William Dudley Pelley Scott Beekman, 2005-10-17 William Dudley Pelley was one of the most important figures of the anti Semitic radical right in the twentieth century Best remembered as the leader of the paramilitary Silver

Shirley Pelley was also an award winning short story writer Hollywood screenwriter and religious leader During the Depression Pelley was a notorious presence in American politics he ran for president on a platform calling for the ghettoization of American Jews and was a defendant in a headlinegrabbing sedition trial thanks to his unwavering support for Nazi Germany Scott Beekman offers not only a political but also an intellectual and literary biography of Pelley greatly advancing our understanding of a figure often dismissed as a madman or charlatan His belief system composed of anti-Semitism economic nostrums racialism neo Theosophical channeling and millenarian Christianity anticipates the eclecticism of later cult personalities such as Shoko Asahara leader of Aum Shinrikyo and the British conspiracy theorist David Icke By charting the course of Pelley s career Beekman does an admirable job of placing Pelley within the history of both the anti-Semitic right and American occult movements This exhaustively researched book is a welcome addition to the growing body of scholarship on American extremism and esoteric religions State Formation and the Structure of Politics in Mamluk Syro-Egypt, 648-741 A.H./1250-1340 C.E. Winslow Williams Clifford,2013 Winslow Williams Clifford is one of the few historians so far who have addressed the history and culture of the so called Mamluk Sultanate 1250 1517 on the basis of theoretical models This volume is a posthumous publication of his doctoral thesis submitted in 1995 at the University of Chicago Through his skillful application of social theory Clifford succeeded in providing highly convincing evidence that the Mamluk rulers did not as was maintained fo a long time constitute a static form of oriental despotism but was rather a highly differentiated society It was primarily based on compliance with a complex system of order that had established itself during the rule of the first sultans Policing Citizens P.A.J. Waddington,2002-11-01 This analysis of policing throughout the modern world demonstrates how many of the contentious issues surrounding the police in recent years from paramilitarism to community policing have their origins in the fundamentals of the police role The author argues that this results from a fundamental tension within this role In liberal democratic societies police are custodians of the state s monopoly of legitimate force yet they also wield authority over citizens who have their own set of rights **Reporting of Social Science in the National Media** Carol Weiss,Eleanor Singer,1988-08-04 Policy makers as well as the general public are often unaware of social science research until a story about it appears in the national media Even in official Washington a staffer s report on social research may go unnoticed while a report in the Washington Post receives immediate attention This study takes a systematic and revealing look at social science reporting How do journalists hear about social science and why do they select certain stories to cover and not others How do journalistic standards for selection compare with social scientists own judgments of merit How do reporters attempt to ensure accuracy and how freely do they introduce their own interpretations of social science findings How satisfied are social scientists with the selection and accuracy of social science news In Part I Carol H Weiss addresses these questions on the basis of personal interviews with social scientists and the journalists who wrote about their work Part II by Eleanor Singer is based on an analysis of media content itself and compares social science

reporting over time between 1970 and 1982 and across media newspapers newsmagazines television These two complementary perspectives combine to produce a thorough realistic assessment of the way social science moves out of the academy and into the world of news

Ethnic Stratification and Economic Inequality around the World Max Haller in collaboration,Anja Eder,2016-03-03 The modern world is characterised by pervasive economic inequalities Strong economic growth in some developing countries has contributed to a degree to a reduction in the levels of inequality between nations yet inequality within nations remains high and in some cases continues to increase Ethnic Stratification and Economic Inequality around the World investigates the reasons for these striking differences exploring the coincidence and interaction between economic stratification and ethnic differentiation Drawing on extensive international survey and statistical data the author develops a new theory and concrete hypotheses concerning the conditions which lead toward extreme inequality and those which tend toward greater equality A systematic examination of the interaction between class structures social stratification and ethnic differentiation this book sheds light on the manner in which the resulting social structures produce different levels of economic inequality offering a fivefold typology of patterns of ethnic stratification which can be applied to present day world regions Drawing on the work of Max Weber to provide a rigorous investigation of inequality around the world it demonstrates what sociology as a science

of social reality can significantly contribute to our understanding of global economic stratification The book is relevant for a wide social scientific audience particularly for sociologists economists and political scientists working in a comparative perspective

Choice of Force David Last, Bernd Horn, 2005-05-01 Twenty years from now security issues may dictate that counter terrorism is more important than operations to secure stability and rule of law Security at the border ethnic demography and the perspective of the next generation will determine what strategic choices Canada will make about special military operations and the elite forces developed to carry out special missions

Elites, Masses, and the Struggle for Democracy in Mexico Sara Schatz, 2000-05-30 In this book a new general model of delayed transitions to democracy is proposed and used to analyze Mexico's transition to democracy This model attempts to explain the slow gradual dynamics of change characteristic of delayed transitions to democracy and is developed in a way that makes it generalizable to other regional contexts Utilizing both qualitative and quantitative data based on an original data set of forty thousand individual interviews Schatz analyzes how the historical authoritarian corporate shaping of interests and forms of political consciousness has fractured the social base of the democratic opposition and inhibited democratizing social action Using comparative cases of delayed transitions to democracy the author's conclusions challenge and improve upon current theories of democratization In elaborating a model for the delayed transition to democracy the author argues that the emphasis on transformative industrialism in both political modernization and class analytic theories of social bases of democratization is modeled too closely on the western European process of democratization to allow a full explanation of the case of Mexico's transition to democracy In addition she argues that a delayed transitions model provides a more adequate explanation of gradual transitions to democracy because such a model builds on the insights of structural theories regarding the social bases of anti authoritarian mobilization To support the delayed transitions model Schatz compares Mexico with Taiwan and Tanzania countries also characterized by delayed transitions to democracy in the late twentieth century This important book fills a considerable gap in the literature on democratization at the end of the century

Fourth International Conference on Minority Languages Durk Gorter, 1990 The theme of this volume is comparative research on minority languages and development of theories The three previous volumes focused mainly on problems of definition on language in society and on the linguistics of minority languages This fourth ICML attempts to go forward by concentrating on the one hand on comparative research regarding minority languages and on the other hand on the development of theories in this field It allows for a confrontation of different emerging theoretical perspectives
