Pardalos, Rentsen Enkhbat, Ider Tseveendori, 2010-07-07 Optimization and optimal control are the main tools in decision making Because of their numerous applications in various disciplines research in these areas is accelerating at a rapid pace Optimization and Optimal Control Theory and Applications brings together the latest developments in these areas of research as well as presents applications of these results to a wide range of real world problems. This volume can serve as a useful resource for researchers practitioners and advanced graduate students of mathematics and engineering working in research areas where results in optimization and optimal control can be applied **Quasidifferentiability and Nonsmooth Modelling in Mechanics**, **Engineering and Economics** Vladimir F. Demyanov, Georgios E. Stavroulakis, L.N. Polyakova, P. D. Panagiotopoulos, 2013-11-21 Nonsmooth energy functions govern phenomena which occur frequently in nature and in all areas of life They constitute a fascinating subject in mathematics and permit the rational understanding of yet unsolved or partially solved questions in mechanics engineering and economics This is the first book to provide a complete and rigorous presentation of the quasidifferentiability approach to nonconvex possibly nonsmooth energy functions of the derivation and study of the corresponding variational expressions in mechanics engineering and economics and of their numerical treatment The new variational formulations derived are illustrated by many interesting numerical problems. The techniques presented will permit the reader to check any solution obtained by other heuristic techniques for nonconvex nonsmooth energy problems A civil mechanical or aeronautical engineer can find in the book the only existing mathematically sound technique for the formulation and study of nonconvex nonsmooth energy problems Audience The book will be of interest to pure and

applied mathematicians physicists researchers in mechanics civil mechanical and aeronautical engineers structural analysts and software developers It is also suitable for graduate courses in nonlinear mechanics nonsmooth analysis applied optimization control calculus of variations and computational mechanics **Encyclopedia of Optimization** Christodoulos A. Floudas, Panos M. Pardalos, 2008-09-04 The goal of the Encyclopedia of Optimization is to introduce the reader to a complete set of topics that show the spectrum of research the richness of ideas and the breadth of applications that has come from this field The second edition builds on the success of the former edition with more than 150 completely new entries designed to ensure that the reference addresses recent areas where optimization theories and techniques have advanced Particularly heavy attention resulted in health science and transportation with entries such as Algorithms for Genomics Optimization and Radiotherapy Treatment Design and Crew Scheduling **Multivalued Analysis and Nonlinear Programming Problems with Perturbations** B. Luderer, L. Minchenko, T. Satsura, 2013-03-09 The book presents a treatment of topological and differential properties of multivalued mappings and marginal functions In addition applications to sensitivity analysis of nonlinear programming problems under perturbations are studied Properties of marginal functions associated with optimization problems are analyzed under guite general constraints defined by means of multivalued mappings A unified approach to directional differentiability of functions and multifunctions forms the base of the volume Nonlinear programming problems involving quasidifferentiable functions are considered as well A significant part of the results are based on theories and concepts of two former Soviet Union researchers Demyanov and Rubinov and have never been published in English before It contains all the necessary information from multivalued analysis and does not require special knowledge but assumes basic knowledge of calculus at an undergraduate level Fuzzy Engineering and Operations Research Bing-Yuan Cao, Xiang-Jun Xie, 2012-06-30 Fuzzy Engineering and Operations Research is the edited outcome of the 5th International Conference on Fuzzy Information and Engineering ICFIE2011 held during Oct 15 17 2011 in Chengdu China and by the 1st academic conference in establishment of Guangdong Province Operations Research Society GDORSC held on Oct 20 2011 in Guangzhou China The 5th ICFIE2011 built on the success of previous conferences and the GDORC first held are major Symposiums respectively for scientists engineers practitioners and Operation Research OR researchers presenting their updated results developments and applications in all areas of fuzzy information and engineering and OR It aims to strengthen relations between industry research laboratories and universities and to create a primary symposium for world scientists in Fuzziology and OR fields The book contains 62 papers and is divided into five main parts Fuzzy Optimization Logic and Information The mathematical Theory of Fuzzy Systems Fuzzy Engineering Applications and Soft Computing Methods OR and Fuzziology and Guess and Review Convex Optimization—Theory, Algorithms and Applications Balendu Bhooshan Upadhyay, Shashi Kant Mishra, Pierre Maréchal, 2025-04-25 This volume includes chapters on topics presented at the conference on Recent Trends in Convex Optimization Theory Algorithms and Applications
