Lucene in Action Otis Gospodnetic, Erik Hatcher, Michael McCandless, 2010-07-08. When Lucene first hit the scene five years ago it was nothing short of amazing. By using this open source, highly scalable, super fast search engine, developers could integrate search into applications quickly and efficiently. A lot has changed since then: search has grown from a nice to have feature into an indispensable part of most enterprise applications. Lucene now powers search in diverse companies including Akamai, Netflix, LinkedIn, Technorati, HotJobs, Epiphany, FedEx, Mayo Clinic, MIT, New Scientist Magazine and many others. Some things remain the same though: Lucene still delivers high performance search features in a disarmingly easy to use API. Due to its vibrant and diverse open source community of developers and users, Lucene is relentlessly improving with evolutions to APIs, significant new features such as payloads and a huge increase as much as 8x in indexing speed with Lucene 2.3. And with clear writing, reusable examples and unmatched advice on best practices, Lucene in Action, Second Edition is still the definitive guide to developing with Lucene.
