Parayil, 2016-01-12 In this theoretically and empirically engaging volume the contributors demonstrate that despite the dynamism of India's software industry and the rhetorical flourishes of industry leaders at present the benefits of the revolution in information and communication technologies ICTs touch only the hundreds of thousands with the right skills and access India still needs to do more to bring the benefits of ICTs to the hundreds of millions of its citizens still living in acute poverty The contributors take stock of the political economy implications of informational development in India *Political Economy and Information Capitalism in India: Digital Divide, Development and Equity*, 2019

Digital Rights at the Periphery Guy T. Hoskins, 2025-07-08 Signed into law in 2014 the Marco Civil da Internet Brazilian Civil Rights Framework for the Internet appeared to offer pioneering legislation for a digital bill of rights that addressed issues like network neutrality and privacy Guy T Hoskins chronicles the Marco Civil's development and its failure to confront the greatest concentration of power in the digital age informational capitalism Combining interviews with discourse and political economic analysis Hoskins reveals why the legislation fell short while examining the implications of its emergence in Brazil which remains on the margins of the global system of informational

capitalism Hoskins places collectivist and public service principles at the core of any framework's effectiveness. He also shows why we must create systems sensitive to the sociocultural and political economic contexts that will shape digital rights and their usefulness. Compelling and contrarian *Digital Rights at the Periphery* looks at communications policy and internet governance in the Global South and the lessons they provide for the rest of the world. [Corporations and Cultural Industries](#) Scott W. Fitzgerald, 2012-01-01 *Corporations and Cultural Industries* Time Warner Bertelsmann and News Corporation by Scott Warren Fitzgerald fills an important neglected area in communication and media studies through its sustained theoretically grounded and empirically rich analysis of three of the most important global media conglomerates of our time: Time Warner, Bertelsmann, and News Corp. The book examines how financialization processes regeared the internal operations of media corporations in a manner that pits one sector against another. **Reconsidering Value and Labour in the Digital Age** Christian Fuchs, Eran Fisher, 2015-10-21 This volume explores current interventions into the digital labour theory of value, proposing theoretical and empirical work that contributes to our understanding of Marx's labour theory of value. It proposes how labour and value are transformed under conditions of virtuality and employs the theory in order to shed light on specific practices. **ICTs and Development in India** T. T. Sreekumar, 2011 *ICTs and Development in India* is a unique attempt to study the nature and consequences of the growing presence of Information Technology in development projects in India, focusing particularly on E-governance and Information Communication Technologies. ICT development programs initiated by Civil Society Organizations (CSOs). Sreekumar persuasively argues that there is in fact a wide chasm between the expectations and the actual benefits of CSO initiatives in rural India and that recognising this crucial fact yields important lessons in conceptualizing development and social action in rural areas. **Critique, Social Media and the Information Society** Christian Fuchs, Marisol Sandoval, 2013-11-26 In times of global capitalist crisis, we are witnessing a return of critique in the form of a surging interest in critical theories such as the critical political economy of Karl Marx and social rebellions as a reaction to the commodification and instrumentalization of everything. On one hand, there are overdrawn claims that social media (Twitter, Facebook, YouTube, etc.) have caused uprisings in countries like Tunisia and Egypt. On the other hand, the question arises as to what actual role social media play in contemporary capitalism: crisis, rebellions, the strengthening of the commons, and the potential creation of participatory democracy. The commodification of everything has resulted also in a commodification of the communication commons, including Internet communication that is today largely commercial in character. This book deals with the questions of what kind of society and what kind of Internet are desirable; how capitalism, power structures, and social media are connected; how political struggles are connected to social media; what current developments of the Internet and society tell us about potential futures; how an alternative Internet can look like; and how a participatory commons-based Internet and a co-operative participatory sustainable information society can be achieved. *Understanding New Media* Eugenia Siapera, 2011-11-30 An admirably clear-sighted and engaging analysis of

contemporary forms of mediation illuminating the dynamics of new media across social political and cultural spheres Eugenia Siapera provokes her reader to think afresh about familiar phenomena to synthesise diverse theoretical positions and to stretch their imaginations to anticipate what is coming Sonia Livingstone London School of Economics and Political Science An excellent introduction to the past present and future of the electronic networked media world By carefully examining the complex interactions between society and media Siapera insightfully illuminates the social political economic and cultural consequences of our increasingly electronically networked and mediated world a highly useful teaching tool and an engaging read for students teachers and scholars Steve Jones University of Illinois Chicago New media are everywhere yet with so many technological developments and theoretical perspectives understanding them has never been more difficult Eugenia Siapera explains the key concepts and approaches to the impact of new media on the economy society identity politics friendship citizenship and everyday life Putting the student first this book Engages the reader with integrated up to date case studies Brings it all together with chapter summary charts Challenges students to apply concepts with e tivities Provides key further online readings here This book is both starting point and map for any student of new media and digital culture

Non-humans in Social Science Karolína Pauknerová, Marco Stella, Petr Gibas, 2014-12-01 The book explores the issue of non humans and their role and position within contemporary social sciences Inspired by current trends of bridging the dichotomy of nature and culture the authors use the non human as a prism that offers a different perspective of the world society culture and last but not least being's To start paying attention to non humans has the potential to hybridize social sciences and in turn enrich them as well as to offer social scientists novel perspectives and tools to approach social phenomena Such an attitude might in turn lead to a reassessment of understanding of the relationship between the world and being and of the categories of being and subject Hence the potential of non humans to stimulate an ontological shift within social sciences The view of the human and non human as oppositional categories is a remnant of essentially modernist thinking This book represents a response in terms of an attempt to think about humans and non humans outside of the binary division The authors thus want to contribute to the hybridization of social sciences and throughout the book they deal with ontological epistemological and thematical shifts stemming from the hybridization If the non human does not exist as a negation the boundary between the two becomes unclear and overlapping It is with this hybridization the blurring of the boundaries that we are able to come closer to those who inhabit the world non humans and humans alike

Knowledge and Entrepreneurship in Public Policy Christopher J. Coyne, Abigail R. Hall, Eileen Norcross, 2023-11-17 Understanding entrepreneurship as alertness to potential profit opportunities and the activities involved with bringing those

opportunities to life and public policy as laws regulations and activities of government this volume analyzes the intersection of the two to show how public policy influences entrepreneurship Using a mix of theoretical and applied research the contributors argue that policies which incentivize productive entrepreneurship will advance economic well being but that the passage of such policies depends in large part on the availability and usage of economic knowledge by policymakers If policymakers lack the relevant economic knowledge to achieve their desired outcomes policies will be ineffective in incentivizing productive entrepreneurship
