Political Equality:

Political Theory Rajeev Bhargava, 2008 *American Political Ideologies* Brian R. Farmer, 2006-04-03 For many people the world of politics is defined by ideologies The average voter rarely takes time to research a policy issue thoroughly relying instead on a set of beliefs set forth by his or her chosen political organization to make important decisions These publicly promoted ideologies play an important role in international as well as domestic political development yet many adherents to a particular belief may have a poor understanding of competing ideologies From right wing to the far left this text dissects eight prominent political ideologies traditional conservatism classic liberalism libertarianism conservative extremism contemporary liberalism communism dependency theory and Islamism In plain terms it describes the basic doctrine and inherent contradictions of each creed along with its particular relevance to today's political landscape An in depth discussion of the political socialization processes that form and perpetuate ideologies is also included Instructors considering this book for use in a course may request an examination copy here [The Political Theory of Conservative Economists](#) Conrad P. Waligorski, 2021-10-08 It is difficult to overstate the impact of conservative economics on American life The conservative thought of economists like Milton Friedman James Buchanan and Friedrich Hayek has provided the conceptual framework that undergirds nearly every aspect of current U S social economic policy Although a great deal has been written about the economic theories of these Nobel Prize winning economists this study is the first to examine the political theory that underlies conservative economics and its implications for public policy Long associated with the Chicago and public choice schools of thought Friedman Buchanan Hayek and others have consistently repudiated Keynesian principles They have steadfastly opposed social welfare policies and regulation of private enterprise championing instead the free market as a mechanism for ordering society In this book Conrad Waligorski analyzes the political content of the conservative economists' arguments In so doing he illuminates the political economic and philosophical ideas behind and justification for the laissez faire policy the reduced regulation intervention and welfare favored by conservative governments in the United States Canada and Britain **Political Ideas And Institutions** Raj Kumar Pruthi, 2005 Aim of this is to deal with some of these questions relating to political ideas and institutions Effort has been made to select material interesting and important for the use of students as well as teachers Contents Functions of the State The City State and Nation State Political Obligations Law Liberty Equality Individual and the State The Welfare State Sovereignty and Pluralists Anarchism Fascism Nationalism and Internationalism *On Political Equality* Robert A. Dahl, 2008-10-01 In this book the eminent psychoanalyst Leonard Shengold looks at why some people are resistant to change even when it seems to promise a change for the better Drawing on a lifetime of clinical experience as well as wide readings of world literature Shengold shows how early childhood relationships with parents can lead to a powerful conviction that change means loss Dr Shengold who is well known for his work on the lasting affects of childhood trauma and child abuse in such seminal books as *Soul Murder* and *Soul Murder*

Revisited continues his exploration into the consequences of early psychological injury and loss. In the examples of his patients and in the lives and work of such figures as Edna St Vincent Millay, William Wordsworth and Henrik Ibsen, Shengold looks at the different ways in which unconscious impressions connected with early experiences and fantasies about parents are integrated into individual lives. He shows the difficulties he encounters with his patients in raising these memories to the conscious level where they can be known and owned, and he also shows in his survey of literary figures how these memories can become part of the creative process. *Haunted by Parents* offers a deeply humane reflection on the values and limitations of therapy on memory and the lingering effects of the past and on the possibility of recognizing the promise of the future.

The Justification of Europe Jürgen Neyer, 2012-10-18 The debate on the EU's legitimacy has long suffered from a number of serious misunderstandings. Supranational politics, Jürgen Neyer argues, is not about the making of public order in Europe but about internalizing external effects and fostering the individual right to justification. The concepts of state and democracy he suggests are essentially useless for understanding and justifying the EU's structures and practices. The European Union is a dualistic polity that is not replacing but supplementing its member states. Its modus of operation is the joint exercise of pooled competencies on the normative basis of the principle of mutual recognition. He goes on to show that the EU provides an important cure to many of the problems that modern democracies are facing in a globalizing world. Legal integration internalizes external effects and democratizes democracies by transforming strategic international bargaining into a justificatory transnational discourse. The EU promotes the cause of justice by providing an effective remedy to horizontal and vertical power asymmetries and to the arbitrariness of untamed anarchy. The EU is far from perfect, however. European politics is still deeply embedded in a culture of integration by stealth and closely connected to a deep mistrust in the capacity of ordinary citizens to understand politics. A major change in the constitutional set up of the EU is required. It should build on a new understanding of the EU's institutions as catering to the individual right to justification and give national parliaments a strategic role in further developing its constitutional design.

Trump and Political Philosophy Marc Benjamin Sable, Ángel Jaramillo Torres, 2018-04-16 This book seeks to address the relation of political philosophy and Donald Trump as a political phenomenon through the notions of patriotism, cosmopolitanism and civic virtue. Political philosophers have been prescient in explaining trends that may explain our political misgivings. Madison warned during the debates on the Constitution that democracies are vulnerable to factions based on passion for personalities and beliefs; various continental thinkers have addressed the problem of nihilism, the modern loss of faith in objective standards of truth and morality that in Max Weber's analysis pointed to the importance of charisma; in Carl Schmitt's to the idea that politics is essentially rooted in the definition of friends and enemies; and in early Heidegger resulted in the emphasis on the enduring significance of local rather than cosmopolitan values. The former concerns regarding demagoguery, charisma and nihilism will enable an evaluation of Trump as a political character while the latter concerns regarding the status of universal versus local

values will enable us to evaluate the content of Trumpism Taken together these essays seek to advance the public conversation about the relationship between the rise of Trump and the ideological forces that seek to justify that rise
