduction. However, the chapters will each explore the following: Whether parties or voters are approaching one another using consumerist perspectives; How this can be mapped empirically through specific examples or case studies; The extent to which consumer behaviour models and perspectives help us understand voter or party behaviour.
