Paris and the Provinces Peter Gourevitch, 2023-02-14 First published in 1980 Paris and the Provinces explores why reforms of central local relations in France have been so ineffectual Professor Gourevitch discovers the cause in party politics and personal rivalries The struggle for dominance among different parties Gaullists Communists Socialists Christian Democrats Independents and others and individuals De Gaulle Giscard Chirac Mitterand Marchais etc has influenced virtually every aspect of institutional reform from the creation of the regional administration and delineation of its powers to the delegation of specific responsibilities to cities and towns Conflict over the mechanisms that link local life to the national government is by no means limited to France This book closely examines comparable events in Italy and analyses the factors that differentiate the strength of ethnically based challenges to central authority in Britain Spain Belgium Yugoslavia and Canada from the relative weakness of such challenges in France Italy and Germany By evaluating the territorial distribution between the capital and the countryside as both an influence on and an

object of policy Paris and the Provinces contributes significantly to understanding the connections between party politics and policy formation and will be of interest to students of political science government and public policy *Elites in French Society* Ezra N. Suleiman, 2015-03-08 Why do some elites survive while others do not How do certain institutions manage to preserve their importance in the face of crises instability and change How does a democratic society legitimize elitist institutions Combining the use of important social theories particularly those of Mosca Schumpeter Tocqueville and Pareto with empirical analysis Ezra Suleiman tries to answer these questions in his examination of the dominance and stability of France's governing elites The author draws on original survey data historical evidence and specialized documentary sources His three part discussion deals first with the state institutions that nurture the French elite second with the organization legitimization and adaptation of the elite and its institutions and third with some of the policy and political implications of France's elitist system In the final section of his book he closely examines the relationship between elites in the public and private sectors In his investigation of France's state created elites Professor Suleiman shows the great importance of the grandes écoles in training and promoting the elites and the grand corps in providing a base from which the elites launch themselves into extra governmental careers He also finds that the elites capacity to adapt to an evolving social political and economic environment is a major factor in their ability to survive Originally published in 1979 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
