Political Cognition The 19th Annual Carnegie Mellon Symposium On Cognition:

Political Cognition Richard R. Lau, David O. Sears, 1986 **The Oxford Handbook of Political Psychology** Leonie Huddy, David O. Sears, Jack S. Levy, Jennifer Jerit, 2023 This updated third edition gathers together an international group of distinguished scholars to provide an up to date account of key topics and areas of research in political psychology Focusing first on political psychology at the individual level attitudes values decision making ideology personality and then moving to the collective group identity mass mobilization political violence this fully interdisciplinary volume covers models of the mass public and political elites and addresses both domestic issues and foreign policy Now with new chapters on authoritarianism nationalism status hierarchies and minority political identities along with updated material this is an essential reference for scholars and students interested in the intersection of the two fields Bonding, Bridging, and Bypassing Colm A. Fox, 2024 Societal divisions and even violence can occur when electoral candidates appeal to race religion or tribe Why do candidates make these ethnic appeals More specifically why do some candidates appeal to their own ethnic group while others reach out to other ethnic groups or abandon ethnic appeals altogether To answer this question Colm A Fox adopted a ground breaking novel approach to study campaign appeals made by thousands of candidates He collected and systematically analyzed photographs of over 25 000 election posters from campaigns across Indonesia along with newspaper reports and interview data The book shows how electoral rules political party ideology ethnic demographics and social norms shape candidates decisions to bond with co ethnics bridge across other ethnic groups or bypass ethnicity entirely Its findings yield not only insights as to which ethnic identities are likely to become politicized but also prescriptions on how to curb divisive ethnic politics National Library of Medicine Current Catalog National Library of Medicine (U.S.), Everyday Thinking Stanley Woll, 2001-07 This comprehensive yet accessible text brings together key research and theory in a social cognition and applied cognitive psychology to provide a thorough grounding in these increasingly popular areas Suitable text for upper level undergrads and a reference for graduate level readers alike Index of Conference Proceedings Received British Library. Document Supply Centre, 1986 Current Catalog National Library of Medicine (U.S.), First multi year cumulation covers six years 1965-70 Eliminating Racism Phyllis A. Katz, Dalmas A. Taylor, 2013-06-29 The chapters presented here provide the reader with an awareness of the divergent views of what constitutes racism and frameworks for reducing it This book points out that the dialogue and research on this subject since the mid 1970s have yielded increased controversy over the theories foundation and continued existence of racism Ironically what we viewed in the 1954 Brown decision and the Civil Rights Act of 1964 as the beginning of the end of racism turned out to be the beginning of confusion over the course of action to ensure societal acceptance of political mandates Hence the title of this book captures the essence of the emotional core of any forum for examining racism past and present One of the most controversial forums has been that of education beginning with the U.S. Supreme Court's 1954 ruling in Brown v Board of Education Behind every event that has spawned controversy is a profile in courage It was not

a simple decision for the players in the scenario of the Brown v Board of Education case to step forward and present themselves as evidence of discrimination Blackparents supported by black organizations viewed this legal action as a chance for equal opportunity Yet the 1950s were a time when black communities were pained by the thought that bigotry and institutional racism would forever stand in the way of their achieving equality [Annual Review of Political Science](#) ,1987

Discursive Remembering Lucas M. Bietti,2014-10-14 This book aims at building a bridge between the social and political aspects of remembering and the cognitive and discourse processes driving such activities By analyzing these cognitive and discursive processes Bietti explores practices of individual and collective remembering in institutional and private settings in relation to periods of political violence in Argentina This books begins to fill the conceptual gap between cognitive oriented approaches to remembering that draw conclusions about how memory functions in the mind without a detailed discourse analysis of the communicative interaction in which this process unfolds and the discourse and pragmatic oriented approaches that are mainly interested in analyzing the rhetorical features of conversational remembering in some cases disregarding that there are underlying cognitive mechanisms that drive the construction of discourses about past experiences The empirical analysis shows that individual and collective remembering in relation to periods of political violence in Argentina vary in pragmatic ways due to the fact that these accounts of the past were constructed with reference to the communicative situation Thus this book also aims at shedding new light on the current practices of commemoration and remembrance related to periods of political violence in Argentina in public and private settings [Gender Consciousness and Politics](#) Sue Tolleson Rinehart,2013-10-31 This book examines the emergence of gender consciousness among women as a significant force in American politics The author bases her argument on an in depth empirical analysis of data derived from the U S biennial National Election studies of 1974 to 1984 the year of the emergence of the so called gender gap The author discusses the fact that while feminism is central to womens political orientation the simple awareness of gender differences and group consciousness is a powerful force of change [The Cumulative Book Index](#) ,1988 A world list of books in the English language *Right-Wing Media's Neurocognitive and Societal Effects* Rodolfo Leyva,2023-07-31 This book empirically tests compares and explains the effects of British and American legacy conservative press and far right websites on accordant political views and behavioural intentions Correspondingly the 2016 Brexit Referendum and American Presidential election results are often attributed to the spread of fake news through social media Russian Bots and alt right news websites This has raised concerns about the impact of digital disinformation on democracy as well as the rise of nativist parties and movements worldwide However this book argues that these causal attributions are largely based on unproven assumptions and deflect attention from the more influential and harmful role of traditional conservative media To support this argument Leyva incorporates insights from various fields such as neurocognitive science media communication research cross cultural psychology and sociology Additionally the book presents primary evidence from a series of experiments that

examined the effects of candidate related fake news and immigration coverage from both old and new media right wing sources These experiments focused on how such content influences anti immigrant attitudes and voter preferences By doing so the book provides a nuanced and robustly tested theoretical account of how right wing media affects political beliefs sentiments and practices at the neuronal level and of how this can in turn negatively impact democratic multicultural societies Given its interdisciplinary approach this book will be of interest to scholars in the social behavioural and cognitive sciences who are studying media psychology online misinformation authoritarian populism political sociology new media and journalism *American Perceptions of the Soviet Union as a Nuclear Adversary* Erik Beukel,1989 Beukel political science Odense U Denmark analyzes the ways in which American governments have perceived the Soviet Union as a nuclear adversary since the early 1960s American images he finds are influenced not only by Soviet behavior but also by traditionally dominating views of the US s proper role in the world as well as by the domestic political process Distributed in the US by Columbia U Press Annotation copyrighted by Book News Inc Portland OR [Subject Guide to Books in Print](#) ,1997

[Design Computing and Cognition'20](#) John S. Gero,2022-02-24 The papers in this volume are from the Ninth International Conference on Design Computing and Cognition DCC 20 held virtually at the Georgia Institute of Technology Atlanta USA They represent the state of the art of research and development in design computing and design cognition including the increasingly active area of design cognitive neuroscience They are of particular interest to design researchers developers and users of advanced computation in designing as well as to design educators This volume contains knowledge about the cognitive behavior of designers which is valuable for those who need to gain a better understanding of designing **Brains, Media and Politics** Rodolfo Leyva,2019-11-25 Following the 2007 2008 global financial crisis a number of prominent academics journalists and activists were quick to pronounce the demise of neoliberal capitalism and governance This rather optimistic prediction however underestimated the extent to which neoliberalism has shaped the 21st century world order and become entrenched in our sociopolitical and cognitive fabric Indeed 11 years after the crisis and in spite of the significant levels of socioeconomic inequality psychological distress and environmental destruction generated by neoliberal policies and corresponding business and cultural practices the ideological hegemony of neoliberalism has not been supplanted nor has it really faced any serious unsettling How then has neoliberalism inflected and shaped our common sense understandings of what is politically economically and culturally viable To help answer this question this book combines leading theories from sociology media communication research developmental psychology and cognitive science and draws on primary evidence from a unique mix of ethnographic survey and experimental studies of young people s leisure practices and educational experiences of young adults political socialisation processes in relation to exposure to social networking sites and of the effects of commercial media viewing on material values and support for social welfare In doing so it provides a nuanced and robustly empirically tested account of how the conscious and non conscious cognitive dimensions of people s subjectivities

and everyday social practices become interpellated through and reproductive of neoliberal ideology As such this book will appeal to scholars across the social and behavioural sciences with interests in neoliberalism political engagement enculturation social reproduction and media effects Advances in Experimental Social Psychology ,1990-03-20 Each volume in *Advances in Experimental Social Psychology* contains an index and each chapter includes references *Mass Media and Political Thought* Sidney Kraus,Richard M. Perloff,1985-11 *Mass Media and Political Thought* is a state of the art collection of original research on the cognitive psychology of political communication Political information processing is examined in several stages 1 voters ability to process political information 2 voters motivation to process such information 3 the effects of political messages and 4 the impact of these processes and effects on the polity **Experimental Psychology** Davood Gozli,Jaana Valsiner,2022-11-28 This work brings together different perspectives on psychological methods and particularly methods involving experimentation To encourage a reflective use of research methods the authors illuminate the historical philosophical and scientific dimensions of methodology providing both defenses and criticisms of experimental psychology The primary audience of the work are students and researchers in psychological and behavioral sciences who have an interest in methodology
