**Building Walls and Dissolving Borders** Max O. Stephenson, 2016-05-23 Walls play multiple social political economic and cultural roles and are linked to the fundamental question of how human beings live together Globalization and urbanization have created high population density rapid migration growing poverty income inequality and frequent discontent and conflict among heterogeneous populations The writers in this volume explore how walls are changing in this era when social containers have become porous proximity has been redefined circulation has intensified and the state as a way of organizing political life is being questioned The authors analyze how walls articulate with other social boundaries to address feelings of vulnerability and anxiety and how they embody governmental processes public and social contestation fears and notions of identity and alterity This book s authors explore walls as the consequence of a changing web of social relationships Whether walls are

physical objects on the landscape or metaphors for difference among specific groups or communities the writers consider them as heterotopias powerful sites around which ways of living together are contested and transformed They also investigate how architectural planning concerning walls may de facto become a means of waging war as well as how demolishing walls may give way to new ways of imagining security

*Law, Society and Transition in Myanmar* Melissa Crouch, Tim Lindsey, 2014-10-23 This edited volume addresses the dynamics of the legal system of Myanmar Burma in the context of the dramatic but incomplete transition to democracy that formally began in 2011 It includes contributions from leading scholars in the field on a range of key legal issues now facing Myanmar such as judicial independence constitutional law human rights and institutional reform It features chapters on the legal history of Myanmar electoral reform the role of the judiciary economic reforms and the state of company law It also includes chapters that draw on the experiences of other countries to

contextualise Myanmar's transition to democracy in a comparative setting including Myanmar's participation in regional bodies such as ASEAN This topical book comes at a critical juncture in Myanmar's legal development and will be an invaluable resource for students and teachers seeking greater understanding of the legal system of Myanmar It will also be vital reading for a wide range of government business and civil society organisations seeking to re-engage with Myanmar as it navigates a difficult transition toward democracy and the rule of law      Transgression as a Rule Ulrich Best, 2007 Whereas currently German Polish relations are marked by irritations the previous phase of politics and discourse from 1990 leading up to the EU accession of Poland was marked by an increasing stress on Europe in both countries This was connected with changing practices of cross border cooperation as well as a change in academic border studies Transgression as a Rule argues that resulting from this cross border cooperation has become a rule The actors negotiate new contradictory spaces for their actions supported by the state but partly uncomfortable with it drawing on the powerful discourse of cooperation and trying to escape from it Their practices can also inform the practices of border studies      **Placing the Border in Everyday Life** Reece Jones, Corey Johnson, 2016-04-22 Bordering no longer happens only at the borderline separating two sovereign states but rather through a wide range of practices and decisions that occur in multiple locations within and beyond the state's territory Nevertheless it is too simplistic to suggest that borders are everywhere since this view fails to acknowledge that particular sites are significant nodes where border work is done Similarly border work is more likely to be done by particular people than others This book investigates the diffusion of bordering narratives and practices by asking who borders and how Placing the Border in Everyday Life complicates the connection between borders and sovereign states by identifying the individuals and organizations that engage in border work at a range of scales and places This edited volume includes contributions from major international scholars in the field of border studies and allied disciplines who analyze where and why border work is done By combining a new theorization of border work beyond the state with rich empirical case studies this book makes a ground breaking contribution to the study of borders and the state in the era of globalization      **Citizens and borderwork in contemporary Europe** Chris Rumford, 2013-10-31 The extent to which ordinary people can construct shift and dismantle borders is seriously neglected in the existing literature The book explores the ability of citizens to participate in the making of borders and the empowerment that can result from this bordering and debordering activity Borderwork is the name given to the ways in which ordinary people can make and unmake borders Borderwork is no longer only the business of nation states it is also the business of citizens and indeed non citizens This study of borderwork extends the recent interest in forms of bordering which do not necessarily occur at the state's external borders However the changing nature of borders cannot be reduced to a shift from the edges to the interior of a polity To date little research has been conducted on the role of ordinary people in envisioning constructing maintaining shifting and erasing borders creating borders which facilitate mobility for some while creating barriers to mobility for others appropriating the political resources

which bordering offers contesting the legitimacy of or undermining the borders imposed by others This book makes an original contribution to the literature and stands to set the agenda for a new dimension of border studies This book was published as a special issue of Space and Polity

**Bordering and Ordering the Twenty-first Century** Gabriel Popescu, 2012 This timely book introduces readers to the central question of borders in the twenty first century After familiarizing readers with border thinking and making from antiquity to the present Gabriel Popescu turns a critical eye on current concepts processes and contexts Assessing the latest theoretical approaches to border studies the author deftly incorporates a range of disciplinary perspectives including geography international relations sociology history security studies and anthropology He explores recent world events discussing how current issues such as migration terrorism global warming pandemics the international human rights regime outsourcing the economic crisis supranational integration regionalization and digital technology relate to borders and influence our lives Written with a clear eye and voice this book makes a complex subject accessible to a wide readership

*The Routledge Research Companion to Border Studies* Doris Wastl-Walter, 2016-04-01 Throughout history the functions and roles of borders have been continuously changing They can only be understood in their context shaped as they are by history politics and power as well as cultural and social issues Borders are therefore complex spatial and social phenomena which are not static or invariable but which are instead highly dynamic This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative state of the art review of all aspects of borders and border research It is truly global in scope and besides embracing the more traditional strands of the field including geopolitics migration and territorial identities it also takes in recently emerging topics such as the role of borders in a seemingly borderless world creating neighbourhoods and border enforcement in the post 9 11 era

The EU-Ukraine Association Agreement and Its Impacts on Cross-Border Cooperation Martin Lačný, 2021-08-03 The implementation of the Association Agreement AA including the Deep and Comprehensive Free Trade Area DCFTA between the EU and Ukraine has brought about a qualitatively new situation in the development of border regions and regional societies on both sides of the Schengen border This volume s comparative study of the impacts of the AA and the DCFTA on borderlands in Ukraine Poland Slovakia Hungary and Romania will contribute to the identification of new opportunities for cross border cooperation and policy considerations for its further development

Palgrave Advances in Peacebuilding O. Richmond, 2010-01-20 The quality of the peace arrived at via liberal peacebuilding approaches has been poor The related statebuilding praxis has generally been unable to respond to its critics What is at stake is a recognition of peacebuilding s everyday political social economic and cultural dynamics This indicates the emergence of a post liberal form of peace

Beyond Walls: Re-inventing the Canada-United States Borderlands Victor Konrad, Heather Nicol, 2016-12-05 September 11 2001 marked the beginning of a new era of security imperatives for many countries The border between Canada and the United States suddenly emerged from relative obscurity to become a focus of

constant attention by media federal and state provincial governments on both sides of the boundary and the public at large This book provides a comprehensive examination of the Canada USA border in its 21st century form placing it within the context of border and borderlands theory globalization and the changing geopolitical dialogue It argues that this border has been reinvented as a state of the art technology steeped crossing system while the image of the border has been engineered to appear consistent with the friendly border of the past It shows how a border can evolve to a heightened level of security and yet continue to function well sustaining the massive flow of trade It argues whether in doing so the US Canada border offers a model for future borderlands Although this model is still evolving and still aspires toward better management practices the template may prove useful not only for North America but also in conflict border zones as well as the meshed border regions of the EU Africa s artificial line boundaries and other global situations Old Cultures, New Institutions Ann Kennard, 2010 Border regions around the new eastern and south eastern edges of the European Union have seen the re emergence of previous cultures and ethnicities This has caused a reappraisal of people s relationship with history Border related institutions established at international regional and local levels have endeavoured to make the border regions places of cultural encounter providing a new way forward for future generations through new kinds of cooperation *Migration in the Western Mediterranean* Laure-Anne Bernes, Hassan Bousetta, Caroline Zickgraf, 2017-08-22 The upheavals of the Arab Spring grabbed the world s immediate attention and concern quickly grew over their potential aftermath with the fear that a tidal wave of immigrants and refugees would flood European territory The Arab Spring has highlighted the Mediterranean as a migration region and new research is now required to bring to light too often neglected mobility patterns and border practices that predate and outlast the tumultuous spring of 2011 The edited volume *Space Mobility and Borders in the Western Mediterranean* tackles these contemporary issues related to migration in the Mediterranean region It brings together high quality original academic contributions from both empirical and theoretical points of view by scholars from diverse disciplines who draw upon Anglophone Francophone Spanish and Italian research It reexamines borders in the light of a now full blown body of literature that seeks to capture the complexity of their contemporary features beyond their most direct visual enactments in particular the sweeping deployment of policing devices and operations along the North South fault line Another distinctive binding thread in this book is that it emphasizes migrants as active subjects interacting with local events national policies and the bordering process Offering an examination of the intricate interplay among the events of the Arab Spring migration s multiple types and actors and the evolving relationship between migration control and borders in the region this book is an essential resource for students and scholars of migration studies European Union Studies and Mediterranean Studies The SAGE Handbook of European Foreign Policy Knud Erik Jorgensen, Aasne Kalland Aarstad, Edith Drieskens, Katie Laatikainen, Ben Tonra, 2015-04-30 During the last two decades the study of European foreign policy has experienced remarkable growth presumably reflecting a more significant international role of the European Union

The Union has significantly expanded its policy portfolio and though empty symbolic politics still exists the Union's international relations have become more substantial and its foreign policy more focused European foreign policy has become a dynamic policy area being adapted to changing challenges and environments such as the Arab Spring new emerging economies powers the crisis of multilateralism and much more The SAGE Handbook of European Foreign Policy Two Volume set is a major reference work for Foreign Policy Programmes around the world The Handbook is designed to be accessible to graduate and postgraduate students in a wide variety of disciplines across the humanities and social sciences Both volumes are structured to address areas of critical concern to scholars at the cutting edge of all major dimensions of foreign policy The volumes are composed of original chapters written specifically to the following themes Research traditions and historical experience Theoretical perspectives EU actors State actors Societal actors The politics of European foreign policy Bilateral relations Relations with multilateral institutions Individual policies Transnational challenges The Handbook will be an essential reference for both advanced students and scholars
