Political Economy Of Poverty Equity And Growth Five Small Open Economies

Thomas Farole, Gokhan Akinci

Political Economy Of Poverty Equity And Growth Five Small Open Economies:

Five small open economies Ronald Findlay, Banco Mundial, 1993 The Political Economy of Poverty, Equity and Growth: A Comparative Study Deepak Lal, H. Myint, 1998-10-08 This wide ranging and innovative book synthesises the findings of a major international study of the political economy of poverty equity and growth It is based primarily on analytical economic histories of 21 developing countries from 1950 to 1985 but also takes account of the wider literature on the subject The authors take an ambitious interdisciplinary approach to identify patterns in the interplay of initial conditions institutions interests and ideas which can help to explain the different growth and poverty alleviation outcomes in the Third World Three different types of poverty are distinguished based on their causes and a more nebulous idea of equity in contrast to egalitarianism is shown to have influenced policy Since growth is found to be the major means of alleviating mass structural poverty much of the book is concerned with discovering explanations for policies which are found to be the most important influences on the proximate causes of growth Lal and Myint also consider the available evidence on the role of direct transfers public and private in alleviating destitution and conjunctural poverty The Political Economy of Poverty Equity and Growth develops a novel framework for the comparative analysis of different growth outcomes This framework distinguishes between the different relative factor endowments of land labour and capital and between the different organizational structures of peasant versus plantation and mining economies It also differentiates between the polities of autonomous and factional states in the countries studied breaking the analysis down into further typological subdivisions and providing important new insights into the differing behaviour of economies that are rich in natural resources and those with abundant labour These insights constitute a richer explanation for the divergent developmental outcomes in East Asia compared with Latin America and Africa The evidence collated is used to argue for the continuing relevance of the classical liberal viewpoint on public policies for development and to show why even so nationalist ideologies are likely to be adopted and lead to cycles of interventionism and liberalism The evidence is also used to provide an explanation for the surprising current worldwide Age of Reform Five Small Open Economies Ronald Findlay, Stanislaw Wellisz, 1993 Mauritius a multiethnic society has turned to manufactured exports and tourism as an alternative to reliance on sugar production Malta overcame the shock of losing a British naval base and has grown rapidly The Economy of Modern Malta Paul Caruana Galizia, 2016-12-20 This book provides the first wide ranging account of the Maltese economy in the modern era from colonialism to European Union membership It sets arguments about growth and development and the impact and legacy of colonization against detailed histories of agriculture manufacturing and trade and different economic policy regimes It is based on volumes of newly collected archival evidence and the latest thinking in economic history By extending coverage up to the present the book explains how one of the world's smallest nation states achieved lasting economic development quintupling its per capita income level since 1970 when many other postcolonial and advanced economies stagnated *Sustainable Development in*

Mineral Economies Richard M. Auty, Raymond F. Mikesell, 1998 The mineral economies comprise approximately one fifth of developing countries They face special problems in achieving sustainable development and have as a group been less successful than resource deficient neighbours This book examines the apparent paradox detailing the current problems facing the mineral economies and the future policies necessary to overcome these problems Nine countries are studied Botswana Chile Colombia Indonesia Jamaica Namibia Papua New Guinea Peru and Trinidad and Tobago The authors argue that the key factor is not the sustainability of the mineral production that initially generates growth but the maintenance of the economic and social conditions for sustaining that growth They draw upon recent progress in environmental and natural resource accounting to show how this can be achieved and also assess the socio political factors that often constrain sustainable development

Natural Resources and Economic Development Edward Barbier, 2019-09-19 The second edition of this landmark book explores how natural resources contribute to development in poor economies

No Miracle Mitchell Wigdor, 2016-05-23 No Miracle examines the role of institutions in bridging the digital divide between rich and poor nations and what that means for the country's integration into a global economy Shifting the debate from whether institutions are important to economic development to which institutions are important and how to build them Mitchell Wigdor expertly addresses fundamental shortcomings in the existing development literature by identifying specific institutions that mediate the relationship between Information and Communications Technology ICT and economic growth In doing so he challenges those concerned with development to shift their gaze from whether institutions are important to economic development to which institutions might be the focus of government efforts and how to build them Detailed case studies of the economic development strategies of Singapore and Malaysia from 1960 demonstrate that institution building and economic development may be as much about process as the specific policies governments pursue Written in accessible non technical language this book should be read by everyone concerned with economic growth both in less economically developed countries and the more prosperous including those in government international organizations NGOs universities policy makers and the private sector

Public Service Reforms in a Small Island State Frank Bezzina, Emanuel Camilleri, Vincent Marmarà, 2021-07-30 This book provides a detailed examination of public service reforms in Malta Focusing on both the trajectory and substance of the reforms the volume provides a holistic treatment of the public sector in the European Union's smallest member state The book is divided into four parts Part I covers the historical background of public service administration and management in Malta from the 1500s to the 2010s Part II focuses on recent reforms begun in 2013 after the election of Prime Minister Joseph Muscat Each chapter in this part addresses a particular reform theme transparency and accountability civil service systems and HR management service delivery and digitalisation organisation and management of government reforms policy making coordination and implementation Part III investigates the internal and external impact of the reforms reporting and analyzing the results of a survey carried out among government employees

and the Maltese population The book concludes with a chapter on global reform trends that are likely to impact public service delivery in the future Providing an in depth view of public service in a small island state this volume will be useful to researchers and students interested in public sector management administration and public policy as well as practitioners consultants and government employees Development Centre Studies The World Economy Historical Statistics Maddison Angus,2003-09-25 Following on from his *The World Economy a Millennial Perspective* published by the OECD in 2001 in this book Angus Maddison offers a rare insight into the history and political influence of national accounts and national accounting *Economic Growth in Middle-Income Countries* Manuel Agosin,2023-10-31 This book develops a theoretical framework unlike the conventional neoclassical paradigm for the analysis of growth and deploys analytical data to understand the main policy issues affecting developing countries with particular attention to countries which after having a spurt of growth have been unable to maintain the momentum of their economies One of the guiding ideas of the book is that each one of these countries has its own middle income trap The book focuses the discussion on growth and development around the specific characteristics of these countries and the constraints they face to achieve rapid growth The book offers the building blocks for an integrated approach to development economics from the perspective of developing economies themselves It looks at real life constraints to growth and development such as institutions access to financing macroeconomic policies the role of foreign direct investment the pros and cons of trade and financial opening to the rest of the world education and health issues sustainable development in a world experiencing global warming productive development policies income distribution and poverty Further it offers simple growth models that go beyond the conventional neoclassical model to help the reader understand the unique challenges facing developing countries While recognizing that growth is necessary to achieve development the book argues that there are other variables that can be just as important to wellbeing and pays close attention to issues such as health education and political freedom The book summarizes the issues that are crucial for countries to be able to accelerate their growth rates and to achieve development and makes a theoretical contribution to the study of economic development particularly growth models appropriate to middle income countries Thus it will be a useful guide for researchers and academics in the field of development economics and other social sciences dealing with developing countries **The Economics of the Frontier** Ronald Findlay,Mats Lundahl,2016-11-16 This book deals with the economics of establishing a frontier by conquest or by peaceful settlement the costs involved and the optimum extension of the territory The opening chapters discuss the most relevant literature about frontiers conceptual theoretical and empirical and introduce the fundamental theoretical model for extending frontiers which is drawn on throughout the book The authors use this theoretical apparatus by applying it to a number of historical cases These include the division of the European territory between the Byzantine Empire Islam and Western Europe the creation and expansion of the Mongol Empire the impact of the Black Death the European discovery of the New World the staples trade from 1870 1914 and the

rise and fall of banditry in Brazil The Economics of the Frontier brings together a collection of essays which explore how economically optimal frontiers were founded from sixth century Europe through to twentieth century Brazil *Special Economic Zones* Thomas Farole,Gokhan Akinci,2011-08-01 For countries as diverse as China and Mauritius Special Economic Zones SEZs have been a powerful tool to attract foreign investment promote export oriented growth and generate employment for many others the results have been less than encouraging While the benefits and limitations of zones will no doubt continue to be debated what is clear is that policymakers are increasingly attracted to them as an instrument of trade investment industrial and spatial policy Since the mid 1980s the number of newly established zones has grown rapidly in almost all regions with dramatic growth in developing countries In parallel with this growth and in the evolving context of global trade and investment zones are also undergoing significant change in both their form and function with traditional export processing zones EPZs increasingly giving way to larger and more flexible SEZ models This new context will bring significant opportunities for developing countries to take advantage of SEZs but will also raise new challenges to their successful design and implementation This volume aims to contribute to a better understanding of the role and practice of SEZs in developing countries in order to better equip policymakers in making effective decisions in planning and implementing SEZ programs It covers some of the emerging issues and challenges in SEZs including upgrading regional integration WTO compliance innovation the environment and gender issues with practical case examples from SEZ programs in developing countries **The Rent Curse** Richard M. Auty,Haydn I. Furlonge,2019 This book compares models of low rent and high rent development to explain the divergent growth of regions and to query the continued prioritization of industrialization over agriculture and export services as the engine of economic prosperity **The Oxford Handbook of the Mauritian Economy** ,2025-02-24 The Oxford Handbook on the Mauritian Economy presents a comprehensive analysis of the economic social and political landscape of the island offering a nuanced exploration of its historical evolution current challenges and future prospects Adopting a multidisciplinary lens the handbook delves into the complexities of the Mauritian economy addressing the development pathway of the country through a focus on the process of structural transformation namely the transition from an agrarian based economy to a diversified one across sectors like manufacturing information and communication technology tourism and financial services amongst others It analyzes the process of economic transformations while encompassing social change and social policies with particular attention to key issues of inequality education health care social protection poverty alleviation and social inclusion and it delves further into the dynamics of cultural change demographic shifts and the role of policies in shaping the social fabric of the island Amid the perceived success of the Mauritian economy this handbook confronts the challenges that the island faces in terms of the complexities of globalization disparities in income and opportunities and climate change as well as other recent crises that affect its resilience to external shocks It contributes not only to wider scholarly debates on economic development but also presents a

valuable resource for policymakers and practitioners seeking an in depth understanding of the economic and policy intricacies that define Mauritius transformative development trajectory

Estimating Trade Elasticities Jaime Marquez, 2013-03-14 One cannot exaggerate the importance of estimating how international trade responds to changes in income and prices But there is a tension between whether one should use models that fit the data but that contradict certain aspects of the underlying theory or models that fit the theory but contradict certain aspects of the data The essays in *Estimating Trade Elasticities* book offer one practical approach to deal with this tension The analysis starts with the practical implications of optimising behaviour for estimation and it follows with a re examination of the puzzling income elasticity for US imports that three decades of studies have not resolved The analysis then turns to the study of the role of income and prices in determining the expansion in Asian trade a study largely neglected in fifty years of research With the new estimates of trade elasticities the book examines how they assist in restoring the consistency between elasticity estimates and the world trade identity

Profits, Politics and Panics Leo Goodstadt, 2007-10-01 Goodstadt brilliantly weaves a tapestry that resolves major puzzles about Hong Kong s growth as an international financial centre during this pivotal fifty year period This is a devastating expose of the consequences of the British colonial government s failure to effectively regulate banking and manage monetary policy David Meyer Washington University St Louis Leo F Goodstadt is adjunct professor in the School of Business Studies at Trinity College University of Dublin He was formerly deputy editor of the *Far Eastern Economic Review*

National Perspectives on Russia Maxine David, Jackie Gower, Hiski Haukkala, 2013-06-03 This book presents a ground breaking comparative study of the bilateral relations of all 27 EU member states with Russia and an assessment of their impact on the EU s efforts to conduct a coherent and effective policy towards its most important neighbour While there has been a lot of research on European foreign policy there has been much less on the role that national foreign policies play in it Based on a common analytical framework this book offers a detailed analysis of national perspectives on Russia and how they interact with and affect policymaking at the EU level The authors provide deep insights into the relationship between individual states and Russia looking at a range of policy areas economics trade energy security culture and education They are not only interested in examining policy failure but also probing the possibilities of seeing national foreign policies and the bilateralism with third parties that they often entail as a potentially positive resource for the European Union As Russia is an example of a particularly hard case for EU foreign policy this book yields important insights concerning the possibilities as well as limits of developing a common EU policy in the future It will be of interest to students and scholars of European politics EU Studies Russian politics foreign policy studies and international politics

Poverty Reduction and Beyond T. Shiraishi, T. Yamagata, S. Yusuf, 2009-06-25 This book highlights strategies for poverty reduction in developing countries with emphasis on the power of the market mechanism and vigor of the private sector focusing ODA on a few longer term challenges and leveraging advances in technology to the fullest and underlining the importance of human rights and security

Hong Kong SAR Monetary and Exchange Rate Challenges C. Schenk, 2008-11-28 Hong Kong SAR is now highly unusual as a large economy running a currency board system that pegs the Hong Kong Dollar to the US Dollar This volume explores the origins and persistence of this system presenting the viewpoint of several of the main protagonists in the operation of the currency board since 1983 as well as new research by academics

East Timor Hal Hill, Joao Mariano de Sousa Saldanha, 2001 As the world's newest independent nation the challenges facing East Timor are particularly acute Per capita income is roughly 300 making it one of the world's poorest nations There also remains the possibility of difficult relations with its giant neighbor Indonesia This comprehensive volume is the first serious analysis of East Timor's economic prospects It draws on local as well as international expertise from both academics and policy makers Issues covered include international economic relations agriculture finance and infrastructure and political institutions
