Dinner with Mobutu Jake Smith, 2005 Oil field worker soldier Washington bureaucrat professor farmer builder academic dean and international consultant These are some

of Jake Smith's job titles chronicled in this memoir *Dining with dictators* is just one small episode in an eclectic career. This book documents Smith's life and times from a small town in rural Louisiana to presidential palaces in Africa from struggles to survive on a Tennessee farm to struggles in academia where the stakes are small but the fights are vicious. *Dinner with Mobutu* covers Smith's 40-year fascination with Africa from student to scholar to political consultant.

Anthill Economics Nathaniel Gronewold, 2021-03-05 Does modern economic theory violate the basic laws of nature and physics? That is the question that award-winning environmental and energy writer Nathaniel Gronewold sets out to answer in *Anthill Economics*. Drawing from the nascent field of biophysical economics, *Anthill Economics* puts forth a radical new way of thinking as 21st-century citizens: the global economy truly is our human ecosystem. It is where raw materials are sourced, goods are supplied, energy is converted, and capital is exchanged. Shouldn't it stand to reason that the same principles that affect animal ecosystems like population density, habitation patterns, and energy return on investment similarly apply to our albeit more complex human ecosystem too? With an innovative and cross-disciplinary approach, Gronewold draws comparisons from both the animal kingdom and the atomic world. The rollercoaster-like rise and fall of the caribou population on a remote island can teach us about resource allocation. The behavior of squirrels gathering nuts is a lesson in energy return on investment. Could the high unemployment rates of anthill colonies shed light on problems with the human job market? And will global warming change these patterns for humans and insects alike? Furthermore, if certain laws of physics can be used to explain the distribution of energy in a complex physical system, could these same laws also explain the distribution of money in a complex economic system as well? This clearly written book, full of illuminating ecological analogies, provides a more complete understanding of human commerce shaped by the rules of nature and laws of physics.

Anointed with Oil Darren Dochuk, 2019-06-04 A groundbreaking new history of the United States showing how Christian faith and the pursuit of petroleum fueled America's rise to global power and shaped today's political clashes. *Anointed with Oil* places religion and oil at the center of American history. As prize-winning historian Darren Dochuk reveals, from the earliest discovery of oil in America during the Civil War, citizens saw oil as the nation's special blessing and its peculiar burden, the source of its prophetic mission in the world. Over the century that followed and down to the present day, the oil industry's leaders and its ordinary workers together fundamentally transformed American religion, business, and politics, boosting America's ascent as the preeminent global power, giving shape to modern evangelical Christianity, fueling the rise of the Republican Right, and setting the terms for today's political and environmental debates. Ranging from the Civil War to the present, from West Texas to Saudi Arabia to the Alberta Tar Sands and from oil patch boomtowns to the White House, this is a sweeping magisterial book that transforms how we understand our nation's history.
