Political Science Behavioral and Social Sciences Survey. Political Science Panel, 1969 This is a report on political science and its role in the future Resources in Education ,1973-05 **Research in Education** ,1971 *Behavioralism in Political Science* Richard J. Gelles, 2017-09-08 Changes in the thinking of science are usually accompanied by lively intellectual conflicts between opposing or divergent points of view The clash of ideas is a major ingredient in the stimulation of the life of the mind in human culture Such arguments and counter arguments of proofs and disproofs permit changes in the arts and sciences to take place Political science is not exempt from these conflicts Since the middle of the twentieth century the study of politics has been rocked by disagreements over its scope theories and methods These disagreements were somewhat less frequent than in most sciences natural or behavioral but they have been at times bitter and persuasive The subject matter of political science politics and all that is involved in politics has a halo effect The stakes of politics make people fight and sometimes die for what they claim as their due Political scientists seem to confuse academic with political stakes behaving as if the victories and defeats on the battleground of the intellect resemble those on the battleground of political life Three issues seem critical to political science at the time this volume first appeared in the 1960s First disagreement over the nature of the knowledge of political things is a science of politics possible or is the study of politics a matter of philosophy Second controversy over the place of values in the study of politics a controversy that makes for a great deal of confusion Third disagreements over the basic units of analysis in the study of politics should the political scientist study individual and collective behavior or limit the work to the study of institutions and large scale processes This collection brings together the most persuasive writings on these topics in the mid 1960s **Educational Research and Development in the United States** National Center for Educational Research and Development (U.S.), 1969 Study prepared for the OECD on the present status and future growth of research and development in respect of educational research in the USA covers the organization of primary education secondary education and higher education examines economic resources management technique and impact of educational policy and practice and concludes that the absence of an overall strategy inadequate financial support labour shortage and imperfect statistical tables are the main obstacles to educational development **Full Opportunity Act** United States. Survey Research in the Social Sciences Charles Y. Glock, John Bennett, 1967-12-31 Survey research was for a long time thought of primarily as a sociological tool It is relatively recently that this research method has been adopted by other social sciences and related professional disciplines The amount and quality of its use however vary considerably from field to field This volume describes the elementary logic of survey design and analysis and provides for each discipline an evaluation of how survey research has been used and conceivably may be used to deal with the central problems of each field
