Coalition Strategies of Marxist Parties Trond Gilberg, 1989 During the early part of this decade many individuals both policy makers and scholars wondered about the new look of some communist parties as they billed themselves as potential participants in the pluralistic game of politics in many parts of the world This image was certainly different from the old notion of dedicated revolutionaries who scornfully rejected the existing order and plotted its overflow How genuine was the new look Were the communists sincere when they discussed interaction with other elements of political order in which they operated What were their tactical policies in pursuit of these strategic goals Some of us began to examine these questions more systematically We ran a panel at an academic conference enjoyed the feedback from our colleagues and began the process of writing this book Now several years later it is a finished product after many full scale revisions and updates The topic is still very relevant and that shows the enduring importance of the questions asked a number of years ago Scholars will need to return to this question in the future perhaps the best strategy is a continuous examination of this crucial subject

The Political Economy Of International Organizations Roland Vaubel, Thomas D Willett, 2019-10-16 The idea for this volume was conceived by Frederick Praeger founder of Westview Press who asked Roland Vaubel if he would put together a collection of chapters on the public choice approach to the study of international organizations Vaubel felt it would be useful to have a coeditor from the United States and Thomas D Willett enthusiastically agreed to take on these duties

Negotiating Democracy Gretchen Casper, Michelle M. Taylor, 1996-07-15 This book explains why some countries succeed in installing democracy after

authoritarian rule and why some of these new democracies make progress toward consolidation Casper and Taylor show that a democratic government can be installed when elite bargaining during the transition process is relatively smooth They view elite bargaining in twenty four transitions cases some where continued authoritarianism was the result others where a democratic government was the result and a third outcome where progress towards consolidation was the end product

Party Government in 48 Democracies (1945-1998) J.J. Woldendorp, Hans Keman, I. Budge, 2013-04-17 Since the 1980s political scientists have developed a renewed interest in the study of political institutions based on the assumption that institutions matter that is that formal governmental institutions and constitutional legal rules as well as informal institutions like parties and interest groups are crucial determinants of the shape of politics and policy outcomes In this respect the new institutionalism resembles the old institutionalism of pre behaviorist days but the crucial difference between the two is that the new institutionalists are committed to systematic empirical testing of their hypotheses at least in principle In practice however especially in comparative analyses this goal has often been frustrated by the lack of reliable data for a large number of countries Researchers have therefore usually been limited to testing their hypotheses with modest data sets collected for their own particular purposes Of all of the political institutions the executive branch of the government is by far the most important it can be regarded as the irreducible core of government and the principal embodiment of political authority with specific powers that are not lodged elsewhere in the political system Almost all countries in the world and certainly all modern democracies have an executive body called government cabinet or administration as in the term the Clinton administration that has the main responsibility for running the country's public affairs **The Language of**

Foreign Affairs, 1987-10 **Regional Hegemons** David J Myers, 2019-06-04 The bitter U S experience in Vietnam and the pain inflicted on the Soviet Union by its Afghanistan adventure have caused Washington and Moscow to rethink the costs and benefits of unilateral military intervention on behalf of threatened clients especially in the third world Also as the Cold War winds down the crusading spirit that has driven superpower competition since the end of World War II appears increasingly anachronistic Expenditures by the superpowers in pursuit of military superiority or even to ensure parity are now criticized for the security they do not provide or for detracting from economic growth The latter criticism has grown in importance as the U S economy has confronted new challenges from Japan and Germany and as the Soviet economy struggles to avoid collapse Thus when Saddam Hussein's August 1990 invasion of Kuwait challenged the political and economic status quo in the oil rich Middle East neither the United States nor the Soviet Union responded unilaterally Cooperatively they crafted an international consensus to confront the challenge **Women and Politics Worldwide** Barbara J. Nelson, Najma

Chowdhury, Nājamā Caudhurī, 1994-01-01 This is the first book to analyse the complexities of women's political participation on a cross national scale and from a feminist perspective Surveying forty three countries chosen to represent a variety of political systems regions and levels of economic development questions of women's status power means and methods of reform

are addressed on a global scale Includes chapters on the following countries Argentina Australia Bangladesh Bolivia Brazil Canada China Costa Rica Cuba Czechoslovakia former Egypt France Germany Ghana Great Britain Greece Hong Kong Hungary India Israel Japan Kenya Korea Republic of South Korea Mexico Morocco Nepal The Netherlands Nigeria Norway Palestine Papua New Guinea Peru The Philippines Poland Puerto Rico South Africa Spain Sudan Switzerland Turkey Union of Soviet Socialist Republics former United States Uruguay

The Awkward Embrace Hermann Giliomee, Charles Simkins, 2005-08-08 Democracies derive their resilience and vitality from the fact that the rule of a particular majority is usually only of a temporary nature By looking at four case studies *The Awkward Embrace* studies democracies of a different kind rule by a dominant party which is virtually immune from defeat Such systems have been called Regnant or Uncommon Democracies They are characterized by distinctive features the staging of unfree or corrupt elections the blurring of the lines between government the ruling party and the state the introduction of a national project which is seen to be above politics and the erosion of civil society This book addresses major issues such as why one such democracy namely Taiwan has been moving in the direction of a more competitive system how economic crises such as the present one in Mexico can transform the system how government business relations in Malaysia are affecting the base of the dominant party and whether South Africa will become a one party dominant system

The European Voter J. J. A. Thomassen, 2005-07-28 This is the first book length comparison of the dynamics of electoral behaviour across a wide range of European countries over the past forty years Leading scholars come together to assess how voting patterns have changed in six established democracies Britain Germany The Netherlands Sweden Denmark and Norway

Comprehensive Security and Western Prosperity Leonard Sullivan, Jack LeCuyer, Jack A. LeCuyer, Atlantic Council of the United States. Working Group on Comprehensive Security, 1988 The early 1980s have shown that the realistic demands of a strong military posture substantially exceed the resources which Western publics are willing to devote in their national security The second half of the 1980s may be remembered as a period in which the West was forced to reconsider its basic goals and objectives and the mechanisms by which individual Western countries contribute to those goals This volume proposes the future well being and security of the West will continue to depend in part on the willingness of the member nations to preserve its combined strength and prosperity Co published with the Atlantic Council of the United States

The Logic of Political Survival Bruce Bueno De Mesquita, Alastair Smith, Randolph M. Siverson, James D. Morrow, 2005-01-14 The authors of this ambitious book address a fundamental political question why are leaders who produce peace and prosperity turned out of office while those who preside over corruption war and misery endure Considering this political puzzle they also answer the related economic question of why some countries experience successful economic development and others do not The authors construct a provocative theory on the selection of leaders and present specific formal models from which their central claims can be deduced They show how political leaders allocate

resources and how institutions for selecting leaders create incentives for leaders to pursue good and bad public policy They also extend the model to explain the consequences of war on political survival Throughout the book they provide illustrations from history ranging from ancient Sparta to Vichy France and test the model against statistics gathered from cross national data The authors explain the political intuition underlying their theory in nontechnical language reserving formal proofs for chapter appendixes They conclude by presenting policy prescriptions based on what has been demonstrated theoretically and empirically **Problems of Communism** ,1987
