Architecture in Transition Kelly Crossman,1987-11-01 However behind the public face of design architectural life in Canada during the 1880s and 1890s was in turmoil The Canadian public had lost confidence in its designers students were forced to study abroad to secure a first class education professional rivalry was unscrupulous architectural competitions a scandal American architects and their architecture were the fashion These things changed but not before the world of the Canadian architect had been turned on its head replaced by one which resembled the world of contemporary architects with

professional organisations regulated standards formalised education centred in the universities and the belief that Canadian architecture should reflect local climates culture and geography Kelly Crossman provides the first analysis of this period Beginning with a review of the architectural milieu in Toronto and Montreal in the 1880s he traces the rise of professionalism as an idea and architectural nationalism as a goal His analysis is more a history of architectural ideas than a survey of forms It places the architecture of these years in an historical and ideological context demonstrating that it developed with its own logic in response to national and international factors During the two decades after 1885 Canadian architects grappled with problems whose long term implications they could not have foreseen the role of the architect in industrialised society the need to accommodate and integrate applied science and the need to express their own and their country s personality in architectural form By the beginning of this century they had begun to find their own voice The story of this process will be of interest not just to students and scholars but to anyone interested in the development of Canada and its architecture

Building Regulations and Urban Form, 1200-1900 Terry R. Slater, Sandra M.G. Pinto, 2017-09-20 Towns are complicated places It is therefore not surprising that from the beginnings of urban development towns and town life have been regulated Whether the basis of regulation was imposed or agreed ultimately it was necessary to have a law based system to ensure that disagreements could be arbitrated upon and rules obeyed The literature on urban regulation is dispersed about a large number of academic specialisms However for the most part the interest in urban regulation is peripheral to some other core study and consequently there are few texts which bring these detailed studies together This book provides perspectives across the period between the high medieval and the end of the nineteenth century and across a geographical breadth of European countries from Scandinavia to the southern fringes of the Mediterranean and from Turkey to Portugal It also looks at the way in which urban regulation was transferred and adapted to the colonial empires of two of
