Labour Theory of Culture Charles Woolfson, 2013-04-15 Despite its importance in understanding the social relations of labour little attention has been paid by Western Marxists to evolutionary theory Taking as a starting point an unfinished essay by Engels the author argues that the human species must be seen as discontinuous with its nearest biological ancestors that a qualitative distinction was brought about by social labour It is argued that the most likely forms of human organization were co-operative and field studies are discussed which apparently provide evidence for tool use and linguistic ability among the higher primates The relationship between hand and brain in terms of Marxist psychology is also elaborated

dimensions such as integration co operation development trade and investments this book highlights the intricate and complex relationships between East African states and it will be of interest to researchers working on economic development international relations peace and security and African studies

EMPIRE STRIKES BACK Centre for Contemporary Cultural Studies,2004-08-02 First Published in 1982 The Empire Strikes Back examines the place of race and racism in the political transformation of Britain at the end of the seventies and argues that Britain has entered a longterm political and economic crisis which has brought new urgency to the politics of race and nation The authors explore the elements of a new culturally focused racism which in representations of black families stresses their alienness and the supposed criminal inclinations of the black population They argue that the British state is very far from its popular image as a liberal democracy and that all our notions of culture nation and class are based on deeply racist structures Key areas of state intervention such as schooling policing and policy oriented race relations research are analysed to demonstrate that a definition of the growing crisis in the economy and social services is emerging which shifts the focus of blame on to black people The authors argue that existing race relations theory has significantly failed to deal adequately with the British situation In particular the experience of black women and the political organization of young black people raises major problems for race blind feminism and Eurocentric Marxism alike In conclusion the book assesses the political relation of race to class and suggests that any long term struggle against racism must begin by recognizing the autonomy of black struggles at all levels of British society

Far Right Parties and Euroscepticism Sofia Vasilopoulou, 2017-12-28 Why do parties that belong to the same party family address the EU question differently This book addresses this question through a systematic analysis of the EU positions of far right parties in Europe Starting from the assumption that far right parties are rational actors the book argues that the way in which they may interpret structural incentives depends on their relationship with democracy their attitude towards the polity their target electorate social basis and their behaviour towards competitors Classification on these indicators leads to the identification of three far right party models anti system anti liberal and normalised Given that the EU is a core issue in far right parties toolkit it becomes a key policy in party competition Anti system far right parties tend to opt for a rejectionist position on the EU anti liberal far right parties tend to be conditional Eurosceptics and normalised far right parties tend to adopt a compromising position on the EU The specific Eurosceptic frame that parties may prioritise depends on the domestic political context and how they may perceive national identity This book's findings are relevant in light of Europe's political and economic crises and rising public support for Eurosceptic ideas and far right parties
