National Service, Citizenship, and Political Education Eric B. Gorham,1992-09-01 This book analyzes the issues surrounding civilian national service policy from a fresh and original perspective The author connects national service programs to the political theories of civic republicanism and communitarianism assesses the practical consequences of these theories and examines past youth service programs such as the CCC and Peace Corps to see if they are appropriate models or ideals for a national program Gorham engages the issue of compulsory versus voluntary service and questions whether service tasks can instill a sense of citizenship in young people as defenders of the program claim Using the work of Michel Foucault Charles Taylor Carole Pateman and others he suggests that national service as presently planned will not create the citizen so much as a post industrial and gendered subject In the concluding chapters he presents an argument for a democratic national service and offers an alternative program for policymakers to consider German Philanthropy in Transatlantic Perspective Gregory R. Witkowski,Arnd Bauerkämper,2016-10-25 This volume examines philanthropic practices against the backdrop of the continuities disruptions and changes in twentieth century German socio political relations It presents a differentiated understanding of the relationship between philanthropy and civil society that traces this connection from Germany's first democracy the Weimar Republic through the Nazi dictatorship and Soviet style rule in Communist East Germany to the stable democracy of the Federal Republic of Germany While concentrating on Germany this volume places

German philanthropy in a triangular relationship with the United States and the developing world primarily through Africa In particular the contributions to the book demonstrate that despite many transatlantic exchanges between German and American philanthropic organizations these relationships should not be reduced to bilateral exchanges but rather seen in the context of a globalizing world More generally this transnational study is a reminder that philanthropic activities need to be placed into their specific historical contexts Such an analytical framework allows for more dynamic understanding of the meaning of philanthropy in society illustrating both enduring and changing practices

Debating Regime Legitimacy in Contemporary China Suisheng Zhao, 2018-10-11 This comprehensive volume is a three part study of whether the Chinese political system has maintained a significant degree of regime legitimacy in the context of rising domestic discontent in particular the popular protests against socio economic inequality and environment degradation Part I presents the scholarly debate on the theoretical refinement and empirical measurement of regime legitimacy in contemporary China Part II focuses on the challenges to regime legitimacy of the increasingly widespread popular protests and civil activism Part III examines the regime s responses to these challenges including coercive repression adaptation and economic performance This book finds that while repression can hardly stop popular protests and often backfires economic performance legitimacy is increasingly difficult to be maintained The only way out is the adaptation to the changing domestic and international environment The chapters in this collection were originally published in the Journal of Contemporary China
