Questions for the Soul Keith W. Krasemann,2000-03-01 **Questions on the Soul by John Buridan and Others** Gyula Klima,2017-03-30 This volume features essays that explore the insights of the 14th century Parisian nominalist philosopher John Buridan It serves as a companion to the Latin text edition and annotated English translation of his question commentary on Aristotle s *On the Soul* The contributors survey Buridan s work both in its own historical theoretical context and in relation to contemporary issues The essays come in three main sections which correspond to the three books of Buridan s *Questions* Coverage first deals with the classification of the science of the soul within the system of Aristotelian sciences and surveys the main issues within it The next section examines the metaphysics of the soul It considers Buridan s peculiar version of Aristotelian hylomorphism in dealing with the problem of what kind of entity the soul in particular the human soul is and what powers and actions it has on the basis of which we can approach the question of its essence The volume concludes with a look at Buridan s doctrine of the nature and functions of the human intellect Coverage in this section includes the problem of self knowledge in Buridan s theory Buridan s answer to the traditional medieval problem concerning the primary object of the intellect and his unique treatment of logical problems in psychological contexts **Annual Session of the Baptist Congress for the Discussion of Current Questions, Held at ...** ,1900 **Annual Baptist Autumnal Conference for the Discussion of Current Questions, Held ...** ,1900 PHILOSOPHICAL EXPLORATION THROUGH THE MIND, HEART AND SOUL OF NURSES Anita Siccardi; Karen Iseminger,2008-01-14 Creating an amalgamation of nursing education and philosophy is one of the distinctive features of this book While each of these disciplines is well established in their academic endeavors the book provides a unique voice of nursing in the analysis of philosophy s role in education To that end the book features nurses critiques of leading philosophers who have very valuable lessons for health care education Each chapter has been written to capture aspects of the heart mind and soul of nursing as appreciated through an exploration of a foremost philosopher The contributors investigate their scholar s history the essential features and examination of their work and offer pragmatic discussion questions based upon their work Personal transcendence of the authors occurred as an unexpected byproduct of their immersion with the philosophers This book provides philosophical underpinnings of health care education that nurses nursing educators clinical specialists and general healthcare educators as well as academic faculty will appreciate *Oxford University Gazette* University of Oxford,1905

Letters on the Immortality of the Soul Walter Balfour,1829 *The Human Intellect: with an Introduction Upon Psychology and the Soul* Noah Porter,1873 **The Human Intellect, with an Introduction Upon Psychology and the Soul** Noah Porter (the Younger.),1872 **Questions on the Soul** Saint Thomas (Aquinas),1984 *The Science of the Soul* Sander Wopke de Boer,2013 Aristotle s highly influential work on the soul entitled *De anima* formed part of the core curriculum of medieval universities and was discussed intensively It covers a range of topics in philosophical psychology such

as the relationship between mind and body and the nature of abstract thought However there is a key difference in scope between the so called science of the soul based on Aristotle and modern philosophical psychology This book starts from a basic premise accepted by all medieval commentators namely that the science of the soul studies not just human beings but all living beings As such its methodology and approach must also apply to plants and animals The Science of the Soul discusses how philosophers from Thomas Aquinas to Pierre d Ailly dealt with the difficult task of giving a unified account of life and traces the various stages in the transformation of the science of the soul between 1260 and 1360 The emerging picture is that of a gradual disruption of the unified approach to the soul which will ultimately lead to the emergence of psychology as a separate discipline

Imagining the Soul in Premodern Literature Abe Davies, 2021-06-28 This book is a study of ghostly matters of the soul in literature spanning the tenth century and the age of Shakespeare All people according to John Donne constantly beleeeve that they have an immortal soul But he also reflects that in fact there is nothing so well established as constrains us to beleeeve both that the soul is immortall and that every particular man hath such a soul In understanding the question of man s disembodied part as at once fundamental and fundamentally uncertain he was entirely of his time and Imagining the

Soul in Premodern Literature considers this fraught shifting yet uniquely compelling entity in the context of the literary forms and effects involved in its representation. Gruesome medieval dialogues between damned souls and worm eaten bodies, verse and prose works by Donne, Ren Descartes, Margaret Cavendish and Andrew Marvell, a profusion of sonnet sequences, sermons, manuals of instruction and travelogues, Hamlet and its natural philosophical thinking about the apparently disembodied soul haunting Elsinore: these chapters range across all this and more, offering a rigorous yet accessible account of an essential aspect of premodern literature that will be of interest to scholars, students and the general reader alike.

Hegel's Encyclopedic System Sebastian Stein, Joshua Wretzel, 2021-09-23 This book discusses the most comprehensive of Hegel's works: his long neglected Encyclopedia of the Philosophical Sciences in Outline. It contains original essays by internationally renowned and emerging voices in Hegel scholarship. Their contributions elucidate fundamental aspects of Hegel's encyclopedic system with an eye to its contemporary relevance. The book thus addresses system level claims about Hegel's unique conceptions of philosophy, philosophical science and its method, dialectic, speculative thinking and the way they relate to both Hegelian and contemporary notions of nature, history, religion, freedom and cultural praxis. **The Soul**

of the American University George M. Marsden, 1994 Explores the decline in religious influence in American universities, discussing why this transformation has occurred. **Soul, Mind and Brain from Descartes to Cognitive Science** Paolo Pecere, 2020-10-15 This interdisciplinary book ties the historical work of Descartes to his successors through current research and critical overviews on the neuroscience of consciousness, the brain and cognition. This text is the first historical survey to focus on the cohesions and discontinuities between historical and contemporary thinkers working in philosophy, physiology, psychology and neuroscience. The book introduces and analyzes early discussions of consciousness such as metaphysical alternatives to scientific explanations of consciousness and its connection to brain activity, claims about the possibilities and limits of neuroscientific accounts of consciousness and cognition and the proposition of a non-reductive naturalism concerning phenomenal consciousness and rationality. The author assesses the contributions of early philosophers and scientists on brain, consciousness and cognition among them: Descartes, Malebranche, Spinoza, Leibniz, Locke, Newton, Haller, Kant, Fechner, Helmholtz and du Bois-Reymond. The work of these pioneers is related to that of modern researchers in physiology, psychology, neuroscience and philosophy of mind including Freud, Hilary Putnam, Herbert Feigl, Gerald Edelman, Jean-Pierre Changeux, Daniel Dennett and David Chalmers among others. This text appeals to researchers and advanced students in the field.
