Political Parties And Elections In The French Fifth Republic:

Political Parties and Elections in the French Fifth Republic J. R. Frears, 1977 **The Government of the Fifth Republic** J. A. Laponce, 1976 **French Political Parties Under the Fifth Republic** Frank Lee Wilson, 1982 *Political Parties in the European Community* Stanley Henig, 2025-09-12 Political Parties in the European Community 1979 looks at the decision by the member governments of the European Community to proceed to the direct election of a European Parliament. It provides a full survey of the parties of the nine EC states giving both information and analysis on political and electoral systems, party systems, philosophy and structure of major parties, finances, membership and organisation. In addition, it deals with the evolution of transnational groupings of parties both inside and outside the European Parliament and the concluding chapter places Europe's parties in the overall context of the political societies within which they operate. **Contemporary French Political Parties** David Scott Bell, 1982 **French Political Parties in Transition** Alistair Cole, 1990 French Presidentialism and the Election of 1995 Lorna Milne, John Gaffney, 2018-12-21 First published in 1997, this volume examines the presidential elections, one of the central events of the democratic process in France and arguably the main organising principle of French politics since 1962, and provides an opportunity to assess the development of the regime. More significantly, they allow us to assess modifications to the office of president and to French Presidentialism which are both reflected in and affected by the electoral campaign and the elections themselves. This book provides such an assessment with specific reference to the candidates, issues and events of the 1995 Presidential elections. *Transformation of the German Political Party System* Christopher S. Allen, Larry Eugene Jones, 2001 Using German political parties as a prism with which to view institutional change, this collection transcends a single country focus and places the German experience in a comparative and historical framework. Evaluation of the performance of the German parties and party system in dealing with problems of integration and legitimisation common to all industrialized democracies; it presents a sharp analysis of the effects and incompleteness of German unification. **Developments in French Politics 6** Helen Drake, Alistair Cole, Sophie Meunier, Vincent Tiberj, 2020-11-28 This new version of a leading textbook on French politics offers expert analysis of recent national and international events, discussing their significance for France itself as well as for Europe and the wider world. It covers a wide range of current challenges facing the country under the presidency of Emmanuel Macron and considers how issues such as immigration, multiculturalism and gender and sexual politics fit with wider patterns in global politics. New to this Edition: New co-editor Helen Drake joins the book's experienced team of editors. Completely revised to take stock of the presidency of François Hollande, the first half of Emmanuel Macron's mandate and to look forward to the future of France and its significance to European and global politics. Covers a range of new topics including the National Rally, formerly the National Front, immigration, multiculturalism and gender and sexual politics. **The Government of the Fifth Republic** Jean Antoine Laponce, 1961 The Presidentialization of Politics Thomas Poguntke, Paul Webb, 2007-04-27 The

Presidentialization of Politics shows that the politics of democratic societies is moving towards a presidentialized working mode even in the absence of formal institutional changes. These developments can be explained by a combination of long term structural changes in modern politics and societies contingent factors which fluctuate over time. While these contingent short term factors relate to the personalities of office holders, the overall political agenda and the majority situation in parliament, there are several structural factors which are relatively uniform across modern nations. First, the internationalization of modern politics, which is particularly pronounced within the European Union, has led to an executive bias of the political process which has strengthened the role of political top elites vis vis their parliamentary groups and or their parties. Their predominance has been amplified further by the vastly expanded steering capacities of state machineries which have severely reduced the scope of effective parliamentary control. At the same time, the declining stability of political alignments has increased the proportion of citizens whose voting decisions are not constrained by long standing party loyalties. In conjunction with the mediatization of politics, this has increased the capacity of political leaders to by pass their party machines and to appeal directly to voters. As a result, three interrelated processes have led to a political process increasingly moulded by the inherent logic of presidentialism: increasing leadership power and autonomy within the political executive, increasing leadership power and autonomy within political parties, and increasingly leadership centred electoral processes. The book presents evidence for this process of presidentialization for 14 modern democracies including the US and Canada. While there are substantial cross national differences, the overall thesis holds: modern democracies are increasingly following a presidential logic of governance through which leadership is becoming more central and more powerful but also increasingly dependent on successful immediate appeal to the mass public. Implications for democratic theory are considered.

Political Parties in Advanced Industrial Democracies Paul Webb, David Farrell, Ian Holliday, 2002-09-26. How relevant and vital are political parties in contemporary democracies? Do they fulfill the functions that any stable and effective democracy might expect of them, or are they little more than moribund anachronisms, relics of a past age of political life now superseded by other mechanisms of linkage between state and society? These are the central questions which this book aims to address through a rigorous comparative analysis of political parties operating in the world's advanced industrial democracies. Drawing on the expertise of an impressive team of internationally known specialists, the book engages systematically with the evidence to show that while a degree of popular cynicism towards them is often chronic, though rarely acute, parties have adapted and survived as organizations remodelling themselves to the needs of an era in which patterns of linkage and communication with social groups have been transformed. This has enabled them to remain central to democratic systems, especially in respect of the political functions of governance, recruitment, and albeit more problematically, interest aggregation. On the other hand, the challenges they face in respect of interest articulation, communication, and participation have pushed parties into more marginal roles within Western political systems. The implications of these findings for

democracy depend on the observer's normative and theoretical perspectives. Those who understand democracy primarily in terms of popular choice and control in public affairs will probably see parties as continuing to play a central role while those who place greater store by the more demanding criteria of optimizing interests and instilling civic orientations among citizens are far more likely to be fundamentally critical.
