Questions And Admissions Reflections On 100000 Admissions Decisions At Stanford:

Questions and Admissions Jean H. Fetter,1997-07-01 Written in a lively and accessible manner by a former Dean of Undergraduate Admissions at Stanford University this book will enlighten prospective college applicants and their parents teachers and guidance counselors about many of the practical fundamental philosophical and ethical issues involved in the selection of any college freshman class

Meritocracy and the University Anna Mountford Zimdars,2016-04-07 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Who gets into elite universities how and why What are places like Harvard in the United States or Cambridge in England looking for when they admit undergraduate students What qualities do selectors value and how do they decide between many applicants with often stellar attainment records And are we all better off because of who these elite universities admit

Meritocracy and the University provides an insight into the world of university admissions Based on interviews with professional admissions staff and academic faculty members who select students the book explains what selectors value and how they make decisions By shining a light on the world of university admissions in England and in the United States readers are invited to reflect on the similarities and differences in who selects and how selection is done the purpose and mission of universities and the challenges universities face in building fair admissions processes when earlier opportunities to shine in education are unequally distributed

Stevens,2009-09-15 For a year and a half Stevens worked in the admissions office of a New England college known for high academic standards a beautiful campus and social conscience Ambitious high schoolers and savvy guidance counselors know that admission here is highly competitive But creating classes Stevens finds is more complicated than most imagine

Privilege and Diversity in the Academy Frances A. Maher,Mary Kay Thompson Tetreault,2013-10-18 Over the past several decades higher education has been transformed by the entry of faculty of color and women into the university system Through detailed institutional ethnographies of three very different universities Privilege and Diversity in the Academy explores how this diversification has dismantled and reconfigured relationships of privilege and diversity in higher education Authors Maher and Tetreault use examples from a top ranked private university a comprehensive urban university and a major public university to illustrate how privilege is enacted resisted and transformed as changes occur in the student bodies and faculties of these schools In their analyses they identify the institutional structures that facilitate the success of a diverse faculty and make valuable observations about patterns of institutional change and resistance **Access to Higher**

Education Anna Mountford-Zimdars,Neil Harrison,2016-11-18 How do we understand and explain who has access to higher education How do we make sense of persisting and new forms of inequality How can global national and institutional policymakers and practitioners make higher education more inclusive Access to Higher Education Theoretical perspectives and contemporary challenges seeks to update thinking on these questions combining new voices and emerging perspectives with established writers in the field This pioneering text highlights the contribution of social theory to issues of access to education with chapters introducing and drawing on the works of key interdisciplinary thinkers including Pierre Bourdieu Margaret Archer Amartya Sen and Herbert Simon It then moves to examines how theoretical perspectives can be applied to the contemporary challenges of forging more equal access with examples drawn from a wide range of contexts including the UK the US Australia South Africa and Japan Global in scope this book documents the shared nature of the access challenge in

a period when higher education is growing rapidly but inequalities continue to be stark It concludes by proposing a new direction for research and a reassertion of the role of the researcher as a social activist for disconnected and disadvantaged groups equipped with the thinking tools needed to move the agenda forward Access to Higher Education is a rigorous text for the global research community with relevance to policymakers practitioners and postgraduate students interested in social justice and social policy It provides those with an academic interest in access and a commitment to enhancing policy with theoretical and practical ideas for moving the access agenda forward in their institutional regional or national contexts

Bowen, Derek Bok, 2019-01-08 The landmark New York Times bestseller that demonstrates the benefits of race conscious admissions in higher education First published in 1998 William Bowen and Derek Bok's *The Shape of the River* became an immediate landmark in the debate over affirmative action in America It grounded a contentious subject in concrete data at a time when arguments surrounding it were characterized more by emotion than evidence and it made a forceful case that race conscious admissions were successfully helping to promote equal opportunity Today the issue of affirmative action remains unsettled Much has changed but *The Shape of the River* continues to present the most compelling data available about the effects of affirmative action Now with a new foreword by Nicholas Lemann and an afterword by Derek Bok *The Shape of the River* is an essential text for anyone seeking to understand race conscious admissions in higher education Top Student, Top School? Alexandria Walton Radford, 2013-05-02 Most of us think that valedictorians can write their own ticket By reaching the top of their class they have proven their merit so their next logical step should be to attend the nation's very best universities Yet in

Top Student Top School Alexandria Walton Radford of American Institutes for Research reveals that many valedictorians do not enroll in prestigious institutions Employing an original five state study that surveyed nine hundred public high school valedictorians she sets out to determine when and why valedictorians end up at less selective schools showing that social class makes all the difference Radford traces valedictorians paths to college and presents damning evidence that high schools do not provide sufficient guidance on crucial factors affecting college selection such as reputation financial aid and even the application process itself Left in a bewildering environment of seemingly similar options many students depend on their parents for assistance and this allows social class to rear its head and have a profound impact on where students attend Simply put parents from less affluent backgrounds are far less informed about differences in colleges quality the college application process and financial aid options which significantly limits their child s chances of attending a competitive school even when their child has already managed to become valedictorian Top Student Top School pinpoints an overlooked yet critical juncture in the education process one that stands as a barrier to class mobility By focusing solely on valedictorians it shows that students paths diverge by social class even when they are similarly well prepared academically and this divergence is traceable to specific failures by society failures that we can and should address Watch an interview of Alexandria Walton Radford discussing her book here <http://www.youtube.com/watch?v=F81c1D1BpY0>

The Future of the City of Intellect Steven G. Brint, 2002 Based on new data and new analytical frameworks this book assesses the forces of change at play in the development of American universities and their prospects for the future The book begins with a lengthy introduction by Clark Kerr that not only provides an overview of change since the time he coined the phrase the city of intellect but also discusses the major changes that will affect American universities over the next thirty years Part One examines demographic and economic changes such as the rise of nearly universal higher education private gift and corporate sponsorship of research new labor market opportunities and increasing inequality among institutions and disciplines Part Two assesses the profound influence of the Internet and other technologies on teaching and learning Part Three describes how the various forces of change affect the nature of academic research and the organization of disciplines and the curriculum Part Four analyzes the consequences of change for university governance and the means by which universities in the future can maintain high levels of achievement while maintaining high levels of autonomy The contributors include many of today s leading scholars of higher education They are Andrew Abbott Steven Brint Richard Chait Burton R Clark Randall Collins David J Collis Roger L Geiger Patricia J Gumport Clark Kerr Richard A Lanham Jason Owen Smith Walter W Powell Sheila Slaughter and Carol Tomlinson Keasey

Education in a Research University Kenneth Joseph Arrow, 1996 The research university is one of the most characteristic and important institutions of our time It is an extremely complex entity seeking to achieve a variety of

aims and responding to a multiplicity of pressures Its principal obligation is to educate students and to prepare them to live in and contribute to society To serve this function knowledge must be collected organized and disseminated but perhaps even more important new knowledge must be created The knowledge so developed and imparted must ultimately be carried out into society largely through former students but also by other means The present volume is a collection of 30 essays on the character administration and management of research universities with special emphasis on the perspective of statistics and operations research It thus concentrates on issues of systematic planning planning models teaching approaches and management associated with the aims and methods of operations research although it also deals with more general concerns about the management of universities and university resources and with some of the applications of operations research and statistical tools that have moved outside university settings
