

The background is a painting of a multi-lane highway. In the center, a car is engulfed in a large, intense fire, with thick black smoke billowing upwards. To the left, a red car is stopped. To the right, a blue car is driving away from the viewer. The sky is a mix of purple and blue, suggesting dusk or dawn. The overall style is that of a classic oil painting.

Interpretation and Explanation in the Human Sciences David K. Henderson, Robert R. Chambers Distinguished Professor of Philosophy David K Henderson, 1993-01-01 Henderson examines the foundations of an analytic social science approach to develop a well integrated account of the human sciences focusing on the pivotal notions of interpretation and explanation The author acknowledges the importance of interpretive understanding in the human sciences

and proposes a methodology that reflects both interpretive practice as well as scientific methodology He refutes the methodological separatists who hold that the logic of explanation and testing in the human sciences is fundamentally different from that of the natural sciences and examines in detail the constraints on interpretation In providing an integrated treatment of these two central issues in social science Henderson offers a thorough analysis of the adequacy of interpretation and the nature of explanation in the human sciences The Boston Medical and Surgical Journal ,1901 **Oliver Wendell Holmes, Jr., Legal Theory, and Judicial Restraint** Frederic R. Kellogg,2006-12-11 Oliver Wendell Holmes Jr is considered by many to be the most influential American jurist The voluminous literature devoted to his writings and legal thought however is diverse and inconsistent In this study Frederic R Kellogg follows Holmes s intellectual path from his early writings through his judicial career He offers a fresh perspective that addresses the views of Holmes s leading critics and explains his relevance to the controversy over judicial activism and restraint Holmes is shown to be an original legal theorist who reconceived common law as a theory of social inquiry and who applied his insights to constitutional law From his empirical and naturalist perspective on law with its roots in American pragmatism emerged Holmes s distinctive judicial and constitutional restraint Kellogg distinguishes Holmes from analytical legal positivism and contrasts him with a range of thinkers **Is Faith in God Reasonable?** Corey Miller,Paul Gould,2014-04-03 The question of whether faith in God is reasonable is of renewed interest in today s academy In light of this interest as well as the rise of militant religion and terrorism and the emergent reaction by neo atheism this volume considers this important question from the views of contemporary scientists philosophers and in a more novel fashion of rhetoricians It is comprised of a public debate between William Lane Craig supporting the position that faith in God is reasonable and Alex Rosenberg arguing against that position Scholars in the aforementioned fields then respond to the debate representing both theistic and atheistic positions The book concludes with rejoinders from Craig and Rosenberg *Epistemology and History* ,2023-08-14 The Present Situation in the Philosophy of Science Friedrich Stadler,2010-05-19 This volume is a serious attempt to open up the subject of European philosophy of science to real thought and provide the structural basis for the interdisciplinary development of its specialist fields but also to provoke reflection on the idea of European philosophy of science This efforts should foster a contemporaneous reflection on what might be meant by philosophy of science in Europe and European philosophy of science and how in fact awareness of it could assist philosophers interpret and motivate their research through a stronger collective identity The overarching aim is to set the background for a collaborative project organising systematising and ultimately forging an identity for European philosophy of science by creating research structures and developing research networks across Europe to promote its development **Science Abstracts. Probabilities, Laws, and Structures Dennis Dieks, Wenceslao J. Gonzalez, Stephan Hartmann, Michael Stöltzner, Marcel Weber, 2012-02-02 This volume the third in this Springer series contains selected papers from the four workshops organized by the ESF Research Networking Programme The Philosophy of Science in a European Perspective PSE in 2010 Pluralism in the Foundations of Statistics Points of Contact between the Philosophy of Physics and the Philosophy of Biology The Debate on Mathematical Modeling in the Social Sciences Historical Debates about Logic Probability and Statistics The volume is accordingly divided in four sections each of them containing papers coming from the workshop focussing on one of these themes While the programme's core topic for the year 2010 was probability and statistics the organizers of the workshops embraced the opportunity of building bridges to more or less closely connected issues in general philosophy of science philosophy of physics and philosophy of the special sciences However papers that analyze the concept of probability for various philosophical purposes are clearly a major theme in this volume as it was in the previous volumes of the same series This reflects the impressive productivity of probabilistic approaches in the philosophy of science which form an important part of what has become known as formal epistemology although of course there are non probabilistic approaches in formal epistemology as well It is probably fair to say that Europe has been particularly strong in this area of philosophy in recent years

The Migration of Constitutional Ideas Sujit Choudhry, 2007-01-18 The migration of constitutional ideas across jurisdictions is one of the central features of contemporary constitutional practice The increasing use of comparative jurisprudence in interpreting constitutions is one example of this In this 2007 book leading figures in the study of comparative constitutionalism and comparative constitutional politics from North America Europe and Australia discuss the dynamic processes whereby constitutional systems influence each other They explore basic methodological questions which have thus far received little attention and examine the complex relationship between national and supranational constitutionalism an issue of considerable contemporary interest in Europe The migration of constitutional ideas is discussed from a variety of methodological perspectives comparative law comparative politics and cultural studies of law and contributors draw on case studies from a wide variety of jurisdictions Australia Hungary India South Africa the United Kingdom the United States and Canada

Economy and Society: Selected Writings Karl Polanyi, 2018-06-29 Few figures are more crucial to understanding the upheavals of our contemporary era than Karl Polanyi In a world riven by social and economic crises from rising inequality to the decay of democratic institutions and profound technological disruption Polanyi's path breaking account of the dynamics of market capitalism and his defence of society and nature against the dangerous tendencies of the market capitalist system are more relevant than ever This book brings together Polanyi's most important articles and essays to give a unique selection of his essential shorter writings mixing classic texts with significant but previously little known pieces It highlights the coherence and richness of Polanyi's theoretical and political approach making

it indispensable for understanding his overarching intellectual contribution The volume includes his interwar writings which deal with the world economic crisis and the socialist alternative to conservative and fascist developments his reflection on political theory and the international situation after the war and his comparative studies of economic institutions Polanyi's political writings are complemented and supported by the critique of economic determinism and what he termed our obsolete market mentality This book is an invaluable companion to Polanyi's masterpiece *The Great Transformation* and an essential resource for students and scholars of political economy sociology history and political philosophy **Self, Identity, and Social Institutions**

D. Heise, N. MacKinnon, 2010-04-26 This book shows how the individual constructs a self from the thousands of colloquial identities provided by a society's culture and reveals how the individual actualizes and sustains an integrated and stable self while navigating the sometimes treacherous waters of everyday institutional life *The Structure of Biological Theories* Paul Thompson, 1989-01-01 The central thesis of this book is that the semantic conception is a logical methodologically and heuristically richer and more accurate account of scientific theorizing and in particular of theorizing in evolutionary biology than the more widely adhered to syntactic conception In this book the author outlines both the conceptions indicating the significant problems with the syntactic conception explains and criticizes two influential syntactic conception accounts of the structure of evolutionary theorizing Thompson also argues that the semantic conception provides a richer and more accurate understanding than the syntactic conception of sociobiological explanation of the testability of sociobiology and of the role of culture and cognition in evolutionary explanations of human behavior **Art Theory and Criticism**

Sally Everett, 1995-01-15 Arranged chronologically the essays in this book each brilliantly introduced by the editor deal with the way art and culture interact in modern times Each author focuses on one aspect of modern art and its relation to culture by analyzing questioning or refuting the ideas about art that people just assume are true The essays are also grouped into one of four different models used by art theorists today the formalist in which the works of art describe the processes of making art the avant garde art that threatens the status quo the contextualist in which art can exist only in a specific situation or context and the post modernist stating that art is not completely detached from popular culture
