Safarian,2009-11-13 Since the collapse of the global financial markets in 2008 economists and commentators have looked back to the Great Depression of the 1930s to discover similarities and solutions for recovery Contributing to this crucial moment renowned economist A E Safarian has added a new preface to his classic study of the Great Depression discussing the present crisis and suggesting ways in which future crises might be avoided Essential reading for economists historians and politicians The Canadian Economy in the Great Depression is the definitive study of the country's worst period of economic failure covering the period from the stock market's rise in the roaring 1920s through the Great Crash to the destitution of the 1930s and the eventual economic recovery Countless students journalists and political leaders including current US Federal Reserve Chairman Ben S Bernanke have used it to better comprehend the complicated nature and history of the markets With remarkable clarity Safarian untangles the web of relations that led to and sustained the Great Depression while also examining the economic controls and stimuli put in place during the Depression and how and why these measures failed This new edition introduces The Canadian Economy in the Great Depression to a new generation particularly those concerned about the possibility of another Great Depression **Forming Economic Policy** Fen Osler Hampson,2013 How do governments make key decisions on vital economic questions of national importance Can they advance the national interest on issues that are highly politicized How do they respond to competing pressures from the international and domestic environments Forming Economic Policy explores these and other questions in Canada and Mexico two very different countries which share a common vulnerability to the world economy Using the case of energy the book argues that policymakers will address the

national interest but only episodically with the onset of major national crises that invoke a higher and sustained sense of national priorities. These crises are frequently induced by the interaction of domestic and foreign political and economic forces. The conclusions are surprising. Despite profound political and economic differences between these two countries, policymakers have behaved in remarkably similar ways when arriving at key policy decisions. The explanation, which integrates two competing views of politics, the pluralist and the statist, has important implications with regard to the political processes in those states which like Canada and Mexico are exposed to the world economy and face problems of political legitimacy at home. *Forming Economic Policy* will appeal to students and teachers of political economy and comparative politics as well as to those interested in the politics of energy policy.
