Porter,2021-02-09 The term classical is used to describe everything from the poems of Homer to entire periods of Greek and Roman antiquity But just how did the concept evolve This collection of essays by leading classics scholars from the United States and Europe challenges the limits of the current understanding of the term The book seeks not to arrive at a final definition but rather to provide a cultural history of the concept by exploring how the meanings of classical have been

created recreated and rejected over time The book asks questions that have been nearly absent from the scholarly literature Does classical refer to a specific period of history or to the artistic products of that time How has its definition changed Did those who lived in classical times have some understanding of what the term classical has meant How coherent consistent or even justified is the term The book's introduction provides a generous theoretical and historical overview It is followed by eleven chapters in which the contributors argue for the existence not of a single classical past but of multiple competing classical pasts The essays address a broad range of topics Homer and early Greek poetry and music Isocrates Hellenistic and Roman art Cicero and Greek philosophy the history of Latin literature imperial Greek literature and more The most up to date and challenging treatment of the topic available this collection will be of lasting interest to students and scholars of ancient and modern literature art and cultural history

Counternarratives Henry A. Giroux, Colin Lankshear, Peter McLaren, Michael Peters, 2013-05-13 To understand contemporary times we must appreciate the extent to which our lives are affected by the cultural and political struggle between official narratives and the counternarratives which emerge as oppositional responses Counternarratives develops a concept of postmodern counternarratives as a frame for exploring the politics of media technology and education within everyday struggles for human identities and loyalties The authors identify two forms of counternarratives One functions as a critique of the modernist propensity for grand narratives The second concept which is the focus of the book builds on the first the idea of little stories addressing cultural and political opposition to the official narratives used to manipulate public consciousness Each marks an important point of contestation within contemporary education and culture curriculum pedagogy literacy media representations and applications of new technologies

Landscapes of Power Sharon Zukin, 1993-03-12 The momentous changes which are transforming American life call for a new exploration of the economic and cultural landscape In this book Sharon Zukin links our ever expanding need to consume with two fundamental shifts places of production have given way to spaces for services and paperwork and the competitive edge has moved from industrial to cultural capital From the steel mills of the Rust Belt to the sterile malls of suburbia to the gentrified urban centers of our largest cities the creative destruction of our economy a process by which a way of life is both lost and gained results in a dramatically different landscape of economic power Sharon

Zukin probes the depth and diversity of this restructuring in a series of portraits of changed or changing American places Beginning at River Rouge Henry Ford s industrial complex in Dearborn Michigan and ending at Disney World Zukin demonstrates how powerful interests shape the spaces we inhabit Among the landscapes she examines are steeltowns in West Virginia and Michigan affluent corporate suburbs in Westchester County gentrified areas of lower Manhattan and theme parks in Florida and California In each of these case studies new strategies of investment and employment are filtered through existing institutions experience in both production and consumption and represented in material products aesthetic forms and new perceptions of space and time The current transformation differs from those of the past in that individuals and institutions now have far greater power to alter the course of change making the creative destruction of landscape the most important cultural product of our time Zukin s eclectic inquiry into the parameters of social action and the emergence of new cultural forms defines the interdisciplinary frontier where sociology geography economics and urban and cultural studies meet

Classical and Modern Interactions Karl Galinsky, 1992-01-01 Postmodernism multiculturalism the alleged decline of the United States deconstruction leadership and values these topics have been at the forefront of contemporary intellectual and cultural debate and are likely to remain so through the 1990s Participants in the debate can usefully enlarge the perspective to a comparison between the Greco Roman world and contemporary society In this thought provoking work a noted classics scholar tests the ancient modern comparison showing what it can add to the contemporary debates and what its limitations are Writing for intellectually adventurous readers Galinsky explores Greece and Rome as multicultural societies debates the merits of classicism in postmodern architecture discusses the reign of Augustus in terms of modern leadership theories and investigates the modern obsession with finding parallels between the supposed decline and fall of Rome and the decay of U S society Within these discussions Galinsky

shows the continuing vitality of the classical tradition in the contemporary world The Greek and Roman civilizations have provided us not only with models for conscious adaptation but also points for radical departures This ability to change and innovate from classical models is crucial Galinsky maintains It creates a reciprocal process whereby contemporary issues are projected into the past while aspects of the ancient world are redefined in terms of current approaches These essays result in a balanced assessment and stimulating restatement of some major issues in both contemporary U S society and the Greco Roman world The book which speaks to a wide interdisciplinary audience is based on a series of lectures that Galinsky gave as a national visiting scholar for Phi Beta Kappa It concludes with a discussion of the role of classical studies in the United States today
