Understanding Mental Causation Andrea White, 2024-12-17 Understanding Mental Causation proposes a new non relational theory of mental causation Andrea White believes that contemporary philosophy of mind labours under a misapprehension of what mental causation is supposed to be This volume explains where the leading theories go astray and how the new theory proposed solves critical problems for philosophers of mind and action Ordinary experience suggests that what we do with our bodies causally depends somehow on what is going on in our minds However the problem of how to understand the causal relationship between mind and body remains Contemporary philosophy of mind is shaped by the question how is it possible for the mental to causally interact with the physical Mental causation is often presented as a cause effect relation between mental and physical entities This understanding of mental causation is widely endorsed because it seems like a straightforward explanation of what is going on when people act intentionally Desires and beliefs are seen as causes of the actions they explain entailing the existence of causal relations between mental items and physical events White calls this the causalist view of intentional action This view is not universally accepted The non causalist view denies that intentional action entails the existence of causal relations between mental items and physical events However non causalists reach this conclusion by arguing that explanations of intentional actions which cite beliefs or desires are not usually causal explanations at all White presents a theory of intentional action that falls between the causalist and non causalist views She rejects the idea that as a cause is how we should understand the place of mentality in intentional action Concepts like belief desire and intention do not refer to items which can stand in causal relations to actions or physical events However like causalists she holds that explanations of intentional actions which cite the agent s thoughts do give causal information This intermediary view demands a new theory about the causation that is on display when human beings act intentionally one that does not reduce mental causation to a relation between mental items and physical events Orthodox theories of causation inspired by David Hume assume that causation is always a relation between events Therefore the causation demonstrated in intentional action must be a relation because all causation is and will count as mental causation if and only if at least one of the terms of that relation is a mental entity White challenges this orthodoxy by presenting her own non relational theory of

causation Denying causation is always a relation she holds instead that causation is a general type of process in which substances engage and that exercising a causal power is to engage in a process White shows how this novel theory can be used to provide a better understanding of intentional action and the mental causation associated with it She suggests that to act intentionally is to engage in a process and as such to exercise a power but a power of a special sort The power to act intentionally is a power to structure one's own activities so that they demonstrate a pattern a pattern which is only revealed by attributing mental states to the agent So when an agent acts intentionally they engage in the process of mental causation because the agent is manifesting a special power to organise their activities into a pattern that can be made sense of by appeal to mental concepts Broadening our understanding of causation and more specifically incorporating the concepts power and process opens up new ways of understanding intentional action and mental causation In **Understanding Mental Causation** White presents a compelling new account in this key area of philosophy of mind

**Aesthetics and the Sciences of Mind** Greg Currie, Matthew Kieran, Aaron Meskin, Jon Robson, 2014-07-24 Through much of the twentieth century philosophical thinking about works of art design and other aesthetic products has emphasized intuitive and reflective methods often tied to the idea that philosophy's business is primarily to analyze concepts This philosophy from the armchair approach contrasts with methods used by psychologists sociologists evolutionary thinkers and others who study the making and reception of the arts empirically How far should philosophers be sensitive to the results of these studies Is their own largely a priori method basically flawed Are their views on aesthetic value interpretation imagination and the emotions of art to be rethought in the light of best science The essays in this volume seek answers to these questions many through detailed studies of problems traditionally regarded as philosophical but where empirical inquiry seems to be shedding interesting light No common view is looked for or found in this volume a number of authors argue that the current enthusiasm for scientific approaches to aesthetics is based on a misunderstanding of the philosophical enterprise and sometimes on misinterpretation of the science others suggest various ways that philosophy can and should accommodate and sometimes yield to the empirical approach The editors provide a substantial introduction which sets the scene historically and conceptually before summarizing the claims and arguments of the essays

*Theories of Theories of Mind* Peter Carruthers, Peter K. Smith, 1996-02-23. A state-of-the-art survey of debate within philosophy of mind, developmental psychology, the aetiology of autism, and primatology.

Mind and Political Concepts Ezra Talmor, 2016-07-01. Mind and Political Concepts offers a descriptive account of the conceptual mind as applied to political philosophy. In an attempt to find the common feature characterizing the conceptual method in political philosophy, this book examines three classical works: Plato's *Republic*, Thomas Hobbes' *Leviathan*, and Jean-Jacques Rousseau's *Social Contract*. It argues that political philosophy can also contribute something to philosophical psychology. This book is comprised of six chapters and begins by tracing the origins of the conceptual method to Plato's general philosophical method. In particular, Plato's views on concepts such as justice, human behavior, and political order in *Republic* are discussed. The reader is then introduced to Hobbes' *Leviathan* and his role in the advent of the scientific conceptual method, Rousseau's *Social Contract* and his analysis of human nature and the state, the structure of a political theory, and the link between the philosophy of mind and psychology. The last chapter considers some modern political theories and shows that, however different their methods and their programs, their notion of the philosopher's participation in political life was dependent on their concept of reason. This monograph will appeal to students and practitioners of philosophy, politics, and psychology.

**What is Philosophy of Mind?** Tom McClelland, 2021-04-13. We all have minds, but what exactly is a mind? Is your mind the same thing as your brain? How does what's happening in your mind cause your behaviour? Can you know what's going on in other people's minds? Can you even be sure what's going on in your own? Are babies conscious? How about cats? Or self-driving cars? Philosophy of mind grapples with questions like these, exploring who we are and how we fit into the world. In this student-friendly guide, McClelland introduces the key ideas in philosophy of mind, showing why they matter and how philosophers have tried to answer them. He covers the major historical moments in philosophy of mind, from Descartes and his troubles with immaterial souls up to today's consciousness wars. Additionally, he examines the implications that philosophy of mind has for psychology, artificial intelligence, and even particle physics. McClelland lays out the centuries-long dialogue between philosophy and science, presenting a uniquely grounded, practical picture of the field for students. Rich with real-world examples and written for the absolute beginner, *What is Philosophy of Mind* gives students the tools to delve deeper into this dynamic field of philosophy.

*New Conversations on the Problems of Identity, Consciousness and Mind* Jonathan O. Chimakonam, Uti Ojah Egbai, Samuel T. Segun, Aribiah D. Attoe, 2019-02-23. This book introduces concepts in philosophy of mind and neurophilosophy. Inside, three scholars offer

approaches to the problems of identity consciousness and the mind In the process they open new vistas for thought and raise fresh controversies to some of the oldest problems in philosophy The first chapter focuses on the identity problem The author employs an explanatory model he christened sense phenomenalism to defend the thesis that personal identity is something or a phenomenon that pertains to the observable perceptible aspect of the human person The next chapter explores the problem of consciousness It deploys the new concept equiphénoménalism as a model to show that mental properties are not by products but necessary products of consciousness Herein the notion of qualia is a fundamental and necessary product that must be experienced simultaneously with neural activities for consciousness to be possible The last chapter addresses the mind body problem It adopts the new concept proto phenomenalism as an alternative explanatory model This model eliminates the idea of a mind As such it approaches the mind body problem from a materialistic point of view with many implications such as the meaning lessness of our existence the possibility of thought engineering as well as religious implications
