Caligula Lee Fratantuono,2020-01-24 A new appraisal of the brief turbulent reign of Gaius Caligula and his achievements as a military strategist Gaius Caligula reigned for four short years from 37 to 41 CE before his infamous tenure came to a violent end While much has been written about his notorious excesses and court life relatively little of his military and foreign policy has been seriously studied This military history of Rome during Caligula s reign sheds light on that subject After he grew up in a military camp Caligula s years as emperor came in the wake of the great consolidation of Tiberius gains in Germany and Pannonia and in large part made possible the invasions of Gaul and Britain that were undertaken by his uncle and successor Claudius His expeditions in Gaul were part of a program of imitation of his storied predecessor and crowning completion of what had been left undone in the relatively conservative military policy years of Augustus and Tiberius Caligula An Unexpected General offers a new appraisal of Caligula as a surprisingly competent military strategist arguing that his achievements helped to secure Roman military power in Europe for a generation

community based and anarchic critiques of how archaeology is practiced and how science is used to interpret the past lives of people Inspired by the calls for a different way of doing archaeology this volume presents a case here for a heart centered archaeological practice Heart centered practice emerged in care based disciplines such as nursing and various forms of therapy as a way to recognize the importance of caring for those on whom we work and as an avenue to explore how our interactions with others impacts our own emotions and heart Archaeologists are disciplined to separate mind and heart a division which harkens back to the origins of western thought The dualism between the mental and the physical is fundamental to the concept that humans can objectively study the world without being immersed in it Scientific approaches to understanding the world assume there is an objective world to be studied and that humans must remove themselves from that world in order to find the truth An archaeology of the heart rejects this dualism rather we see mind body heart and spirit as inextricable An archaeology of the heart provides a new space for thinking through an integrated responsible and grounded archaeology where there is care for the living and the dead acknowledges the need to build responsible relationships with communities and with the archaeological record and emphasize the role of rigor in how work and research is conducted The contributions bring together archaeological practitioners from across the globe in different contexts to explore how heart centered practice can impact archaeological theory methodology and research throughout the discipline
