involved more than 200 researchers from 55 countries and relied on bottom up approaches to capture the SE phenomenon This strategy made it possible to take into account and give legitimacy to locally embedded approaches thus resulting in an analysis encompassing a wide diversity of social enterprises while simultaneously allowing for the identification of major SE models to delineate the field on common grounds at the international level These SE models reveal or confirm an overall trend towards new ways of sharing the responsibility for the common good in today s economies and societies We tend to consider as good news the fact that social enterprises actually stem from all parts of the economy Indeed societies are facing many complex challenges at all levels from the local to the global level The diversity and internal variety of SE models are a sign of a broadly shared willingness to develop appropriate although sometimes embryonic responses to these challenges on the basis of innovative economic business models driven by a social mission In spite of their weaknesses social enterprises may be seen as advocates for and vehicles of the general interest across the whole economy Of course the debate about privatisation deregulation and globalised market competition all factors that may hinder efforts in the search for the common good has to be addressed as well The first of a series of four ICSEM books Social Enterprise in Asia will serve as a key reference and resource for teachers researchers students experts policy makers journalists and other categories of people who want to acquire a broad understanding of the phenomena of social enterprise and social entrepreneurship as they emerge and develop across the world
