Dudley Andrew, 1976 **The Cinema's Third Machine** Sabine Hake, 1993-01-01 The improvements in the technology artistry and distribution of motion pictures coincided with the traumas of modern Germany It is hardly to be wondered that filmmakers frequently turned their cameras on Germany's social and political problems that propagandists regularly sought to manipulate them that entrepreneurs tried to exploit them and that German thinkers brooded upon the

relationship between German society politics and the films that represented them all From these tangled motives a rich discourse on film emerged that paralleled or anticipated discourses in the other film centers of the world The Cinema s Third Machine reproduces the diversity of perspectives and the intensity of controversies of early German film within the broad context of German social and political history from the aesthetic rapture of the first years to the institutionalization of film by the national socialist state Many texts have been rediscovered and are now presented to modern scholars for the first time Hake treats all aspects of the medium production promotion education journalism aesthetics and political activism following throughout the various forms criticism assumed

Film audiences Bridgette Wessels, Peter Merrington, Matthew Hanchard, David Forrest, 2022-12-20 Reception studies have made film audiences increasingly visible while surveys track trends and policymakers gather information about audience preferences and demographics But little attention has been paid to the specific contextual relationships and interactions between films and individuals that generate and sustain audiences This monograph develops the idea of audiences as interactive and relational introducing three innovative concepts personal film journeys five types of audience formations and five geographies of film provision A major challenge of audience research is how to capture the richness of people s social and cultural engagement with film To achieve this the book uses an innovative mixed methods research and computational ontology It develops ground breaking theory and concepts and an innovative methodology based on an extensive data set derived from the under researched area of British regional film audiences

Explorations in Film Theory Ron Burnett, 1991-02-22 Book on philosophy and theory of the cinema

Thoughtful Cinema Thomas E. Wartenberg, 2025 Anyone who has seen a film and then followed up with a cup of coffee or glass of wine as they discuss it with friends knows that films can inspire thoughtful conversation and further reflection sometimes long after their initial screening Thoughtful Cinema explores how films raise and suggest answers to philosophical questions through an in depth analysis of how seven films engage with various philosophical traditions ranging from the nineteenth century German philosopher Friedrich Nietzsche to the twentieth and twenty first century American philosopher Judith Jarvis Thomson Films can do philosophy this book argues as a result of their ability to illustrate philosophical claims and theories However the films discussed in this book do much more than that they also supplement the philosophies they illustrate by expanding their claims and criticizing their assumptions Films therefore can make their own independent contributions to philosophical theory Thoughtful Cinema shows how films grapple with philosophical ideas such as personal identity the banality of evil authenticity euthanasia third party killing and the power of attention This book makes an important contribution to the debate about cinematic philosophy that has engaged both philosophers of film and film theorists for decades and it also proves that philosophy is not just a narrow specialty accessible
