*The Transformation of Citizenship, Volume 1* Juergen Mackert, Bryan S. Turner, 2017-03-16 The Transformation of Citizenship addresses the basic question of how we can make sense of citizenship in the twenty first century These volumes make a strong plea for a reorientation of the sociology of citizenship and address serious threats of an ongoing erosion of citizenship rights Arguing from different scientific perspectives rather than offering new conceptions of citizenship as supposedly more adequate models of rights membership and belonging they deal with both the ways citizenship is transformed and the ways it operates in the face of fundamentally transformed conditions This volume Political Economy discusses manifold consequences of a decades long enforcement of neo liberalism for the rights of citizens As neo liberalism not only means a new form of economic system it has to be conceived of as an entirely new form of global regional and national governance that radically transforms economic political and social relations in society Its consequences for citizenship as a social institution are no less than dramatic Against the background of both manifest and ideological processes the book looks at if citizenship has lost the basis it has rested upon for decades or if the institution itself is in a process of being fundamentally transformed and restructured thereby changing its meaning and the significance of citizens rights This book will appeal to academics working in the field of political theory political sociology and European studies

Ottomans who combined religious protection with the politics of loyalty Burbank and Cooper discuss the influence of empire on capitalism and popular sovereignty the limitations and instability of Europe s colonial projects Russia s repertoire of exploitation and differentiation as well as the empire of liberty devised by American revolutionaries and later extended across a continent and beyond With its investigation into the relationship between diversity and imperial states Empires in World History offers a fresh approach to understanding the impact of empires on the past and present

*Tuscany in the Age of Empire* Brian Brege, 2021-07-13 A new history explores how one of Renaissance Italy s leading cities maintained its influence

in an era of global exploration trade and empire The Grand Duchy of Tuscany was not an imperial power but it did harbor global ambitions After abortive attempts at overseas colonization and direct commercial expansion as Brian Brege shows Tuscany followed a different path one that allowed it to participate in Europe s new age of empire without establishing an empire of its own The first history of its kind Tuscany in the Age of Empire offers a fresh appraisal of one of the foremost cities of the Italian Renaissance as it sought knowledge fortune and power throughout Asia the Americas and beyond How did Tuscany which could not compete directly with the growing empires of other European states establish a global presence First Brege shows Tuscany partnered with larger European powers The duchy sought to obtain trade rights within their empires and even manage portions of other states overseas territories Second Tuscans invested in cultural intellectual and commercial institutions at home which attracted the knowledge and wealth generated by Europe s imperial expansions Finally Tuscans built effective coalitions with other regional powers in the Mediterranean and the Islamic world which secured the duchy s access to global products and empowered the Tuscan monarchy in foreign affairs These strategies allowed Tuscany to punch well above its weight in a world where power was equated with the sort of imperial possessions it lacked By finding areas of common interest with stronger neighbors and forming alliances with other marginal polities a small state was able to protect its own security while carving out a space as a diplomatic and intellectual hub in a globalizing Europe

*European Entry into the Pacific* Dennis O. Flynn, Arturo Giráldez, 2017-09-08 World history conventionally ignores or underestimates the importance of Manila the Manila galleons and the Philippines as key stages in the development of trans Pacific contact and of the world economy Essays in this volume discuss Philippine Asian exchanges prior to the entry of Europeans and then look at European influences and the impact of Magellan s voyage and the emergence of Manila as one of global trade s crucial linchpins during four centuries Linkages between Latin America and China and Spanish Japanese competition for the Chinese marketplace are important topics Tensions and cooperation among Chinese Japanese Iberians Africans Christians Muslims and others on Philippine soil are also covered This volume suggests the need for thorough re evaluation of the Philippines central role in terms of both Pacific history and global history as perhaps the single most important stage in the traffic that linked China and Latin America
