Royal Forests Of Medieval England:

The Royal Forests of Medieval England Charles R. Young, 2015-10-28 The distinction between the forest and the trees is fundamental to this study for the royal forest of medieval England was a complex institution with legal political economic and social significance To protect the beasts of the forest and their habitat initially for the king's hunting and later for economic exploitation an elaborate organization of officials and courts administered a system of forest law that was unique to medieval England The subject can first be studied in detail in the records and chronicles of the Angevin kings which reflect the restless activity of Henry II and his growing corps of officials that led to the expansion of the area designated as royal forest At its height in the thirteenth century an estimated one fourth of the land area of England and its riches came under the special jurisdiction of forest law Barons whose holdings lay within the royal forest were restricted in their use of the land and the activity of all who lived or traveled in the forest was circumscribed Until the institution of new taxes overshadowed the economic importance of the forest and the king divested himself of large areas of forest in 1327 the extent of the royal forest with its special jurisdiction was often a source of conflict between king and barons and was a major political issue in the Magna Carta crisis of 1215 This is the first general history of the royal forest system from its beginning with the Norman Conquest to its decline in the later Middle Ages The author pays special attention to the development of forest law alongside common law and the interrelationship between the two types of law courts and justices The preservation of extensive unpublished records of the forest courts in the Public Record Office makes possible this intensive study of the legal and administrative aspects of the royal forest chronicles and the records of the Exchequer among other sources shed light on the political and economic importance of the royal forests in medieval England The author's ultimate objective is to show the influence of the royal forest upon the daily lives of contemporaries both the barons who held land and the peasants who tilled land within the royal forests

An Environmental History of the Middle Ages John Aberth, 2013 The Middle Ages was a critical and formative time for Western approaches to our natural surroundings eeAn Environmental History of the Middle Ages is a unique and unprecedented cultural survey of attitudes towards the environment during this period Humankind's relationship with the environment shifted gradually over time from a predominantly adversarial approach to something more overtly collaborative until a series of ecological crises in the late Middle Ages With the advent of shattering events such as the Great Famine and the Black Death considered efflorescences of the climate downturn known as the Little Ice Age that is comparable to our present global warming predicament medieval people began to think of and relate to their natural environment in new and more nuanced ways They now were made to be acutely aware of the consequences of human impacts upon the environment anticipating the cyclical new ecology approach of the modern world Exploring the entire medieval period from 500 to 1500 and ranging across the whole of Europe from England and Spain to the Baltic and Eastern Europe John Aberth focuses his study on three key areas the natural elements of air water and earth the forest and wild and

domestic animals Through this multi faceted lens An Environmental History of the Middle Ages sheds fascinating new light on the medieval environmental mindset It will be essential reading for students scholars and all those interested in the Middle Ages

Rural Space in the Middle Ages and Early Modern Age Albrecht Classen,2012-05-29 Older research on the premodern world limited its focus on the Church the court and more recently on urban space The present volume invites readers to consider the meaning of rural space both in light of ecocritical readings and social historical approaches While previous scholars examined the figure of the peasant in the premodern world the current volume combines a large number of specialized studies that investigate how the natural environment and the appearance of members of the rural population interacted with the world of the court and of the city The experience in rural space was important already for writers and artists in the premodern era as the large variety of scholarly approaches indicates The present volume signals how much the surprisingly close interaction between members of the aristocratic and of the peasant class determined many literary and art historical works In a surprisingly large number of cases we can even discover elements of utopia hidden in rural space We also observe how much the rural world was a significant element already in early medieval mentality Moreover as many authors point out the impact of natural forces on premodern society was tremendous if not catastrophic

King John Ralph V Turner,2011-08-26 King John long ago acquired the epithet Bad and he is reputed to be the worst of England s kings Before his death in 1216 his desperate exploitation of his subjects for ever more money had turned him into the mythical monster of Hollywood legend In marked contrast to his brother Richard John appeared incompetent in battle failing to defend Normandy 1202-04 and was unsuccessful in recovering his lost lands in 1214 A continuing crisis was a constant need for money forcing John to drain England of funds for campaigns in France demanding unlawful and oppressive new taxes Adding to his evil reputation was an ill tempered personality and a streak of pettiness or spitefulness that led him to monstrous acts including murdering his own nephew King John s unpopularity culminated in a final crisis a revolt by the English baronage 1215-16 aimed at subjecting him to the rule of law that resulted in his grant of Magna Carta

Antwerp Royal Museum Annua l2013-2014 Paul Vandenbroeck,2016-12-28 At various points over the course of the 20th century the Belgian State and its various ministries and provinces consciously chose to subsidise not only the fine arts but also the applied and decorative arts and in particular the art of weaving tapestry On the one hand orders were placed for World Exhibitions and for Belgian embassies and on the other competitions were held for tapestries to be hung in important locations such as the United Nations and NATO headquarters and the exhibitions that were organized by the various ministries over the years They provided an overview of the ways in which this branch of the arts was changing as

well as representative work by the best tapestry designers The exhibitions organized by the provincial authorities give quite a different image There were the highly conventional exhibitions of Brabantine tapestries to promote the craftsmanship of the province and there were the more innovative textile exhibitions Taken as a whole the commissions competitions and exhibitions give a good overview of what was happening in Belgium in the field of tapestry over the period 1945 1980 They also make it clear what image was being projected abroad that of a country with rich traditions master craftsmanship in weaving and in the 1970s some affiliation to the latest developments in European textile art **Masculinity and the Hunt** Catherine Bates,2013-03-21 Masculinity and the Hunt traces the imagery of the hunt in English literature of the 16th century exploring a set of practices and motifs that are central to the culture of the period
