Lies, Damned Lies and History Graeme Donald, 2010-12-26 From cats spats and catacombs to the Wall Street shuffle this book looks at how historical events didn't always unfold as we think they did. It takes the readers on a journey century by century showing how the truth we take for granted is a far cry from the facts. It is suitable for those who want to see the past as it was. *Thanatourism* Tony Johnston, Pascal Mandelartz, 2015-10-30 Thanatourism is an important new overview of the growing field. It introduces more rigorous scholarship, new philosophical perspectives and a wealth of empirical material on the contemporary and historical consumption of death with case studies designed to stretch and challenge current discourse.

Science By Simulation - Volume 1: A Mezze Of Mathematical Models Andrew French, 2022-05-30 A Mezze of Mathematical Methods is Volume 1 of Science by Simulation. It is a recipe book of mathematical models that can be enlivened by the transmutation of equations into computer code. In this volume the examples chosen are an eclectic mix of systems and stories rooted in common experience rather than those normally associated with constrained courses on Physics, Chemistry or Biology which are taught in isolation and susceptible to going out of date in a few years. Rather than a what of Science, this book is aimed at the how readily applied to projects by students and professionals. Written in a friendly style based upon the author's expertise in teaching and pedagogy, this mathematically rigorous book is designed for readers to follow arguments step by step with stand-alone chapters which can be read independently. This approach will provide a tangible and readily accessible context for the development of a wide range of interconnected mathematical ideas and computing methods that underpin the practice of Science.

The Book of Beasts Andrew Screen, 2023-10-05 Nigel Kneale is perhaps best known for his pioneering work in television fantasy, notably the creation of Quatermass and his landmark adaptation of George Orwell's 1984 for the BBC. This book is the first in-depth study of another arguably lesser-known but equally as important Kneale creation, the 1976 Folk Horror anthology television series *Beasts*. Each of the six episodes of *Beasts* was a standalone supernatural drama exploring themes and ideas prevalent throughout Kneale's work, all within the confines of a lowly British television budget. From pilot episode *Murrian* to cult favourite *Baby Beasts*, charted an uncanny British landscape where the ghost of a dolphin haunts an aquarium and a supermarket is plagued by a mysterious animalistic presence. In researching and writing this book, author Andrew Screen was given rare access to Kneale's original scripts and production paperwork and provides an exclusive account of Kneale's trials and tribulations in developing the series. There are also interviews with members of cast and crew, a discussion of episode treatments that were prepared but never realised, and the reasons why Kneale abandoned these at an early stage. Moreover, each storyline is contextualised with real-life developments and events exploring the mythological and cultural inspirations.
