

Political Economy of Tourism

Political economy, in its various guises and transfigurations, is a research philosophy that presents both social commentary and theoretical progress and is concerned with a number of different topics: politics, regulation and governance, production systems, social relations, inequality and development amongst many others. As a critical theory, political economy seeks to provide an understanding of societies – and of the structures and social relations that form them – in order to evoke social change towards more equitable conditions.

Despite the early influence of critical development studies and political economy on tourism research, political economy has received relatively little attention in tourism research. *Political Economy and Tourism* is the first volume to bring together different theoretical perspectives and discourse in political economy related to tourism. Written by leading scholars, the text is organized into three sequential parts, linked by the principle that 'the political' and 'the economic' are intimately connected. Part I presents different approaches to political economy, including Marxist political economy, regulation, comparative political economy, commodity chain research and alternative political economies; Part II links key themes of political economy, such as class, gender, labour, development and consumption, to tourism; and Part III examines the political economy at various geographical scales and focuses on the outcomes and processes of the political act of planning and managing tourism production.

This engaging volume provides insights and alternative critical perspectives on political economy theory to expand discussions of tourism development and policy in the future. *Political Economy and Tourism* is a valuable text for students, researchers and academics interested in tourism and related disciplines.

Tourism and Development Richard Sharpley,David J.

Telfer,2002-04-30 The development of tourism is frequently justified on the basis of its potential contribution to the broader socio economic development of destination areas Indeed tourism is generally considered an effective vehicle of development yet the meaning and objectives of development and the extent to which it can be achieved through tourism is rarely questioned Moreover the relationship between tourism and development remains an under represented area of study and research This book addresses this gap in the literature by challenging many of the widelyheld assumptions about tourism s developmental contribution In the first part a theoretical link is established between the discrete yet interconnected disciplines of tourism studies and development studies More specifically the meaning of development and successive development paradigms are considered within the context of tourism This provides a conceptual foundation for the second part of the book which addresses a number of fundamental issues related to tourism s potential contribution to development These include issues of economic development regional development socio cultural development and environmental development Finally the third part focuses upon barriers to tourism induced development arguing that a new political economy of tourism the consumption of tourism and the dominance of the sustainable development paradigm represent
