Quebec From The Air From Season To Season:

Quebec from the Air Pierre Lahoud, Henri Dorion, 2003-04 It takes two pairs of eyes to see things as they really are The photographer and geographer are therefore placed side by side in order to take a good look at Quebec from the beneficial perspective of a bird's eye view From that height to be able to see the thousands of scenes that make up this land one feels the rhythm of space with the arrangement of its geographic zones and the mosaic of form and colour designed by nature or the hand of man As one follows the long journey transcribed by the 230 photographs in this book one also discovers the rhythm of passing time the hours of the day as well as the seasons even geological eras Here Pierre Lahoud and Henri Dorion both acutely sensitive to our natural and human heritage share their perspective on Quebec's territory observed from a divertingly unusual angle Enjoy the flight

Quebec Francois Remillard, Ulysses Travel Guides, 2003-04 This practical guide covers all of Quebec with a special section that examines its various Aboriginal communities distinct architecture and unique linguistic expressions Maps Illustrations
