Sanchez-Flores, Mónica Judith Sánchez-Flores, 2006-08-30 In the spirit of communitarianism and dialogue between civilizations this ambitious book seeks a political philosophy where a diversity of world views can meet The main objective of the book is to propose a theoretical basis for convergence and to explain how it can be built After considering key positions in the current debate on political theory the author offers a theoretical solution to the seeming impossibility of universalizing an ethics of caring and responsibility [Deparochializing Political Theory for the Global Age](#) Melissa S. contexts and social structures Part II Political Cosmopolitanism sets out the main topics and issues dealt with by scholars writing within the tradition of political cosmopolitanism Addressing timely issues such as human rights global justice and global democracy it focuses on Cosmopolitanism as an ethico political ideal and a political project to devise new forms of supranational and transnational governance Part III Debates reflects the major debates and controversies on the subject and deliberately eschews any bland consensus to instead foreground the key arguments and lively intellectual discussions in play across disciplinary divisions Featuring contributions from key thinkers in the field including Ulrich Beck David Held and Martha Nussbaum this comprehensive volume will be a valuable resource for all academics and students working within this area of study

**Handbook of Political Citizenship and Social Movements** Hein-Anton van der Heijden, 2014-10-31 This Handbook uniquely collates the results of several decades of academic research in these two important fields The expert contributions successively address the

different forms of political citizenship and current approaches and recent development      **"We the People" in the Global Age** Ryō Ōshiba, Edward Joseph Rhodes, Chieko Kitagawa Ōtsuru, 2002      **Thinking with Rousseau** Helena Rosenblatt, Paul Schweigert, 2017-06-16 Although indisputably one of the most important thinkers in the Western intellectual tradition Rousseau's actual place within that tradition and the legacy of his thought remains hotly disputed *Thinking with Rousseau* reconsiders his contribution to this tradition through a series of essays exploring the relationship between Rousseau and other great thinkers Ranging from Rousseau and Machiavelli to Rousseau and Schmitt this volume focuses on the kind of intricate work that intellectuals do when they read each other and grapple with one another's ideas This approach is very helpful in explaining how old ideas are transformed and or transmitted and new ones are generated Rousseau himself was a master at appropriating the ideas of others while simultaneously subverting them and as the essays in this volume vividly demonstrate the resulting ambivalences and paradoxes in his thought were creatively mined by others      *The Ashgate Research Companion to Ethics and International Relations* Patrick Hayden, 2016-04-01 While skepticism about the role of moral considerations in international politics has been influential within the discipline of international relations IR those writing on topics such as war peace rights and trade up until the twentieth century took seriously the importance of ethical values and moral debates The 1990s and 2000s have seen a substantial growth of attention to the ways in which IR conceives and analyzes themes of an ethical nature and how issues problems and policies involving ethics are addressed by a variety of actors within the international system This indispensable research companion widens the perspective from ethics and international relations to ethics in international relations redressing the mis perception that ethical concepts principles norms and rules are not in part constitutive of the international system and the agents acting within that system Necessarily cross disciplinary expertise is drawn from IR and also philosophy political theory religious studies history and law making this an ideal volume for any library reference collection      **Global Responsibilities** Andrew Kuper, 2012-11-12 In *Global Responsibilities* some of the world's leading theorists of ethics politics international relations and economics including Nobel Prize winner Amartya Sen and philosopher Peter Singer ask and answer the question Who must deliver on human rights

Questioning Cosmopolitanism Stan van Hooft, Wim Vandekerckhove, 2010-06-16 Wim Vandekerckhove and Stan van Hooft The philosopher Diogenes the Cynic in the fourth century BCE was asked where he came from and where he felt he belonged He answered that he was a citi 1 zen of the world kosmopolit s This made him the rst person known to have described himself as a cosmopolitan A century later the Stoics had developed that concept further stating that the whole cosmos was but one polis of which the order was logos or right reason Living according to that right reason implied showing goodness to all of human kind Through early Christianity cosmopolitanism was given various interpretations sometimes quite contrary to the inclusive notion of the Stoics Augustine's interpretation for example suggested that only those who love God can live in the universal and borderless City of God Later the red covery of Stoic writings during the European Renaissance inspired

thinkers like Erasmus Grotius and Pufendorf to draw on cosmopolitanism to advocate world peace through religious tolerance and a society of states That same inspiration can be noted in the American and French revolutions In the eighteenth century enlightenment philosophers such as Bentham through utilitarianism and Kant through universal reason developed new and very different versions of cosmopolitanism that serve today as key sources of cosmopolitan philosophy The nineteenth century saw the development of new forms of transnational ideals including that of Marx's critique of capitalism on behalf of an international working class

*Actualizing Human Rights* Jos Philips, 2020-05-13 This book argues that ultimately human rights can be actualized in two senses By answering important challenges to them the real world relevance of human rights can be brought out and people worldwide can be motivated as needed for realizing human rights Taking a perspective from moral and political philosophy the book focuses on two challenges to human rights that have until now received little attention but that need to be addressed if human rights are to remain plausible as a global ideal Firstly the challenge of global inequality how if at all can one be sincerely committed to human rights in a structurally greatly unequal world that produces widespread inequalities of human rights protection Secondly the challenge of future people how to adequately include future people in human rights and how to set adequate priorities between the present and the future especially in times of climate change The book also asks whether people worldwide can be motivated to do what it takes to realize human rights Furthermore it considers the common and prominent challenges of relativism and of the political abuse of human rights This book will be of key interest to scholars and students of human rights political philosophy and more broadly political theory philosophy and the wider social sciences The Open Access version of this book available at <https://www.taylorfrancis.com/books/9781003011569> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

**Global Theory from Kant to Hardt and Negri** G. Browning, 2011-07-26 Global theory represents an influential and popular means of understanding contemporary social and political phenomena Human identity and social responsibilities are considered in a global context and in the light of a global human condition A global perspective is assumed to be new and to supersede preceding social theory However if contemporary global theory is influential its identity assumptions and novelty are controversial Global Theory from Kant to Hardt and Negri scrutinises global theory by examining how contemporary global theorists simultaneously draw upon and critique preceding modern theories It rethinks contemporary global ideas by relating them to the social thought of Kant Hegel and Marx and in so doing highlights divergent ambiguous aspects of contemporary global theories as well as the continuing impact of the ideas of Kant Hegel and Marx

*Social Justice, Global Dynamics* Ayelet Banai, Miriam Ronzoni, Christian Schemmel, 2011-04-06 Many theoretical publications make assumptions about the facts of globalization and in particular about the role and autonomy of the nation state These factual claims and assumptions often play an important role in justifying the normative conclusions yet remain under explored This interdisciplinary volume examines questions that are central to the problems of both social and

international justice and in particular to their interdependence How do global and transnational factors influence the capacity of states to be internally just Has the state lost its capacity for autonomous action in the global economy and thus its ethical significance for theories of justice If so which institutional reforms could address this problem What is the role of the state in a just international order The authors address important connections between domestic social justice and global dynamics by identifying problematic practices and trends in the current global order They examine political economic and legal changes and offer normative views on concrete policies and institutions that are particularly important and or problematic i e international health policies the World Bank taxation policies and the World Trade Organization Focusing on the relationship between social and global justice and establishing connections between political theory and empirical research this book is vital reading for students and scholars of Politics International Relations and Development Studies

*Society and Education* Stavros Moutsios, 2017-07-20 Society and Education explores the relation of society to education in Europe as well as its comparative perspective towards overseas societies and their institutions It is an enquiry into the social historical institution of education and cross cultural studies in Europe Elaborating on the Castoriadian ontology the book delves into the magma of social imaginary significations that characterise and associate pivotal epochs of the continent's history Classical Greece and Modernity and exemplifies their incarnation in educational systems and in the formation of the European and in general the Western comparative gaze With a particular focus on our epoch Postmodernity and globalisation the study traces the pervasive dominance of capitalist significations in social institutions forms and activities as well as in education and the way it is compared across countries Nevertheless as Moutsios suggests the European tradition notwithstanding its ideological usage by much of social sciences contains an indissoluble critical and self reflective dimension which needs to be sustained and advanced in education and its cross cultural comparison perhaps more than ever before The book demonstrates the embeddedness of education in its cultural context and should therefore be of great interest to academics researchers and postgraduate students who are involved with comparative education the sociology and history of education education policy and European studies
