Hong Kong's Transition to Chinese Rule Ralf Horlemann, 2003-09-02 Following the return of Hong Kong to Chinese sovereignty it appears that the high degree of autonomy promised to Hong Kong is limited in many ways China's reservations about the development of democracy in Hong Kong lies at the heart of the problem The conceptual inadequacies set out in the Basic Law Hong Kong's mini constitution show a correlation between a lack of democracy and a loss of autonomy This book argues that genuine autonomy from the central government in Beijing is impossible without a democratic system in Hong Kong Developments since the handover have however demonstrated that democratic trends have been halted and even reversed and that democracy is not likely to be established in Hong Kong in the near future

A Modern History of Hong Kong Steve Tsang, 2007-07-30 This major history of Hong Kong tells the remarkable story of how a cluster of remote fishing villages grew into an icon of capitalism The story began in 1842 with the founding of the Crown Colony after the First Anglo Chinese war the original Opium War As premier power in Europe and an expansionist empire Britain first created in Hong Kong a major naval station and the principal base to open the Celestial Chinese Empire to trade

Working in parallel with the locals the British built it up to become a focus for investment in the region and an international centre with global shipping banking and financial interests Yet by far the most momentous change in the history of this prosperous capitalist colony was its return in 1997 to Mother China the most powerful Communist state in the world **The Dynamics of Beijing-Hong Kong Relations** Sonny Shiu-hing Lo, 2008-04-01 This book critically assesses the implementation of the one country two systems in the Hong Kong Special Administrative Region HKSAR from the political judicial legal economic and societal dimensions The author contends that there has been a gradual process of mainlandization of the HKSAR meaning that Hong Kong is increasingly economically dependent on the People's Republic of China PRC politically deferent to the central government on the scope and pace of democratic reforms socially more patriotic toward the motherland and more prone to media self censorship and judicially more vulnerable to the interpretation of the Basic Law by the National People's Congress This book aims to achieve a breakthrough in relating the development of Hong Kong politics to the future of mainland China and Taiwan By broadening the focus of the one country two systems from governance to the process of Sino British negotiations and their thrust building efforts this book argues that the diplomats from mainland China and Taiwan can learn from the ways in which Hong Kong's political future was settled in 1982 1984 This is a book for students researchers scholars diplomats and lay people **Crisis and Transformation in China's Hong Kong** Ming K. Chan, Alvin Y. So, 2002 13 Walking a Tight Rope Hong Kong's Media Facing Political and Economic Challenges Since Sovereignty Transfer 14 Postcolonial Cultural Trends in Hong Kong Imagining the Local the National and the Global 15 Conclusion Crisis and Transformation in the Hong Kong SAR Toward Soft Authoritarian Developmentalism The Editors and Contributors Index **Contemporary Hong Kong Government and Politics, Third Edition** Lam Wai-man, Percy Luen-tim Lui, Wilson Wong, 2024-08-05 In the third edition of Contemporary Hong Kong Government and Politics Lam Wai-man Percy Luen-tim Lui Wilson Wong and various contributors provide the latest analyses in many aspects of Hong Kong's government and politics such as political institutions mediating institutions and political actors They also discuss specific policy areas such as political parties and elections civil society political identity and political culture the mass media and public opinions after the Umbrella Movement in 2014 The book also evaluates the latest developments in Hong Kong's relationship with Mainland China and the international community This new edition offers an up to date and comprehensive analysis of the main continuities and changes in the above aspects since 2014 This volume will help its readers grasp a basic understanding of Hong Kong's political developments in the last ten years **Chinese Communists and Hong Kong Capitalists: 1937-1997** C. Chu, 2010-10-25 This book examines Chinese Communist activities in Hong Kong from the outbreak of the Sino Japanese War in 1937 to the handover in 1997 It reveals a peculiar part of Chinese Communist history and traces six decades of astounding united front between the Chinese Communists and the Hong Kong tycoons and upper class business elite East Asian welfare regimes in transition Walker, Alan, Wong, Chack-kie, 2005-03-30 Eastern welfare

systems have largely been neglected by Western social policy. There is very little information in the West about their operation and the differences between them. Yet as China and South East Asia emerge as a major regional economic block it is vital to understand the social models that are in operation there and how they are developing. This book puts the spotlight on the Chinese and South East Asian welfare systems providing an up to date assessment of their character and development. In particular it examines the underlying assumptions of these systems and how the processes of globalisation are impacting on them. As well as specific country case studies there is a valuable comparative analysis of Eastern and Western welfare states. The book provides a unique insight into the main South East Asian welfare systems written by experts living and working within them. It focuses on Confucianism and globalisation to provide an account of tradition and change within the South East Asian cultural context. Eastern welfare states in transition will be essential reading for students of social policy requiring an understanding of non Western welfare systems. Policy makers and practitioners who are interested in how Eastern welfare systems are adapting to globalisation will also find it an important read.

Politics and Government in Hong Kong Ming Sing, 2008-09-15 This book examines the government of Hong Kong since its handover to mainland China in 1997 focusing in particular on the anti government mass protests and mobilisations in the years since 2003. It argues that Hong Kong has been poorly governed since transferring to Chinese rule and that public frustration with governmental performance including anti subversion laws and slow democratisation has resulted in the regular and massive protests which have been rare in Hong Kong's past political development. The book then assesses different explanations for Hong Kong's government problems including lack of social cohesion incomplete economic restructuring structural budgetary deficit severe social inequality intensifying cronyism and deficiencies within the political system itself. It goes on to discuss the implications of poor governance for legislative elections civil society and constitutional development and considers the prospects for the future. It argues that although in the short term the Hong Kong government has managed to maintain its popular support ratings in the longer run it is unlikely to be able to maintain its legitimacy in dealing with the fundamental challenges of government unless the current system is replaced by popular election of the government with appropriate institutional capacity and political powers.

Communitarian Foreign Policy Nikolas K. Gvosdev, 2017-07-05 This volume establishes Amitai

Etzioni's communitarian approach to international relations as a distinct school of American foreign policy thought. Nikolai K. Gvosdev systematically evaluates Etzioni's ideas tracing their origins during the Cold War and their relevance to current challenges in Asia and the Middle East and considering their strengths and weaknesses. Etzioni agrees with liberal internationalists who believe that traditional notions of state sovereignty are eroding and that a new set of global norms is required. However, he argues against the imposition of Western policies on the rest of the world which he sees as a recipe for conflict which the United States cannot afford. He warns against the post Cold War triumphalism arguing that it undercuts efforts to find necessary common ground with both Russia and China. An enduring and stable global architecture cannot be maintained unless it appeals to the interests of a broad community of nations. The trust that is needed for forming closer associations between nations and to have a productive dialogue on human rights can only come about through the voluntary coordination of states forced to combat an increasing array of transnational threats. **Power, Money, and Media** Jinqian Li, 2000. This book addresses as few books in English have a broad range of topics pertaining to China's expanding media and telecommunications systems. American and Chinese experts in journalism, communication, government and political science use fieldwork including participant observations, surveys and in depth interviews conducted within media organizations to provide richly detailed analyses of the issues and of the changing face of media in China. *Power and Prosperity* Susan L. Shirk, Christopher P. Twomey, 1996-01-01. *Power and Prosperity* brings together senior scholars, policy officials and international journalists to provide diverse perspectives on regional dynamics and domestic intricacies in the Pacific Rim countries and to examine the effects of changing security patterns on economic relations and growth. The contributions highlight the degree to which economic and security policies are connected and show how policymakers can build upon the positive dimensions of regional and international ties to increase trust and limit the development of security dilemmas.

Religious Organizations and Democratization Tun-jen Cheng, Deborah A. Brown, 2015-03-26. Since the terrorist attacks on 9/11, the political roles of religious institutions and groups have captured international attention. This book examines how religious institutions and organizations in various Asian countries are influencing democratic development and the shaping of government policies. *Religious Organizations and Democratization* covers Taiwan, Hong Kong, Mainland China, Korea, Thailand, the Philippines, Malaysia, Indonesia and Japan. The chapters specifically address the engagement of Christian, Buddhist, Muslim and other religious organizations in the advancement and/or hindrance of democratization in the region. The contributors consider such questions as: Why have some religious organizations played a decisive role in democratic transitions while others remained politically dormant and others still acted in conservative alliances to block democratic development? Why did some religious organizations that once were active and instrumental to democratic change lose their political vitality as soon as civil liberties were successfully introduced? And why did other religious organizations, irrespective of their roles in the process of democratic transition, emerge as key political forces in the civil society? **Taiwan in the 21st Century** J. Megan

Greene, Robert Ash, 2007-01-24 Written by an impressive line up of contributors this book analyzes Taiwan's economic and political achievements and asks whether it is possible to identify through the experience of a single nation Taiwan the makings of a replicable model

Architecture, Media, Populism... and Violence Graham Cairns, 2022-10-07 The Storming of the Capitol was for many the culminating media performance of the four year presidency of Donald Trump His presidency and its final act bore all the hallmarks of a 21st century form of populism and media politico spectacle that may yet come to dominate the political scene in the US and worldwide for years to come The questions that such events raise are complex varied and operative across a multitude of disciplines This book engages with these vexed questions in the broad fields of politics and media but does so uniquely through the prism of architecture This book does not however limit its view to the recent events in Washington DC or the United States Rather it seeks to use those events as the starting point for a critique of architecture in the tapestry of mediated forms of protest and political action more generally Each chapter draws on case studies from across timeframes and across nations The book sharpens our critique of the relationship between direct political action its media representation and the role it assigns to architecture as played out globally in the age of mass media In doing so it opens up broader debates about the past present and future roles of architecture as a political tool in the context of international political systems now dominated by changing and unpredictable uses of media and characterised by an increasingly volatile and at times violent form of political activism It is essential reading for any student or researcher engaging with these questions
