Ques First Look At Chicago:

Questions Veneeta Dayal, 2016 This book synthesizes and integrates 40 years of research on the semantics of questions and its interface with pragmatics and syntax conducted within the formal semantics tradition A wide range of topics are covered including weak strong exhaustiveness maximality functional answers single multiple trapped list answers embedding predicates quantificational variability concealed questions weak islands polar and alternative questions negative polarity and non canonical questions The literature on this rich set of topics theoretically diverse and scattered across multiple venues is often hard to assimilate Veneeta Dayal drawing on her own research brings them together for the first time in a coherent concise and well structured whole Each chapter begins with a non technical introduction to the issues discussed semantically sophisticated accounts are then presented incrementally with the major points summarized at the end of each section Written in an accessible style this book provides both a guide to one of the most vibrant areas of research in natural language and an account of how this area of study is developing It will be a unique resource for the novice and expert alike and seeks to appeal to a variety of readers without compromising depth and breadth of coverage

The Questions of Jesus in John Douglas Charles Estes, 2012-10-19 Why do the New Testament gospels depict a Jesus who asks questions almost as often as he gives answers In The Questions of Jesus in John Douglas Estes crafts a highly interdisciplinary theory of question asking based on insights from ancient rhetoric and modern erotetics the study of interrogatives in order to investigate the logical and rhetorical purposes of Jesus questions in the Gospel of John While scholarly discussion about Jesus cares more for what he says and not what he asks Estes argues a better understanding of the rhetorical and dialectical roles of questions in ancient narratives sheds a more accurate light on both John's narrative art and Jesus message in the Fourth Gospel

The Intonation of English Statements and Questions Christine Bartels, 2014-04-04 English sentence prosody provides cues to both focus structure and speaker attitude Taking the phonological model of intonation developed by Pierrehumbert 1880 et seq as point of departure this work illuminates the communicative function of English pitch contours by 1 giving a detailed survey of phrase final contours found in statements and questions and 2 investigating what attitudinal features determine choice of phrasal tones in these utterance types This comprehensive study will be of interest to linguists in a number of fields ranging from prosody to

semantics pragmatics and discourse analysis *The Syntax of Yes and No* Anders Holmberg, 2015-12-10 This book is a cross linguistic study of the syntax of yes no questions and their answers drawing on data from a wide range of languages with particular focus on English Finnish Swedish Thai and Chinese There are broadly two types of answer to yes no questions those that employ particles such as yes and no as found in English and those that echo a part of the question usually the finite verb with or without negation as found in Finnish The latter are uncontroversially derived by ellipsis while the former have been claimed to be clause substitutes Anders Holmberg argues instead that even answers that employ particles are complete sentences derived by ellipsis from full sentential expressions and that the two types share essential syntactic properties The book also examines the related cross linguistic and intralinguistic variation observed in answers to negative questions such as does he not drink coffee whereby yes in one language appears to correspond to no in another The book illustrates how a seemingly trivial phenomenon can have the most wide ranging consequences for theories of language and will be of interest not only to theoretical linguists but also to students and scholars of typological and descriptive linguistics

Biased questions : Experimental results and theoretical modelling Tue Trinh, Anton Benz, Daniel Goodhue, Kazuko Yatsushiro, Manfred Krifka, 2025-09-24 Asking a question means essentially presenting the hearer with a set of propositions with the request that she choose from it those that are true It is a well known fact about natural language that questions can be biased the propositions presented are not all equal so to speak For example the speaker's belief or contextual evidence might favor some against others The formal means employed by grammar to express such biases have been of interest to linguists for a long time and the investigation is still on going The contributions in this volume all pertain to biased questions They grew out of talks presented at the workshop Biased Questions Experimental Results and Theoretical Modelling which took place at the Leibniz Zentrum Allgemeine Sprachwissenschaft as part of the ERC project Speech Acts in Grammar and Discourse SPAGAD The papers are written by mostly senior researchers of different expertise who have previously published on the same topic and explore this fascinating linguistic phenomenon from a variety of theoretical angles pragmatics semantics syntax phonology psychology and acquisition The languages under discussion include Chinese English Hungarian Russian Turkish and Vietnamese The collection provides the reader with a rich set of data and several open issues for future research

Questions and Rhetoric in the Greek New Testament Douglas Estes, 2017-03-28 While there are almost 1000 questions in the Greek New Testament many commentators pastors and students skip over the questions for more theological verses or worse they convert questions into statements to mine them for what they are saying theologically However this is not the way questions in the Greek New Testament work and it overlooks the rhetorical importance of questions and how they were used in the ancient world Questions and Rhetoric in the Greek New Testament is a helpful and thorough examination of questions in the Greek New Testament seen from the standpoint of grammatical semantic and linguistic analysis with special emphasis on their rhetorical effects It includes charts tools and lists that explain and categorize the

almost 1000 questions in the Greek New Testament Thus the user is able to go to the section in the book dealing with the type of question they are studying and find the exegetical parameters needed to understand that question Questions and Rhetoric in the Greek New Testament offers vibrant examples of all the major categories of questions to aid the reader in grasping how questions work in the Greek New Testament Special emphasis is given to the way questions persuade and influence readers of the Greek New Testament *Asking and Answering* Moritz Cordes, 2021-12-10 Questions are everywhere and the ubiquitous activities of asking and answering as most human activities are susceptible to failure at least from time to time This volume offers several current approaches to the systematic study of questions and the surrounding activities and works toward supporting and improving these activities The contributors formulate general problems for a formal treatment of questions investigate specific kinds of questions compare different frameworks with regard to how they regulate the activities of asking and answering of questions and situate these activities in a wider framework of cognitive epistemic discourse From the perspectives of logic linguistics epistemology and philosophy of language emerges a report on the state of the art of the theory of questions Parentheticals in Spoken English Nicole Dehé, 2014-06-05 Taking both an empirical and a theoretical view of the prosodic phrasing of parentheticals in English this book reviews the syntactic and prosodic literature on parentheticals along with relevant theoretical work at the syntax prosody interface It offers a detailed prosodic analysis of six types of parentheticals full parenthetical clauses non restrictive relative clauses nominal appositions comment clauses reporting verbs and question tags all taken from the spoken part of the British Component of the International Corpus of English To date the common assumption is that by default parentheticals are prosodically phrased separately an assumption which as this study shows is not always in line with the predictions made by current prosodic theory The present study provides new empirical evidence for the prosodic phrasing of parentheticals in spontaneous and semi spontaneous spoken English and offers new implications for a theory of linguistic interfaces *True to Form* Christine Gunlogson, 2004-06-01 This book is concerned with the meaning and use of two kinds of declarative sentences 1 It s raining 2 It s raining The difference between 1 and 2 is intonational 1 has a final rise indicated by the question mark while 2 ends with a fall Christine Gunlogson s central claim is that the meaning and use of both kinds of sentences must be understood in terms of the meaning of their defining formal elements namely declarative sentence type and rising versus falling intonation Gunlogson supports that claim through an investigation of the use of declaratives as questions On one hand Gunlogson demonstrates that rising and falling declaratives share an aspect of conventional meaning attributable to their declarative form distinguishing them both from the corresponding polar interrogative Is it raining and constraining their use as questions On the other hand since 1 and 2 constitute a minimal pair differing only in intonation systematic differences in character and function between them in particular the relative naturalness of 1 as a question compared to 2 must be located in the contrast between the fall and the rise To account for these two sets of differences Gunlogson gives a compositional

account of rising and falling declaratives under which declarative form expresses commitment to the propositional content of the declarative Rising versus falling intonation on declaratives is responsible for attribution of the commitment to the Addressee versus the Speaker respectively The result is an inherent contextual bias associated with declaratives which constitutes the crucial point of difference with interrogatives The compositional analysis is implemented in the framework of context update semantics Heim 1982 and others using an articulated version of the Common Ground Stalnaker 1978 that distinguishes the commitments of the individual discourse participants Restrictions on the use of declaratives as questions as well as differences between rising and falling declaratives as questions are shown to follow from this account Gunlogson argues that neither rising nor falling declaratives are inherently questioning rather the questioning function of declaratives arises through the interaction of sentence type intonation and context

Contrastiveness in Information Structure, Alternatives and Scalar Implicatures Chungmin Lee, Ferenc Kiefer, Manfred Krifka, 2017-01-11 A group of authors containing both leading authorities and young researchers addresses a number of issues of contrastiveness polarity items and exhaustivity quantificational expressions and the implicatures they generate and the interaction between semantic operators and speech acts The 19 contributions provide insights on the interplay between semantics and pragmatics The volume's reach is cross linguistic and takes an unorthodox multi paradigm approach Languages studied range from European languages including Hungarian and Russian to East Asian languages such as Japanese and Korean with rich data on focus and discourse particles This volume contributes to a major area of research in linguistics of the last decade and provides novel state of the art views on some of the central topics in linguistic research and will appeal to an audience of graduate and advanced undergraduate researchers in linguistics philosophy of language and computational linguistics

Talking with the President John Wilson, 2015 This book provides a pragmatic analysis of presidential language Pragmatics is concerned with meaning in context or the relationship between what we say and what we mean John Wilson explores the various ways in which U S Presidents have used language within specific social contexts to achieve specific objectives This includes obfuscation misdirection the use of metaphor or ambiguity or in some cases simply lying He focuses on six presidents John F Kennedy Richard M Nixon Ronald W Reagan William F Clinton George W Bush and Barack H Obama These presidents cover most of the last half of the twentieth century and the first decade of the twenty first century and each has been associated with a specific linguistic quality John F Kennedy was famed for his quality of oratory Nixon for his manipulative use of language Reagan for his gift of telling stories Clinton for his ability to engage the public and to linguistically turn arguments and descriptions in particular directions Bush on the other hand was famed for his inability to use language appropriately and Obama returns us to the rhetorical flourishes of early Kennedy In the case of each president a range of specific examples are explored in order to highlight the ways in which a pragmatic analysis may provide an insight into presidential language In many cases what the president says is not necessarily what the president means

Syntax and Lexis in Conversation Auli Hakulinen, Margret Selting, 2005-09-28 This volume is a collection of current work at the interface of linguistics and conversation analysis The focus is on linguistic items in their action contexts syntactic structures and lexical items in data from natural conversations in six European languages Danish English Finnish German Italian and Swedish Some of the studies deal with similar practices in two different languages which enables cross linguistic comparisons The notion of construction is brought together with an interactional perspective the fact that constructions cannot always be clearly analysed as either syntactic or lexico semantic has its reflection in this volume So far there have been fewer attempts at interactionally oriented work on lexical and semantic phenomena than on syntactic constructions In this volume several

papers show the interactional relevance of word selection and lexical semantic issues In the future studies on syntax and lexico semantics in interaction will enrich realistic grammars of our languages and cross linguistic description of comparable practices of organizing talk in interaction will be invaluable for the study of both inter European and international communication

Crosslinguistic Research in Syntax and Semantics Raffaella Zanuttini, Héctor Campos, Elena Herburger, Paul H. Portner, 2006-05-19 Presenting cutting edge research in syntax and semantics this important volume furthers theoretical claims in generative linguistics and represents a significant addition to present scholarship in the field Leading scholars present crosslinguistic studies dealing with clausal architecture negation and tense and aspect and the issue of whether a statistical model can by itself capture the richness of human linguistic abilities Taken together these contributions elegantly show how theoretical tools can propel our understanding of language beyond pretheoretical descriptions especially when combined with the insight and skills of linguists who can analyze difficult and complex data Crosslinguistic Research in Syntax and Semantics covers a range of topics currently at the center of lively debate in the linguistic literature such as the structure of the left periphery of the clause the proper treatment of negative polarity items and the role of statistical learning in building a model of linguistic competence The ten original contributions offer an excellent balance of novel empirical description and theoretical analysis applied to a wide range of languages including Dutch German Irish English Italian Malagasy Malay and a number of medieval Romance languages Scholars and students of semantics syntax and linguistic theory will find it to be a valuable resource for ongoing scholarship and advanced study

The Paper Question Henry Charles Carey, 1865 *The Gospel According to Christ* Mark A. Stelter, 2011-11-14

Christianity is in crisis We live in a time when millions of people profoundly misunderstand the message of the Gospel They believe that being a Christian means little more than being a nice person They view Jesus as a wise moral teacher who showed us how to live better lives and they conclude that the love of humanity is our greatest cause and its progress our primary purpose Whatever else may be said of this view of Christianity it is certainly not what Jesus taught It is an attempt to replace the concepts of sin redemption and salvation with the more socially acceptable virtues of tolerance compassion and social progress It elevates humanity and the world above God and his kingdom and reduces Jesus to a mere moral philosopher But who did Jesus say he was What was the essential message of Christ The Gospel According to Christ answers those questions by examining the words of Jesus in their context and in their entirety The answers will be shocking to many Christians
