**Culture in Education and Education in Culture** Pernille Hviid, Mariann Märtsin, 2019-11-18 In a world where the global engagement and international dialogue intensifies some areas of cultivated knowledge suffer from this dialogue and this has consequences for people and communities We propose education to be such a case The global dialogue

in education tends to be restricted to and mediated by standardized measurements. Such standards are meant to measure qualities of education and of student behavior and create the sought-for condition for normative comparability and competition. The obvious drawback is that cultural variability in local living as well as in education is rendered irrelevant. Are there alternatives? The book insists on maintaining the discussion about education on a global level but rather than moving towards homogenization and standardization of education, the attention is drawn towards the potential for learning from creative fits and misfits between concrete local cultures, institutional practices and global aims and standards of education. This work brings together a group of educational and developmental researchers and scholars grappling to find culturally informed and sensitive modes of educating people and communities. Case studies and examples from four geographical contexts are being discussed: China, Brazil, Australia and Europe. While being embedded in these local cultures, the authors share a conceptual grounding in cultural developmental theorizing and a vision for a culturally informed globalized perspective on education. As the theme of the book is learning from each other, the volume also includes commentaries from leading scholars in the field of cultural psychology and education.

**A History of Literacy Education** Robert J. Tierney, P. David Pearson, 2021. In this volume, two notable scholars trace the monumental shifts in theory, research and practice related to reading education and literacy with particular attention to what they consider the central goal of literacy: making meaning. Each section describes a specific epoch, including a brief snapshot of how the reader of that period is envisioned and characterized by researchers and teachers, as well as a deep discussion of the ideas and contextual events of that era. These developmental waves are organized in rough historical sequence by a series of shifts in underlying theoretical and scholarly lenses: from the behavioral to the psycholinguistic to the cognitive to the sociocultural to the critical to the multimodal to the global. The book closes with a discussion of the various research frames and methodological approaches that paralleled these developments. Throughout, there is a profound recognition that all research and practice are ultimately directed toward how students make meaning from sound to letter to word to ideas and images. **Book Features:** Animates some of the revolutionary developments related to reading education and literacy in modern times. Each development is accompanied by a discussion of the aspirational reader that sets the stage for contemplating these shifts and their significance. Traces the research and theoretical developments to illustrate the origins of the shifts and their influences. Supported by a website with video lectures and conversations tied to the various waves of development.

*Outlooks and Opportunities in Blended and Distance Learning* Tynan, B., 2013-06-30. In a contemporary media-rich society, distance education is becoming increasingly indistinguishable from mainstream traditional methods. Contemporary students too have greater need than ever before for education that caters to their specific needs and hectic schedules. *Outlooks and Opportunities in Blended and Distance Learning* investigates the impact of the digital age on various methods of distance education such as e-learning, virtual learning, online learning and m-learning. Researchers, educators and students currently engaged in or looking to implement

distance education principles in their own practices will find a seminal reference collection exploring new methods of offering flexibility accessibility and freedom to students with a variety of educational backgrounds situations and needs

**Changing Theories And Practices Of Discipline** Roger Slee,2020-04-03 Behaviour problems in our schools occupy a considerable part of the education agenda and media attention The major thrust of the literature has been on the provision of new classroom management approaches Too often these packages are inappropriate to the specific context of the school and its pupils There are no quick fix solutions In this book Slee proposes a critical re examination of the school discipline issue In doing so he provides an overview of policy change an examination of the major schools of thought on student discipline a reconsideration of the context in which young people teachers and schools now find themselves and practical responses for addressing all levels of discipline policy making *Australian National Bibliography* ,1978

**Career Development as a Partner in Nation Building Australia** Wendy Patton,2019-07-15 Despite examples of vocational guidance practice being evident in Australia since the mid 1800s there remains a spasmodic and patchwork approach to practice across the country For decades it is a field which has been paradoxically boosted and challenged by changing economic and political agendas Repeated international national and State reviews emphasise the vital nature of a systemic national approach to career development however authors repeatedly lament the lack of a sustained focus on career activity as a major national priority There is no broad comprehensive historical reckoning of the history of career development theory and practice in Australia since this early period Career development theory and practice in Australia has been forged in partnership with developments in an international context In documenting the shared history with other countries the author significantly adds to the body of knowledge on career development as a field in Australia and internationally The book provides new understandings about the historical development of this field of knowledge and in particular the challenging and cyclical nature of its policy history

**Imagination for Inclusion** Derek Bland,2016-02-12 Imagination for Inclusion offers a reconsideration of the ways in which imagination engages and empowers learners across the education spectrum from primary to adult levels and in all subject areas Imagination as a natural expedient and exciting learning tool should be central to any approach to developing and implementing curriculum but is increasingly undervalued as learners progress through the education system this disregards not only imagination s potential but its paramount place in informing truly inclusive approaches to teaching and learning This book presents a new theory of imagination and includes discussion about its application to teaching and learning to increase the engagement of disaffected students and reinvigorate their relationships with curriculum content Chapters include key ideas and discussion surrounding the benefits of introducing imaginative practices into the classroom for learners from a range of marginalised backgrounds such as young people with disabilities and adult learners from socio economically disadvantaged environments In exploring imagination in the practice of inclusive education the book includes chapters from researchers and practitioners in education who have fresh ideas about how

learners and teachers have benefited from introducing imaginative pedagogies The diverse collection featuring writers with backgrounds from early childhood to adult education will be essential reading for academics and researchers in the fields of education inclusive education social policy professional development teacher education and creativity It will be of particular interest to current and pre service teachers who want to develop inclusive practice and increase the engagement of all students with formal education

**Workforce Development** Roger Harris, Tom Short, 2013-11-19 This book captures the essence of current workforce development perspectives and draws on extensive global research to uncover a range of issues confronting organisations Taking primarily an Australian outlook after the global financial crisis and tracing the progress of a national industry sector each chapter delves into a major area of interest for leaders Overall the authors make the case that workforce development is an amalgam of activities influenced by context politics and economic development As the world becomes increasingly connected and mobile workforce development is proving to be a major activity for organisations because it impacts their longer term survival and growth To stay ahead successful organisations focus on attracting building engaging and retaining talented people However in a financially turbulent era where strategy changes quickly workforce development must not only plan and build the capabilities of people at work but also contribute to making employment more socially sustainable for a better world This book provides a thought provoking collection of scholarly work for business leaders human resource practitioners and academics working in adult education business psychology and social science disciplines At the same time it adopts an accessible style for students and others who want to know more about the development of people at work

Educating Students with Disabilities in Queensland Independent Christian Schools Dr. David Mercer, 2018-08-27 In recent decades in Australia as elsewhere students with disabilities SWD have been increasingly introduced to mainstream schools This reflects both changes in social attitudes towards young people with a disability and changes in the policy environment for disability and education At the same time independent schools in Australia have been growing both in number and rate but as Prasser 2009a has indicated the numbers of SWD in independent schools are not growing at a proportional rate In Christian independent schools policy issues with regard to SWD collide with central tenets of the Christian faith and the business models in which these schools operate and these may generate tensions and problems with regard to educating these students This study sought to explore the issues surrounding educating SWD in a number of regional independent schools in the state of Queensland Australia It sought to uncover uniquely Christian approaches to educating SWD by exploring a the perspectives of principals of these independent Christian schools b tensions between faith and policy and c issues surrounding the mainstreaming of SWD The research used methods of qualitative data collection and analysis In depth interviews with ten principals of regional independent schools in Queensland RICSQ provided the primary form of data collection complemented by data gained from studies of relevant documents Data analysis involved two stages i thematic analysis and ii discourse analysis Surprisingly the findings from these analyses showed that the enrolment of

students with disabilities in the RICSQ privileged a secular business discourse above Christian concerns With regard to the education of SWD these principals were clearly facing a dichotomous tension between the expectations of their faith and those of having to lead sizeable business organisations In particular the critical policy moment for educating SWD in RICSQ came at the point of enrolment The outcomes of the study have highlighted the tensions facing principals in these schools in educating SWD and may provide evidence for principals school boards and others in the development of policy for SWD in independent schools They also highlight a need for more widespread perhaps quantitative research around the education of SWD in such schools and this may also have implications for the education of such students in other schools and systems
