Political Correctness in Academia Sandra Dzenis, 2025-03-22 This book explores the phenomenon of political correctness in academia and explains why and how scholars and administrators impact PC's prominence in the academic sphere To do so it examines the actions of these agents through the lens of public choice theory revealing how self interested strategies drive the policies and norms of the university The book examines the ideological dimensions of political correctness and highlights four key spheres of influence academic research higher education curricula affirmative action and speech codes The book offers a nuanced exploration of how PC and liberalism have common ground It demonstrates how the liberal values of equality and individual liberty largely underpin PC whose regulatory function is to protect a liberal value system from illiberal truth claims Yet the book also shows how interest groups form around the concept of PC in universities and have successfully used systems of rent seeking and collective action to shape institutional policy and protect their members from ideological and professional competition which can be seen as a violation of classical liberal principles of fair competition and equal opportunity This book is a valuable tool for researchers working in political economy and PPE politics philosophy and economics as well as those interested in the political economy of academia and the concept of PC more generally

Anti PC-Strategies. How Actors of the Political Right Use the Concept of Political Correctness to Maintain Power and Influence the American Public Jessica Ulrich, 2023-04-21 Examination Thesis from the year 2020 in the subject American Studies Culture and Applied Geography grade 1.0 University of Würzburg language English abstract This paper first examines and looks into the definitions development and sources of political correctness as a cultural concept which has significantly been coined in a certain direction since its first occurrence Beforehand as a framework and to put it into a sociological relevant perspective Pierre Bourdieu Bruno Latour and their findings about the connection of language society and their mutual influence will be discussed Furthermore putting theory into practice three speeches of three different politicians representing anti PC strategies via three different sorts of media will be analysed

Moreover respective repercussions in society will be outlined and associated with results of the analysis Political Correctness belongs in the dustbin of history Alice Weidel faction leader of the far right populist German party AFD enthusiastically demanded on the nationwide party's conference in 2017 This statement made her and her party's position regarding political correctness perfectly clear When it comes to the emotional debate about being pro or anti political correctness it seems to be that the far right parties across Europe and many conservative politicians in the United States have similar attitudes to this topic The urgency of exploring and revealing strategies which connect PC and far right propaganda and thereby coin a dangerous cultural narrative can be observed for instance in Germany in respect of the predominantly anti muslim blog Politically Incorrect News PI news which is under surveillance of the Bavarian constitution protection and counts 10 000 daily visitors in 2017 The blog's operators describe their site as against mainstream pro American and pro Israeli and in a constant battle for the German constitution against the ideology of multiculturalism Now the United States of America have been functioning and still work in many diverse realms of cultural and respective political changes as a blueprint and virtually as a forecast for developments in Europe This has been and still is the case with political correctness as a phenomena which seems to be a connecting piece of society and politics Consequently examining and understanding PC and anti PC as a presumed strategy of politicians of the right means tracing it back to its origins in the U S Eventually analysing its effects and consequences can possibly provide an idea how to counteract the difficulties which it also causes in Europe

Let's talk politics Hilde Van Belle, Kris Rutten, Paul Gillaerts, Dorien Van De Mierop, Baldwin Van Gorp, 2014-04-15 In this volume on political argumentation the study of argument takes place within a rhetorical framework As such it is a contribution to the study of argumentation in context with an explicit rhetorical approach Rather than focusing on the poor quality of political participation and political understanding by citizens this volume explores how the study of rhetoric both as an academic discipline and as a political practice stands in a unique position to critically engage with a contextualized understanding of politics and civic engagement Many contributions in this volume confront classical rhetorical concepts and theories with current political developments such as globalization and multiculturalism and the emergence of new democracies Others focus explicitly on deliberative rhetoric in the political realm or undertake a critical analysis of political texts and public events in order to explore what this can imply for the development of a critical citizenship
