**Political Economy and Grand Strategy** Mark R. Brawley, 2009-09-10 This book examines traditional balance of power theory from a political economic perspective using historical examples to draw out distinctions between the liberal and realist approach and how this affects grand strategy The realist view of the balance of power theory includes implicit assumptions that economic assets can be turned quickly into power and that states always respond to threats quickly and only with a view to the short run These assumptions drive many of the expectations generated from traditional balance of power theory discouraging realists from looking at domestic sources of power which in turn undermined their ability to frame strategic decisions properly By thinking about how power must be managed over time however we can model the choices policy makers confront when determining expenditures on defense while keeping an eye on the impact of those costs on the economy By emphasizing the role of the state identifying different causal patterns in domestic politics and demonstrating the importance of systemic competition this book aims to establish why a neo classical realist approach is not only different from a liberal approach but also superior when addressing questions on grand strategy This book will be of much interest to students of security studies international political economy grand strategy and IR theory in general Mark R Brawley is Professor of Political Science at McGill University Montreal Canada He is author of several books on International Relations specialising in the connections between political economic issues and security     [The Political Economy of East Asia](#) K.
