Political Economy Of International Financial Crisis Interest Groups Ideologies And Institutions:

The Political Economy of International Financial Crisis Shale Asher Horowitz, Uk Heo, 2001 The world financial crisis of 1997-99 was the most important international economic event since the oil shocks of the 1970s and the associated debt crisis of the 1980s What were its political causes and consequences In particular how did interest group coalitions and political institutions affect pre crisis economic policies and post crisis responses This book focuses on how policymaking coalitions are formed and how political institutions mediate the pressure of rival coalitions This approach is applied to 13 countries drawn from the main crisis affected regions of the world economy East Asia Southeast Asia Latin America and Eastern Europe [The Political Economy of International Financial Crisis : Interest Groups, Ideologies, and Institutions](#)

Shale Horowitz, 2001 **Handbook of the International Political Economy of Monetary Relations** Thomas Oatley, W. Kindred Winecoff, 2014-06-27 This extensive Handbook provides an in depth exploration of the political economy dynamics associated with the international monetary and financial systems Leading experts offer a fresh take on research into the interaction between system structure t

International Monetary Power David M. Andrews, 2006 This book provides a thorough overview of how money is used as a tool to achieve international political aims *The Political Economy of Developmental States in East Asia* Tian He, 2020-11-13 This book explores the variations in the transformation of the Asian developmental state in South Korea Singapore and Taiwan Based on an original theory the author argues that these variations are influenced by two factors industrial structure and democratic transition both of which are shaped by the strategic calculations of the ruling elites to maintain power The theory concerns two concurrent political processes during the state's development process namely the emergence of economic interest groups with varying levels of policy constraints on the state and the process of democratic transition driven by the rise of the middle class The book will appeal to students and researchers in the fields of Asian politics development studies political economy and comparative politics **The**

Political Economy of Integration Jeffrey W. Cason, 2010-10-04 This book assesses South America's most ambitious attempt at economic integration Mercosur It explains the main and inherent weaknesses of the integration effort through explicit comparison with the European experience with integration Jeffrey Cason argues that the three main reasons for Mercosur's limited success are weak domestic political institutions in the member countries vulnerability in the global political economy and a serious imbalance in the economic and political weight of the member countries In addition to providing this overarching explanation for Mercosur's limitations the book tells the story of Mercosur's genesis development and frustrations This book provides both an explanatory framework for understanding Mercosur and a story It considers how Mercosur emerged why it was greeted with great enthusiasm and huge trade growth and how it hit stumbling blocks as it sought to be more than it was capable of being The book also focuses on how and why developing countries are inherently limited in any economic integration project [Regulatory Cycles: Revisiting the Political Economy of Financial Crises](#) Jihad

Dagher,2018-01-15 Financial crises are traditionally analyzed as purely economic phenomena The political economy of financial booms and busts remains both under emphasized and limited to isolated episodes This paper examines the political economy of financial policy during ten of the most infamous financial booms and busts since the 18th century and presents consistent evidence of pro cyclical regulatory policies by governments Financial booms and risk taking during these episodes were often amplified by political regulatory stimuli credit subsidies and an increasing light touch approach to financial supervision The regulatory backlash that ensues from financial crises can only be understood in the context of the deep political ramifications of these crises Post crisis regulations do not always survive the following boom The interplay between politics and financial policy over these cycles deserves further attention History suggests that politics can be the undoing of macro prudential regulations

Developmental States Linda Low,2004 As the Asian crisis triggered or precipitated the meltdown a second objective is to explore the reasons and factors for the breakdown or redundancy of developmental states distinguishing between domestic transformative capacity and external global factors as identified A third objective is to cull experiences and lessons beyond East Asia With many transition economies in Central and Eastern Europe beside China and Indochinese states the theory and practice of developmental states may be a useful bridge These are by no means exhaustive and comprehensive aims questions and issues For individual developmental states covered in this volume country specific lessons may also be drawn for them to be reconfigured to stay relevant The most important consideration for this volume is to value add to the literature both the theory and principles of the Asian developmental state as well as empirical observations observed elsewhere This volume comprises 13 chapters in two parts

Economic Crises and the Breakdown of Authoritarian Regimes Thomas B. Pepinsky,2009-08-17 Why do some authoritarian regimes topple during financial crises while others steer through financial crises relatively unscathed In this book Thomas B Pepinsky uses the experiences of Indonesia and Malaysia and the analytical tools of open economy macroeconomics to answer this question Focusing on the economic interests of authoritarian regimes supporters Pepinsky shows that differences in cross border asset specificity produce dramatically different outcomes in regimes facing financial crises When asset specificity divides supporters as in Indonesia they desire mutually incompatible adjustment policies yielding incoherent adjustment policy followed by regime collapse When coalitions are not divided by asset specificity as in Malaysia regimes adopt radical adjustment measures that enable them to survive financial crises Combining rich qualitative evidence from Southeast Asia with cross national time series data and comparative case studies of Latin American autocracies Pepinsky reveals the power of coalitions and capital mobility to explain how financial crises produce regime change

Financial Underpinnings of Europe's Financial Crisis Nina Eichacker,2017-10-27 This book analyzes how financial liberalization affected the development of the financial crisis in Europe with particular attention given to the ways in which power asymmetries within Western Europe facilitated financial liberalization and distributed the costs and gains from it The author combines

institutional narrative analysis with empirical surveys and econometrics as well as country level studies of financial liberalization and its consequences before and after the 2008 Global Financial Crisis *Civil Society and Corruption* Michael Johnston, 2005 Strong civil societies play a major role in controlling corruption in many societies and reformers agree that citizens both individual and organized should be involved in reform But accomplishing that goal has proven difficult Some civil societies are weak divided and impoverished In others undemocratic regimes dominate through intimidation And in still others development difficulties international debt and misguided aid efforts stop reform before it can begin Too often anti corruption campaigns do not engage social values or attack corruption as people experience it every day This volume based on a yearlong series of events sponsored by Colgate University's Center for Ethics and World Societies analyzes civil society and corruption from several perspectives and in several parts of the world One section considers corruption as a fact of everyday life a second analyzes techniques and incentives involved in mobilizing civil society and a third provides a unique guide to information resources on corruption and reform *The Far East and Australasia 2003* Europa Publications, 2002 A unique survey of each country in the region It includes an extensive collection of facts statistics analysis and directory information in one accessible volume *The Globalization of World Politics* John Baylis, Steve Smith, Patricia Owens, 2011 Now in its fifth edition this title has been fully revised and updated in the light of recent developments in world politics with new chapters on the changing nature of war human security and international ethics **The Palgrave Encyclopedia of Imperialism and Anti-Imperialism** Immanuel Ness, Zak Cope, 2016-04-29 The Palgrave Encyclopedia Imperialism and Anti Imperialism objectively presents the prominent themes epochal events theoretical explanations and historical accounts of imperialism from 1776 to the present It is the most historically and academically comprehensive examination of the subject to date *Democratization in Taiwan* Philip Paolino, 2016-12-05 Taiwan faces many of the same challenges as most newly democratized nations such as the legacy of an authoritarian government a traditional culture ethnic division and non majoritarian political institutions Each chapter in this volume sheds light on the democratization process The contributors examine questions concerning the state of political trust ethnicity democratic values and political institutions In the post Cold War era when America's foreign policy is focusing on how best to foster democratic transition throughout the world the lessons that can be learned from Taiwan's democratization impart valuable lessons to students and scholars *The Uses of Institutions: The U.S., Japan, and Governance in East Asia* G. Ikenberry, T. Inoguchi, 2007-02-19 This book explores the ways that institutions play a role or fail to in Japanese and American approaches to regional governance in East Asia It uses recent studies on the logic and dynamics of institutions to determine the logic of order within the East Asia region The central focus is on bilateral and multilateral regional institutions *Economic Development in China, India and East Asia* Kartik Chandra Roy, Hans-Christer Blomqvist, Cal Clark, 2012-01-01 This is an unusually rich and comprehensive comparative analysis of industrialisation and development in Asia Drawing on the diverse experiences of Malaysia Singapore China India and more

Roy Blomqvist and Clark skilfully tease out the common institutional threads and the subtle differences in their developmental trajectories. An essential reading for all those interested in the lessons from Asian development. Jude Howell, London School of Economics, UK. This is a thorough and comprehensive study both in terms of country coverage and in depth analysis covering the economic development of all the major economies in the Asian continent namely China, India, Japan, South Korea, Taiwan, Malaysia, and Singapore. Before embarking on analyses of different aspects of economic growth and development of these countries, the authors present a thought-provoking analysis of how institutional factors such as geography, history of religion, culture, and political governance have been deeply interwoven with development dynamics to shape the growth and development trajectory that each country has subsequently followed. Each country's development path consequently appeared almost to be pre-determined. Japan's role as the lead country in technology transfer under the flying geese pattern of development is discussed; however, the emphasis has shifted of late to China, India, Korea, Malaysia, and Singapore. The authors also propose that instead of discussing the failure of India to catch up with China in growth and development outcomes, economists should be commenting on whether China, bestowed with India's highly decentralized democratic governance structure and institutional rigidities, would have been able to achieve the same results as that of India. Only then will a true understanding and appreciation of India's achievements in economic growth and development emerge. Economic Development in China, India, and East Asia will be warmly welcomed and appreciated by academics and researchers of international and development economics as well as Asian development and economics. Policy makers and those involved in NGOs in the development and aid arenas will also find this of great interest. *The Political Economy of South Korea*, Uk Heo, 2008. [Taiwan's Politics In The 21st Century: Changes And Challenges](#) Wei-chin Lee, 2010-07-22. This unique volume highlights Taiwan's ongoing efforts to mediate between competing political actors as a means to ensure domestic stability and national security without severely affecting its continuous economic growth and sovereign status in international society. Taiwan's Politics in the 21st Century concentrates on three general areas: domestic politics, political economy, and external relations. Written by prominent scholars in the field including John Hsieh, Shelley Rigger, Cal Clark, Alex Tan, Joseph Wong, T Y Wang, Quansheng Zhao, Guoli Liu, and Chyungly Lee. It also provides an overview of Taiwan's process of democratic consolidation, unravels dynamic interactions among various domestic and international actors in policy design and implementation, and explores future challenges to Taiwan, thus leaving readers with a better understanding of the political complexity of Taiwan's attempts to strengthen its democratic governance and institutions. **Making Global Economic Governance Effective**, Marina Larionova, 2016-06-03. Today's world is crowded with international laws and institutions that govern the global economy. This post-World War II accumulation of hard multilateral and soft plurilateral institutions by no means constitutes a comprehensive, coherent, and effective system of global economic governance. As intensifying globalization thrusts many longstanding domestic issues onto the international stage, there is a growing need to create at the

global level the more comprehensive coherent and effective governance system that citizens have long taken for granted at home This book offers the first comprehensive look at this critical question of international relations It examines how and how well the multilateral organizations and the G8 are dealing with the central challenges facing the contemporary international community how they have worked well and poorly together and how they can work together more effectively to provide badly needed public goods It is an ideal reference guide for anyone interested in institutions of global governance
