Chinese Entrepreneurship in a Global Era , *Business in Indonesia* M. Chatib Basri,2003-08-01 This book examines Indonesia s business environment since reformasi began in 1985 what stayed the same what changed and would could change Economic recovery has been hesitant Regime change and political reform have created uncertainties that have deepened reluctance to invest A raft of government instigated changes have left their imprint decentralization privatization new company legislation anti corruption efforts nationalization of debt ridden banks and firms being forced into receivership More cautious lending practices by remaining financial institutions have imposed a credit crunch Increased worker militancy and minimum wage rises have led some international firms to reconsider their presence in Indonesia Changes in the business environment have caused a redefinition of private enterprise government relations inducing firms to re examine their organization and management The book includes insights of distinguished and stimulating speakers from business independent research organizations and academic institutions in Indonesia Australia and elsewhere

State of Authority Gerry Van Klinken,Joshua Barker,2018-05-31 A major realignment is taking place in the way we understand the state in Indonesia New studies on local politics ethnicity the democratic transition corruption Islam popular culture and other areas hint at novel concepts of the state though often without fully articulating them This book captures several dimensions of this shift One reason for the new thinking is a fresh wind that has altered state studies generally People are posing new kinds of questions about the state and developing new methodologies to answer them Another reason for this shift is that Indonesia itself has changed probably more than most people recognize It looks more democratic but also more chaotic and corrupt than it did during the militaristic New Order of 1966 1998 State of Authority offers a range of detailed case studies based on fieldwork in many different settings around the archipelago The studies bring to life figures of authority who have sought to carve out positions of power for themselves using legal and illegal means These figures include village heads informal slum leaders district heads parliamentarians and others These individuals negotiate in settings where the state is evident and where it is discussed coffee houses hotel lounges fishing waters and street side stalls These case studies and the broader trend in scholarship of which they are a part allow for a new theorization of the state in Indonesia that more adequately addresses the complexity of political life in this vast archipelago nation State of Authority demonstrates that the state of Indonesia is not monolithic but is constituted from the ground up by a host of local negotiations and symbolic practices

The Political Economy of Growth in Vietnam Guanie Lim,2020-10-05 Since the doi moi reforms in 1986 Vietnam has experienced a dramatic socioeconomic transformation Lim examines the role of the state and its interaction with market forces in bringing this change about Taking the motorcycle and banking industries as case studies this book explores the dynamics between the

state and transnational corporations in shaping the manufacturing and service sectors respectively Vietnam as one of Southeast Asia's quintessential latecomer economies with little prior experience of dealing with transnational corporations has nevertheless been quite successful in maintaining some control over the impact of foreign direct investment Yet the learning outcomes remain highly uneven In addition Lim argues that Vietnamese advancement in both industries mirrors only partially the more generalized patterns of state led development in East Asia's earlier batch of latecomer economies Vietnam's case thus presents practical lessons on how to succeed in crafting and utilizing policy instruments to achieve domestic economic and technological upgrading This book will be of great interest to scholars of political economy and industrial policy in East Asia as well as to scholars and policy professionals analyzing approaches to development strategy more broadly

Competitive Authoritarianism Steven Levitsky, Lucan A. Way, 2010-08-16 Based on a detailed study of 35 cases in Africa Asia Latin America and post communist Eurasia this book explores the fate of competitive authoritarian regimes between 1990 and 2008 It finds that where social economic and technocratic ties to the West were extensive as in Eastern Europe and the Americas the external cost of abuse led incumbents to cede power rather than crack down which led to democratization Where ties to the West were limited external democratizing pressure was weaker and countries rarely democratized In these cases regime outcomes hinged on the character of state and ruling party organizations Where incumbents possessed developed and cohesive coercive party structures they could thwart opposition challenges and competitive authoritarian regimes survived where incumbents lacked such organizational tools regimes were unstable but rarely democratized

The Routledge Handbook of Asian Regionalism is a definitive introduction to and analysis of the development of regionalism in Asia including coverage of East Asia, Southeast Asia and South Asia. The contributors engage in a comprehensive exploration of what is arguably the most dynamic and important region in the world. Significantly, this volume addresses the multiple manifestations of regionalism in Asia and is consequently organised thematically under the headings of conceptualizing the region, economic issues, political issues, strategic issues, regional organizations. As such, the Handbook presents some of the key elements of the competing interpretations of this important and highly contested topic, giving the reader a chance to evaluate not just where Asian regionalism is going but also how the scholarship on Asian regionalism is analysing these trends and events. This book will be an indispensable resource for students and scholars of Asian politics, international relations and regionalism. *Business and Development Studies* Peter Lund-Thomsen, Michael Wendelboe Hansen, Adam Lindgreen, 2019-10-16

Business and Development Studies: Issues and Perspectives provides a comprehensive collection of cutting edge theoretical and empirical contributions to the emerging field of business and development studies. Compared to more traditional business school accounts of business in developing countries which focus on the challenges and opportunities of doing business in developing countries, this anthology explores whether how and under what conditions business contributes to the achievement of economic, social and environmental goals in developing countries. The book consolidates the current status of academic work on business and development, identifies state of the art in relation to this academic field and establishes a future research agenda for business and development studies as an emerging academic discipline within the social sciences. The book will be of interest to researchers and students including economists, geographers, sociologists, political scientists, corporate social responsibility specialists and development scholars who are seeking an in depth overview of current debates about the role of business as a development agent in the Global South. The book is also of relevance to practitioners that are engaged in work with the private sector seeking to enhance the positive effects and minimize the negative economic, social and environmental consequences of business activity in the Global South.
